

Magnolia Awards A&M Engineering Scholarship

J. L. Latimer, president of Magnolia Petroleum Company, has announced the establishment of six scholarships at colleges in the Southwest and Midwest. These scholarships are for students taking courses relating to the petroleum industry. Scholarships in Petroleum Engineering have been placed at Texas A&M and Louisiana State University. Scholarships in Geophysics were established at the University of Tulsa and the Colorado School of Mines, and those in Geology went to the University of Michigan and to the University of Minnesota.

Rotarians Hear AAA Discussion

The activities of the American Automobile Association, Texas Division were explained yesterday to the Bryan and College Station Rotary Club by Paul Kulp of Austin, manager of the Texas Division. In his talk on "Better Motoring," Kulp said his organization's activities included promoting safety, securing highway improvement legislation and working for better travel facilities.

"Teach school children safety on the highways could conceivably cut the nation's annual traffic death toll in half," Kulp told the Rotarians. Visitors at the meeting yesterday were S. H. Siede of Hearne, W. D. Saels of Belton, Robert H. Gibson of Floydada, Art Dyer of Houston, the Rev. Ed. Mitchell of Giddings, Rowland Persons and the Rev. Charles Cummings, both of Bryan.

Students selected to receive these scholarships will be chosen jointly by the school and Magnolia from members of the senior class. An award of \$750.00 is to be furnished to the school by the Company and will be granted to the student in keeping with the scholarship policy of each college. These grants, to be known as "Magnolia Petroleum Company Scholarships," are achievement awards to aid outstanding students to complete their undergraduate work. There is no obligation on the part of the recipient or the Company regarding future employment with Magnolia or any of its affiliated organizations.

The establishment of these scholarships is a part of a fellowship and scholarship program begun in 1949 by the Geological, Geophysical and Petroleum Engineering Departments of the Company.

Placement Office Job Calls

Job No. 1. The Shelby Construction Company is interested in obtaining several young graduate civil engineers for work in New Orleans and nearby southern states.
Job No. 2. The Hays Manufacturing Company has openings for salesmen. They manufacture brass and iron stops, valves and control devices, fittings and equipment specialties.
Job No. 3. Industrial engineers are needed by the Silas Mason Company for their plants in Iowa and Nebraska.
Job No. 4. Mr. E. P. Haltom is interested in contacting an A&M ex-student who has had at least two years in animal husbandry, to work and handle his 1100 acre stock farm. He prefers a married man since living quarters are available.
Job No. 5. Ed Freidrich, Incorporated has openings in their Engineering Department for graduates or under-graduates in mechanical engineering. They are primarily interested in young men who desire a permanent affiliation.

Job No. 7. The Gulf Oil Company is interested in a petroleum engineer who has had training or experience in reservoir work.
Job No. 8. The Magnolia Petroleum Company is in need of architectural engineers for openings in their Marketing Department. A representative of the company will conduct personal interviews on the campus sometime during August. Anyone who is interested should sign up for tentative appointment no later than August 1.
Job No. 9. The Houston Lighting and Power Company has openings for distribution engineers and commercial and industrial sales work.
Job No. 10. There are four vacancies in the Sherman Public Schools as follows: junior band director;

7th grade teacher who also handles grade school boys' sports activities; teacher of high school mathematics who can coach boys' tennis; teacher for exceptional (physically handicapped) grade school children.
Job No. 11. The Fremont County Vocational High School in Wyoming has a position open in vocational agriculture and vocational auto mechanics and shop.
Job No. 12. Sigler, Clark and Winston are interested in a civil engineering graduate for structural design. They are also in need of an engineering draftsman.
Job No. 13. The Baker Nursery is interested in hearing from someone trained in floriculture and landscape architecture.
Job No. 14. The Corning Glass Works have openings for mechanical, chemical, electrical, and industrial engineers and for physicists. They are especially interested in engineers willing to do considerable board work.

Dorm 15

(Continued from Page 3)
The ball was reeling in center field Lenzen and Hovell came on in to score with plenty of time to spare.
Dorm 15 picked up one extra run in both the fourth and fifth innings. The run that won the game was scored by Bruce Miller after he had gotten on first with a single.
Rally Falls Short
The 16 rally in the sixth fell short by one run as they could only pick up three runs. Buddy Armstrong was the last man at bat with the bases loaded and a score of 9-8 in favor of the other team on the score card. 16 didn't win, Nuff said.
Vet Village failed to field a softball team so the game went to Texas for forfeit.
Walton won their volleyball game with Milner by the same score.
C Co. licked A Sqdn. 9-4 in another Fish game yesterday.

Agenda Outlined

(Continued from Page 1)

The United Nations would adequate supervision and actual inspection by some international commission on each side of the cease-fire zone.

Allied spokesmen have identified this as an absolute must to guarantee against possible preparations for a surprise attack or a buildup for new advantages if subsequent truce negotiations break down.

The Allies have indicated they want both air and ground supervision. Communists have always objected to any type of ground supervision. And in Korea there have been specific intimations of protest against supervision in the air, which was ruled by the U.N. through all the fighting.

