HARK, THE REVEILLE

Beginning today The Reveille appears as the successor to The Daily Bulletin as the official newspaper of the Agricultural and Mechanical College of Texas. The new publication is much larger than the old one, the hope being to thus more adequately meet the increased demands incident to the rapid expansion of the College in every way.

The Reveille enjoys at least one distinction in the ranks of American college journalism in that it is the only newspaper in this country published exclusively by the College authorities and distributed without cost to students, instructors and Campus residents. It is the hope of the management to make the new paper worthy of some distinction, also, because of the character of service it renders its readers, but to make this possible there must be the fullest co-operation on the part of the readers with the editor for it is impossible for one man to know of everything that is transpiring on the Campus and attend to his other duties as well. More space for the handling of news items is now available and the usefulness and interest of the publication will be in proportion to the information and suggestions with which the paper is provided from its friends.

CASES OF CONTINUED ILLNESS TO COME HOME

Any man in the A.E.F. who is sick for more than four months or who, having been wounded, will have to have surgical attention for more than four months, will be sent to the United States, advises The Stars and Stripes, the official publication of the American Expeditionary Forces.

That is the recent decision reached by the Chief Surgeon of the A.E.F. So much more hospital space can be afforded in the United States for lingering cases than in France that it

has been decided to send such cases home for treatment there.

Men having been in the hospital for more than four months will not, except in rare cases, be sent to France. They will be used for work at home which will release other men of sound physique.

No man will hereafter be discharged from the army until everything possible has been done to put him back into the best physical condition. Even after the war, men whom it will be necessary to retain in the hospitals for some time will not be discharged until everything possible has been done for them that can be accomplished by the medical and surgical authorities supervising their cases.

CANDY RATION IS INCREASED

(From Stars and Stripes)

Every soldier in the A.E.F. will receive one-half pound of candy every ten days as a part of his ration, under the new ration system drawn up by the Q.M.C. and now awaiting ratification of G.H.Q.

The candy ration will include chocolates and hard candies of pure sugar. The candy is now being made in factories in France by the Q.M.C.

The new ration system, prepared after months of co-operation between the Q.M.C. and the Food and Nutrition Bureau of the Chief Surgeon's office, contains many other changes which directly affect every American soldier in France. Following are some of them:

Syrup is withdrawn as a regular component of the ration, and will be largely replaced by prunes, figs, apples, other dried fruits and jams. Syrup will still be issued, but only on the same terms as its substitutes.

Beans Four Days in Ten

The bean allowance is increased to four ounces per ration, with issue limited to four days in ten.

Cheese is provided for issue with macaroni. It will be issued as a substitute for fresh beef, but will not exceed 10 per cent of the beef allowance.

Boneless beef, bacon, fresh pork, canned or Vienna sausages, canned and dried fish are also made substitutes for the fresh beef ration of 20 ounces.

The milk allowance is increased from one-half ounce to one ounce.

Soluble coffee and soup cubes with solidified alcohol to heat them are provided for troops in the front line trenches. The coffee issue for these troops will be one-third more than for
