

Government Publications Donated By Olin Teague

Congressman Olin E. Teague of College Station has donated his personal collection of publications related to governmental affairs to A&M.

The gift includes Teague's personal collection of the Congressional Record and other publications, R. A. Houze, library director, said.

Teague, who represents the Sixth Congressional District, has donated other publications in the past.

President Earl Rudder said Teague's gift was a valuable addition to the library.

"It puts our library in an enviable position from the standpoint of government documents," he pointed out.

Teague is a 1932 graduate of Texas A&M.

The affirmative team from Texas Technological College and negative team from Baylor University won top honors.

Jones Gets Scholarship

A&M senior Harrison P. Jones of Brownsville has received the Southern Industrial Distributors' Association Scholarship. The renewable scholarship worth \$250 a semester was presented by Asst. Prof. James L. Boone Jr., as coordinator of A&M's program in industrial distribution.

The scholarship given in memory of Alvin M. Smith, a past president of the regional association, was awarded to Jones on the basis of his academic achievements and fitness for success in the industrial distribution field. The award is open to junior and senior students and Jones is the fifth winner.

Jones plans to complete industrial distribution studies at A&M in January.

He is a member of the Cadet Corps, executive officer of the Ross Volunteer Company, and serves as a first lieutenant in Company F-3.

Tickets Are On Sale

Tickets for the Pan-American Week Smorgasborg on April 13 are on sale in the Student Finance Center of the Memorial Student Center.

Enrique Serna, chairman of Pan-American Week, said the smorgasborg will include Spanish rice, frijoles, enchilados, chili con carne, tamales, tortillas, salad, condiments, and pralines. Tickets sales will end April 6.

IE's To Receive Plaque

The Department of Industrial Engineering will receive a plaque at the April 22 Student Engineers Council Awards banquet for the best display of the 1965 High School Career Day.

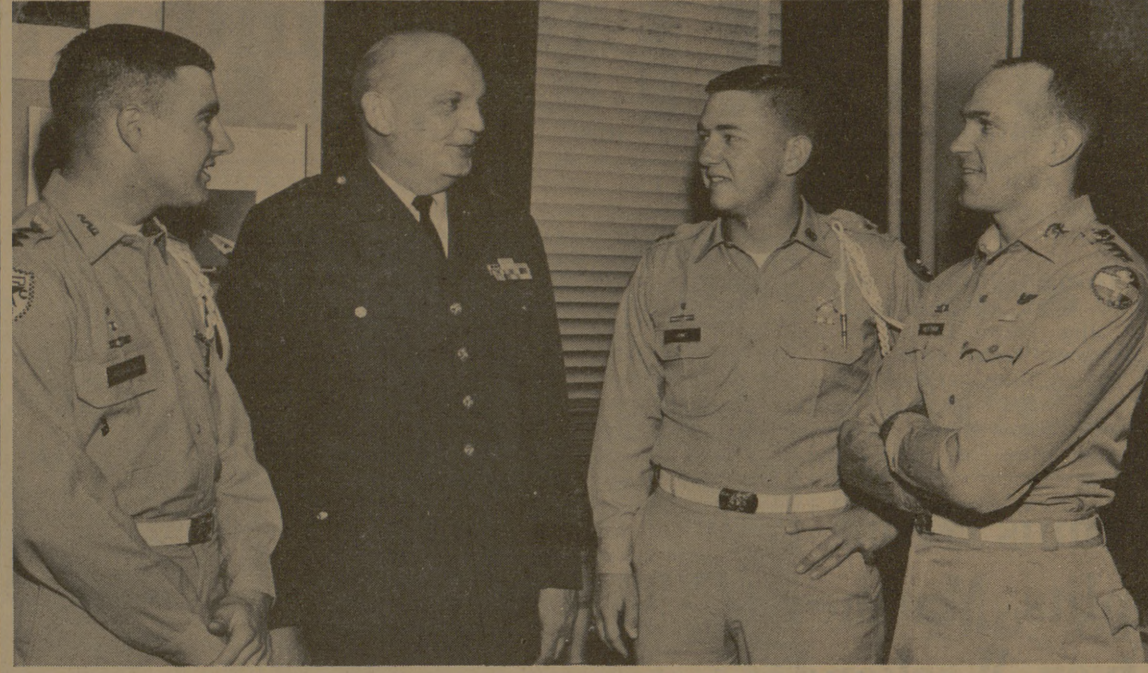

Fred J. Benson, dean of the College of Engineering, will make the presentation. The department received 286 points out of 300 possible by an anonymous judging team for overall effectiveness, student participation, visitor contact, enthusiasm, organization and housekeeping.

Electrical Engineering, the winner last year, placed second with 283 points, and Civil Engineering was third with 273 points.

MSC Officials To Attend Meet

Two officials of the Memorial Student Center will participate in the International Conference of the Association of College Unions April 4-7 in San Francisco.

J. Wayne Stark, director of the MSC, and William B. Lancaster, assistant director and business manager, will attend the conference.

Top Geologist Lecturing Here Until Friday

Dr. Enrico Marchesini, an Italian geologist from Florence, is presenting a series of lectures while on campus through Friday for his only visit in the Southwest. He is touring this nation, plus one Canadian university, under the American Geological Institute's visiting international scientist program.

