

could not eat anything for nearly a whole week. Sergt. Tanner can tell you the reason.

Prof. Chas. Puryear, professor of mathematics in the Agricultural and Mechanical College, takes the following high ground as to the position the college should occupy before the state. The extract we give below, is on the 'Relation of the A. and M. College to the Public Schools of the State,' before a teachers' meeting in Bryan, March 17, 1900. In speaking of the importance of the technical work that belongs to the A. and M. College, he says:

"But a college doing work of this technical character, necessarily has the opportunity to teach not only by precept, but also by example; to instruct not only its regularly matriculated students, but also all who visit the College, or receive its publications. Teaching practical science, its equipment should be the best obtainable; teaching agriculture, its own farming opera-

tions should be in accord with the best practice, founded on scientific principles. If the College undertakes to breed cattle it ought to be expected to produce at least once in a while a cow that gives in the neighborhood of twelve gallons of milk a day. If it operates its own waterworks, or light plant, these should be models of their kind, so that experts, even, from neighboring municipalities might take lessons in the application of science principles to practical affairs. Its roads and drives should furnish object lessons in the application of scientific principles to practical affairs. Its roads sanitary engineer. In all such matters the College should set up standards. In a word whenever it undertakes to apply the principles it teaches it should do so in such style as to exemplify, in the best possible manner, the advantages to be derived from a combination of scientific and practical knowledge. To fall short of this is, quoad hoc, to discredit the theory it stands for."

A good girl to have—Sal Vation.
 A disagreeable girl—Annie Mosity.
 A fighting girl—Hittie Maginne.
 A sweet girl—Carrie Mel.
 A seedy girl—Cora Ander.
 One of the best girls—Ella Gant.
 A muscular girl—Callie Stenics.
 A lively girl—Annie Mation.
 A warlike girl—Millie Tary.
 A profound girl—Mettie Physics.
 A smooth girl—Ameleo Ration.
 A geometrical girl—Pollie Gon.
 And one of the best girls of all.—Ura
 Own.—The Tack.

At 9 o'clock they sat like this—
 He was not long in learning;
 At 10 o'clock they sat like this—
 The gas was lower burning.
 Another hour they sat like this—
 Still I'd not venture whether
 At 12 o'clock they sat like this—
 All crowded together.

We had a dream the other night,
 When all around was still;
 We dreamed that each subscriber came
 Right up and paid his "Bill."

"Money is a thing of worth,
 To pay our bills we need it;
 If you owe us fifty cents,
 Oh, please read this and heed it."
