

there is neither an agricultural nor horticultural building illustrated in it, for no such buildings exist, nor have they ever existed. Colorado contains less than half the area of Texas, less than one-tenth the area of arable land of Texas. The faculty of the Colorado college contains thirteen names; that of the great state of Texas, nine. Total of professors and assistants, Colorado, thirty-one; Texas, twenty-one. Colorado pays in salaries \$62,829; Texas, \$39,570. Colorado's assessed values amount to \$187,000,000; Texas, \$885,000,000—more than four times as much. Colorado levies a tax of one-fifth of a mill per dollar for A. and M. College equipment—\$40,000 annually. Texas levies no tax for this purpose. A similar tax in Texas would produce \$177,000 annually. One-twentieth of a mill (or one-fourth the Colorado rate) would yield a larger sum than is yielded by the Colorado tax. The population of Colorado is less than 600,000; that of Texas is about five times as much. Texas, however, makes a better showing in this matter when compared with Colorado than when the comparison is made with almost any of the agricultural states.—Farm and Ranch.