Point four—exchange of prisoners—also could offer unexpected obstacles.

The allies have indicated they want to exchange prisoners on a man for man basis. The Reds have intimated they think all prisoners of war should be sent home.

The U.N. has some 163,000 prisoners compared to about 10,000 allied prisoners held by the Reds. The fifth point presumably is the Communist-suggested answer to the big stumbling block in the ten cease-fire sessions.

That was the Red demand that armistice terms include withdrawal of all foreign troops from Korea.

The U.N. insisted this was a political question that could be taken up only at a higher level after an armistice was actually in effect.

North Korean Gen. Nam Il, chief Red delegate, presumably presented the Red solution yesterday. And it was accepted by the allies today.

Informed sources indicated the Communists dropped their demand for immediate settlement of the issue in return for a U.N. pledge that it would be taken up later.

Clean-Up

(Continued from Page 1)

required to keep it that way. Most property holders probably would admit that there are quite a few things about their premises that could be cleaned up or put in better shape," Baty said.

Combat Polio

"The method of transmission of polio organism is not definitely known but there has been evidence from time to time that it may be connected with improper sanitation. Citizens can do something about this possible means of spreading this dreadful disease," said Baty.

There will be no inspections made of individual premises during this campaign. People will not be bothered with having a neighbor or anyone else call and hand them a list of things they should do to their premises. It is believed that in a community of this type every person has enough pride that he wants to protect his own family and his neighbors by taking care of his own back yard, the chairman added.

Like floating on a cloud—and two Texans attending Signal Corps' ROTC Summer encampment at Fort Monmouth, N. J., pause to gloat about innerspring mattresses which have cradled them during the busy six-week Summer session. On the go every day from 5:15 a. m., the boys have been plenty grateful for nighttime comfort. L. to r.: Cadets Eugene W. Helms of Bartlett, from A&M, and Larry E. LaRoe of Lubbock, representing Texas Tech. They and 1300 other college undergrads have specialized in every phase of Army communications during the course, which terminates July 28th.

Tour Engineering Laboratory

(Continued from Page 1)

The A&M cadets also toured the prominent Signal Corps Engineering Laboratories at the Post,

a principal research and development center for Army science. Earlier this month, many deans and professors of colleges represented visited the camp for a two-

day inspection of activities. Top-ranking Army chiefs also toured the ROTC area.

Training in the first four weeks stressed command and leadership, military discipline, and rifle marksmanship. The latter covered a two-day period on the range, firing the M-1 carbine for record.

Aside from technical training all cadets have regular inspection, reviews and lectures. They also witness demonstrations on camouflage, field fortifications, mines and booby trap demolitions.

As to the technical phase the cadets not only operate signal equipment but perform duties relative to staff relationship, signal planning, combat orders, reconnaissance, disposition of personnel during tactical operation, "jump teams," supply and logistics, and black-out operations.

On the off-duty side, weekends from Saturday noon on are generally free. Located in the heart of the Jersey seashore area the Aggies undoubtedly visit Asbury Park, Long Beach and other resort towns. Also, they are only fifty miles from New York City.

All facilities at Fort Monmouth are extended for the cadets' social diversion. Special Services offers a varied calendar, including formal dances and an intramural athletic program. They are also temporary members of the Officers Club at Fort Monmouth.

The religious duties are carried out as an important aspect of the camp.

Col. Malcolm R. Kammerer, professor of military science and tactics at City College of New York, is Deputy Camp Commander of the ROTC contingent. All 48 states and Hawaii are represented among the 1300 cadets,

Tigers, Red Sox To Vie for Crown

The South Side Food Market Red Sox and the Seven-Up Tigers will play a three out of five games series which will begin Monday, depending on the outcome of the American Little League tournament team in Austin Saturday.

If the tournament team wins its game the series will be postponed until the All-Star squad is eliminated.

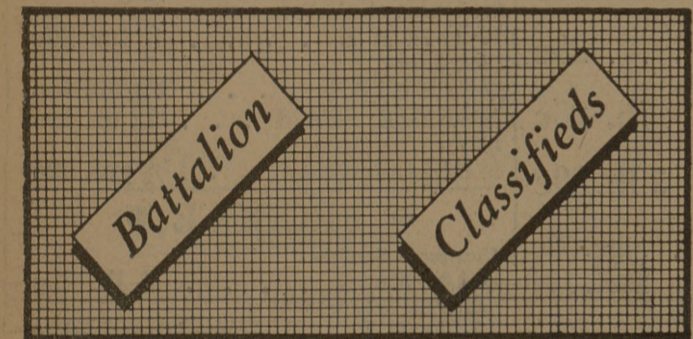

The winner of this series between the Red Sox and the Tigers will be crowned the American League Champions. This series is necessary because the Tigers won the first half of the seasons play and the Red Sox won the second half.

Cotton

(Continued from Page 1)

observe production and harvesting problems of cotton under controlled experiments.

In the afternoon, the discussions of cotton studies will continue by the leading cotton authorities. The distinguished speaker on the program will be Knox T. Hutchinson, Assistant Secretary of Agriculture, Washington, D. C.
