Celebration begins 'Centennial Year'

A proclamation address by Texas Gov. Dolph Briscoe concluded yesterday's events that began A&M's Centennial

celebration.
After the unveiling of a special Centennial sculpture yesterday morning, University President Jack K. Williams hosted a luncheon for special guests, including Briscoe, his wife; members of the Board of Regents, distinguished alumni and members of the A&M Student Government.

The Aggie Concert Band began the af-

ternoon's events by a performance.
Col. Logan E. Weston, coordinator of the Student "Y" Association, gave the invocation at the 2 p.m. ceremony beginning

remarks were then delivered by representatives of the students, faculty, alumni, and

administration. Jeff Dunn, student body president, said he believes the second hundred years of A&M can only prosper with an attitude of constant re-examination of goals and purposes. He said the awareness and constantly changing needs of the student body

is the key to a successful future.

Dr. Betty Unterberger, vice-chairman of the academic council of A&M and representing the faculty, gave a history of A&M going as far back as the first registration day. She said there is a quality about the faculty at A&M that cannot be measured in numbers: a quality that expresses itself best in terms of commitment, dedication and

responsibility.

Mayo J. Thompson, president of the Asociation of Former Students, spoke on behalf of the alumni. He said that America and democracy are declining, but with faith and self-confidence as the Aggies have, the

system can be renewed.

Representing the administration, Clyde H. Wells, chairman of the Board of Regents, said he is pleased and amazed at the progress of Texas A&M. He rededicated the Board to insuring that A&M continues

to be a place where "good things happen." Briscoe concluded the program by declaring A&M to be one of the great universities in the country. "I want to emphasize how proud I am of this institution's magnificent contribution to the growth and development to a better way of life in the

Lone Star State."
He said A&M has a spirit unmatched by any other university in the United States and that "we should reaffirm that spirit of Aggieland for our Centennial Year." He concluded his presentation by proclaiming the calendar year of 1976 the year of the Texas A&M Centennial.

Briscoe commends Aggie public spirit

Gov. Dolph Briscoe paid tribute in his Proclamation address yesterday to the public-spiritedness of Aggies who are "con-

cerned about the American way of life."
"Texas A&M has demonstrated remarkably sound judgement in that the good order of this institution has never been interrupted," the visiting Governor told the near capacity Rudder Auditorium crowd.

"Never have students on their way to and from their classrooms, laboratories or dor-mitories ever had to dodge a rock-thrower or a bomb-thrower.

"The people of Texas are proud of the record you have set and proud of the courage there is here in Aggieland," Briscoe And we are proud of this capitalistic

system that has built the finest quality of life to be found in the history of the world. And we will do our part to insure that this

system continues."
The speech by Mayo J. Thompson, president of the Former Students Association, was more pessimistic in tone.

"It is with pride and gratification to note that A&M is doing very well and that the Association of Former Students is doing very well. Unfortunately, America is not doing very well," Thompson told the Ground Hog day gathering.

"We now find ourselves face to face with a resolute enemy from outside our borders. One who, like the barbarians at the gates of Rome, still has the fire in his belly. His name is socialism. He is the new barbarism of the civilized world," Thompson warned his audience.
"What is most important now is that

A&M men and women everywhere renew their faith in America as we commence our next 100 years . . . Surely it can not be that all this was in vain — the human spirit, having been allowed a brief moment of

soaring ecstasy, is to be plunged back into the dark night of bondage and tyranny. "All we need is faith in America . . . faith in divine providence It will be in the highest and best tradition of Texas A&M," Thompson concluded.

Phase I to be completed by end of '76

County Park to cover 50 acres

By JOE SCAMARDO

By the end of the year area residents should be strolling the nature trails of the long-awaited Brazos County Park.

The proposed 50-acre park will be located east of the State Highway 6 bypass and south of the proposed Briarcrest Drive extension, about three miles east of Bryan. This site was chosen because it is acces-

sible to all income groups, both urban and rural," said Susan Frisbie of South/West Planning Associates Inc., the planning firm for the park.

When completed, the \$450,000 park will contain facilities for outdoor recreation and entertainment, plus a \$1.2 million exhibition hall, said County Judge W. R. (Bill)

The construction of the park has been divided into two phases. Phase one will consist of a paved access road, small and large group picnic facilities with barbeque pits, restrooms, and parking for these facilities. Judge Vance estimates this phase will be completed by the end of this year. Area Jaycees have already cleared nature

trails in the park. Carter Creek also winds through the site.

The second phase will include the instal-lation of water service and lighting in the park, construction of an outdoor amphitheatre, additional parking, and land-scaping. Judge Vance estimates the second

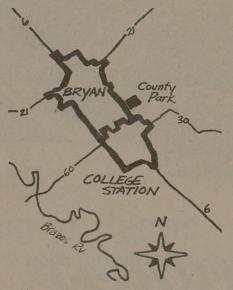

phase will be finished by late 1977.

