

while his features are much softened by the Southern sun, retains much of the grim white hoary aspect attributed to him by Longfellow. While his encroachments upon the dominion of Spring tempts him as a whole, yet the friction of opposition irritates him into sudden bursts of great severity. Today the sun is shining brightly, making the uninitiated think that he has at last found the land of perpetual spring. In a few hours a great blue hazy billow is seen to rise slowly along the northern horizon, and anon a gale bursts upon you, howling and whistling over the bleak, bare prairies, and you are in the midst of a real "Texas Norther." For a day or so it rages, chilling the land both far and near, then it gradually abates, until old Sol breaks forth, stripping this fair land of her icy mantle, and before many hours you will be led to exclaim, "Do they have any winter in Texas?"