Marchesini, the author of numerous publications in European and American journals, is a professor of geology at the University of Florence. He also has worked in Africa, Turkey and Europe for Italian and American oil firms.

Lectures are scheduled by Dr. Marchesini on Tuesday at 11 a.m., at the same hour on Thursday and at 10 a.m. Friday, geology department. Associate Professor Karl J. Koenig has announced.

"An Outline of North African Geological History and the Oil" was Monday's lecture topic.

A lecture primarily for graduate students is scheduled Tuesday. The title is "Some Structural Aspects of the Apennines," and it will be given in room 101 of the geology building.

"Structural Trends of the Northern Side of the African Shield" is the topic for Thursday. This lecture, to be heard in room 105 of the geology building, is designed for graduate and advanced undergraduate students.

Marchesini's final lecture will be given in room 105 of the geology building Friday. "Photogeology for Natural Steam Exploration" is the title.

The 53-year-old geologist is a graduate of the University of Bologna where he studied under Prof. M. Cortani.

In 1937-39 he did his first work in Africa, employed by an Italian oil firm in Somaliland and the Red Sea area.

He was named a geology professor at the University of Florence in 1942. In 1946 he taught at the University of Milan, and then became a geologist for Standard Oil Company of New Jersey and traveled extensively.

He returned to the faculty of the University of Florence in 1958.

Ambulance Driver School Simulates Auto Wrecks

The "victim" had a hearty laugh. He had good reason to be happy. The accident from which he had just been rescued was simulated, a fake.

His rescue from a car which apparently had been in a bad smashup was accomplished through efforts of students participating in a pilot school for ambulance drivers here.

The week-long school ended Friday, and the laughs stopped there. Probably the next accident the graduates see will be the real thing.

Charles Jackson of Corpus Christi, one of the field supervisors, urged students to take their time in inspecting the situation, emphasizing the axiom of "Haste makes waste."

"Sometimes rescuers compound injuries to victims by not sizing up the situation before going into action," he said.

Another instructor urged rescuers of trapped wreck victims to keep calm and make every move count. "Use good common sense and have a good reason for what you do," he commented.

Capt. Jeff Budjenska of the Richardson Fire Department reminded the students, "Do-gooders will get you killed. People want to help in rescuing victims, but they are over-anxious much of the time. When you have a victim trapped in a car on its side you need one man in the car and one man directing operations outside the car."

"The outside man has the responsibility of keeping people a safe distance away from the car. It could turn over and there is always the danger of fire starting because of spilled gasoline. You have to constantly remind people not to smoke," Budjenska continued.

Instructors emphasized the smallest details which might help rescuers and victims of future accidents.

For instance, William R. Willis, supervisor of fire and safety of the Board for Texas State Hospitals and Special Schools, watched three groups work to free a man whose leg was jammed under the steering wheel in a wreck.

Then he commented, "You all did a good job, but nobody checked to see if you could operate the lever which allows the front seat to be pushed back. That's a small detail, but it might have allowed you more room to work, and you might

have been able to free the victim more easily."

Demonstrations were set up with wrecked cars in all sorts of situations. Some were bottomsides up, others on their side or in a ditch. Still others were theoretically against a power pole or the wall of a building.

During one of the practice periods, several students from A&M Consolidated High School served as volunteer victims. They were "made up" with various types of injuries and burns before being placed in simulated wrecks.

Rescue teams practiced administering first aid to the "victims", then removed them from the wreckage and placed them in waiting ambulances.

The course was endorsed by medical, police and fire organizations throughout the state. Texas Engineering Extension Service officials are hoping to stimulate sufficient interest to teach the course annually. The course was directed by the Firemen's Training School of TEES.

Pre-Med, Pre-Dent Students Honored For Achievements

Three seniors with excellent academic records and a varied list of other campus achievements have been honored by the Pre-medical-Pre-dental Society and the Faculty Advisory Committee.

Dean Frank W. R. Hubert of the College of Arts and Sciences presented awards to the outstanding students at the society's spring banquet. Honored were Andras J. Csagoly, a pre-dental student, from Wichita Falls; James Andy Sullivan, pre-medical student whose parents now reside in St. Charles, Mo., and John S. Ballard III, a pre-medical student from San Antonio.

Two awards were presented to Csagoly, who with his parents fled their native Hungary after the Hungarian Revolt of 1956. He was honored by the Pre-medical-Pre-dental Society as the outstanding pre-dental student society member. The Advisory Committee also presented its Certificate of Merit to him as the outstanding pre-dental student in the university.

Csagoly commands the Sixth Battalion Staff as a lieutenant colonel in the Corps of Cadets and has received various cadet honors. He has a solid "B" average in academic subjects. The senior graduated from Wichita Falls High School. His parents are Mr. and Mrs. Tibor Csagoly, 3310 Kemp, Wichita Falls.

Sullivan, the son of Mr. and Mrs. A. J. Sullivan, 546 Glenco St., St. Charles, Mo., also received two honors. He was presented the society's award to the outstanding pre-medical student member and the Advisory Committee Certificate of Merit as a pre-medical student.

Sullivan was president of Phi Eta Sigma, freshman honor society, and also was chosen as the outstanding freshman member of the Corps of Cadets. He has achieved nearly an "A" record academically. Sullivan plans to attend the College of Medicine at Washington University in St. Louis.
