

If you accidentally
got pregnant,
could you still make
it to graduation?

Depo-Provera is 99.7% effective
in preventing unwanted pregnancies.

If you're not ready, you're not ready. That's why more women than ever are choosing *Depo-Provera*. You need just one shot on time every 3 months to stay pregnancy-protected. So you can focus on Chemistry not maternity.

Depo-Provera doesn't protect you from HIV/AIDS or other sexually transmitted diseases.

Some women using *Depo-Provera* experience side effects. The most common are irregular periods or spotting. Many women stop having periods altogether after a few months and some

may experience a slight weight gain. You shouldn't use *Depo-Provera* if you could be pregnant, if you have had any unexplained periods, or if you have a history of breast cancer, blood clots, stroke, or liver disease. When using *Depo-Provera*, there may be a possible decrease in bone density.

If you're not ready to get pregnant, be ready with effective birth control: *Depo-Provera*. Ask your health care professional if prescription *Depo-Provera* is right for you.