The county received \$20,000 last year from the U. S. Department of Housing and Urban Development (HUD) for the first phase of construction. Brazos County added \$20,000 and has applied to the Texas Parks and Wildlife's Bureau of Outdoor Recreation (BOR) for a matching \$40,000. This application will be taken up in a public hearing by the Texas Parks and Wildlife Commission in March.

The county submitted a pre-application for \$188,000 to HUD Thursday for the second phase of the county park. If the pre application is judged satisfactory, HUD will invite a final application from the

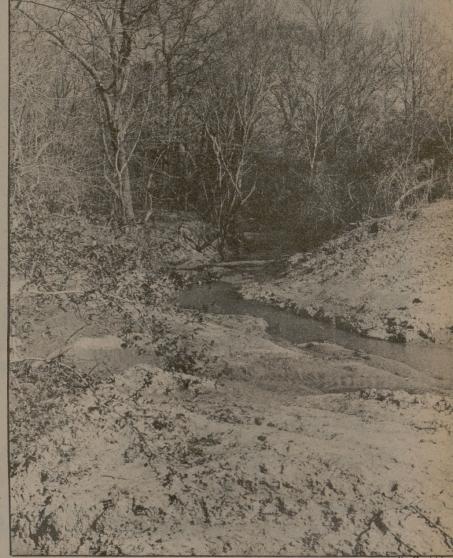

Located within the park will be the Regional Multi-Use Facility, a 30,000square-foot exhibition hall. The county opes to finance its construction with a \$600,000 surplus from the county budget and a matching fund from the Federal Economic Development Administration

The multi-use facility was originally planned to be used for art and craft shows, regional and county exhibitions, people's festivals, rodeos and animal shows. However, the application submitted to the EDA on Jan. 16 does not include a removeable floor for the dirt arena which is necessary to accommodate the rodeos and large animal

e council was to discuss a list of objecsubmitted yesterday by College Stacity officials concerning Bryan's produtility contract with College Station. College Station has purchased electricwater and some sewer service from a for more than a decade.) ollege Station councilmen voted

rsday to reject the proposed contract gave Bryan officials 14 days to submit a proposal containing competitive rates

ryan Mayor Lloyd Joyce said he felt a lest for a joint council meeting with Col-Station will be the outcome of Bryan's ers The College Station City Council and its

ity Rate Advisory Committee drew up list of objections Friday explaining tly what the city officials do not like out the proposed contract. he primary objection is the rate strucre than 30 per cent over the present

itself. Electrical rates would be hiked rim rate schedule adopted last August. The difference in the Bryan rates and ose proposed by Gulf States Utilities, an uside firm, is indicated by a representate bill for the month of December, 1975, lculated by North Bardell, College Stacity manager

or 3,400 kilowatt-hours of electricity, luding fuel adjustments, a resident of dwell (served by Gulf States) would have 1859, while under Bryan's current rates, cost would have been \$98, a difference 60 per cent, Bardell said. Water costs would be raised from 38.5

ts per 1,000 gallons to 47 cents per 1,000 ns, an increase of 22 per cent. Bryan zens pay 42 cents per 1,000 gallons. College Station councilmen also contend under the present and proposed concts College Station is partially supporting van's administrative, billing and distribucosts. In addition, College Station pays its own administrative and distribution

Another objection mentioned was the use that provides for a five-year contract h automatic one-year extensions.

ouncilmen also objected to the stipulathat termination of one utility service ald automatically cancel the other seres. The council said it would rather have e separate contracts for water, electric-

Mayor Joyce said yesterday, "The Bryan group considers this contract as one package — water, electricity and sewer service. We're trying to tie our water and electricity

Joyce said this is not a threatening gesture. "We're not trying to hold this over College Station's head and say, 'If you don't buy our electricity, you don't get our water.' But our approach is that these things are

Councilmen also objected to a clause requiring that College Station buy at least 80 per cent of its water needs from Bryan.

Joyce said yesterday, "We hope not to lose College Station's business. We've made plans through the power pool to pro-vide adequate power for Bryan and College Station's growth. But if we can't trade, I hope we can part in a friendly manner.

Most of the College Station councilmen have stated they feel a split between the two cities is inevitable because of the wide difference in prices asked by each city.

Larry Bravenec, College Station councilman, said yesterday, "There is probably going to be a parting, and I'd like it to be an amiable one - without rancor or bitter-

Mayor Joyce said he questions whether College Station can make a switch to another power source overnight.

The Gulf States' offer to College Station is a standard rate for municipalities and includes the transmission of the power to College Station, said Bravenec. He said that if College Station provides their own power substations, Gulf States would give a five per cent reduction of their quoted

College Station City Manager North Bardell said it is the feeling of the city staff and Gulf States' engineers that the power connection could be made in a three-month

College Station has been in contact with a private firm which has been conducting tests of several water wells southwest of the

The tests have shown the water to be potable, with the wells having the ability to produce up to 2,000 gallons of water per minute. When added to the amount College Station gets from its own well and from Texas A&M, this would provide more than 50 per cent of the city's current water needs, Bardell has estimated.
