

position of Master Mechanic, which position he now holds. He was sent to Brooklyn and St. Louis during December and January to study the business more thoroughly. This concern employs about 350 people. Smith is to be congratulated on his rapid promotion to such responsible duties.

J. G. Kerr, '98, a graduate of the agricultural department, has recently been elected Assistant Professor of Agriculture to the Oklahoma A. and M. College at Stillwater. His duties are principally with the Experiment Station. We now have two graduates at the Oklahoma College Station—L. L. Lewis, '93, being professor of veterinary science there.

Many will be pained to learn of the death of Mrs. J. W. Carson, nee Estelle Wilson, at her home in Brazos County, near Pitts Bridge. She was a former resident of the Campus, Mr. Carson, having held the position of farm foreman for a number of years. While here she gained the friendship of all with whom she came in contact. She leaves a husband and three children, besides a host of friends to mourn her death.

During the month of February the Secretary of the Alumni Association, Prof. P. S. Tilson, will send out the annual statements of the financial standing of members with the Association. With this statement will be included matter that will no doubt be of interest to all ex-cadets whether they be numbered with the early matriculates or among the last. A copy of the above will gladly be furnished to any cadet or ex-cadet who may apply to the secretary. The secretary wishes all ex-cadets and cadets to aid him in securing the proper addresses and occupa-

tions of the graduates. If you know of any change in the address or occupation of any graduates since the last catalogue was printed tell the secretary about it. It is important that he should know this for two reasons: one is, that it is desirable to have the list complete for the catalogue; the second, is of a business nature. It sometimes happens that the college authorities are asked for just such information from large commercial firms or publishers of technical journals desiring professional assistance in various parts of the world. They are, of course referred to the catalogue. Such firms file the list sent them for reference. The value of this list depends upon its being thoroughly reliable. Do you see the point?

CLASS OF '99.

A. M. Sloss is ore clerk in El Paso.
