Number 32

OMMENCEMENT, what does it mean to the college graduate? To some it is the ending of four years spent in earnest preparations for life's work, finally to be rewarded with victory and distinction. For some it is the beginning of a life of efforts and failures, while yet to some it holds no other meaning other than the end of a college career spent in an idle waste of time, and money probably advanced by anxious parents who are in many cases sacrificing comforts at home in order that their boy might not be set adrift in life's torrent with no means whatever to support himself. For this last, we feel only a profound pity, and wonder that ingratitude to parents could be so manifest.

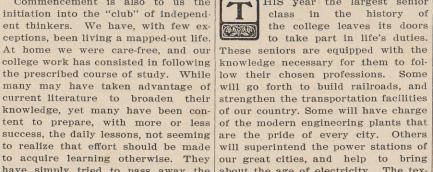

It is not meant to convey the impression that a college life has been devoid of pleasure to the successful graduate—far from it. The four years thus spent are to may the most enjoyable part of life next to that of boyhood at the parents' knee. Indeed, to many graduation brings only the beginning or a most bitter struggle.

Then, can we say that a college course is really worth while? Yes; for we venture that every alumnus, without exception, would testify to the fact that to this life at least is due the broader view of ilfe, which teaches us to take a more tolerant view of our fellow-man. It is a school of experience, which at last binds us into a botherhood that is becoming stronger and grander year by year. And the ties which bind the gradutes of a class are not to be classed as weaker than those that bind Masons, Odd Fellows, or any other fraternal order which has for its motto, "Brotherhood." Indeed, why should it not be so? Together as "fish" we stood the jokes and jolts of the upper classmen, when "college life" was to us only a name; when we were fresh from homes, where our wishes were law and the startling swish of belt leather was unknown. Together we rushed the "cane" through the amazed Sophomores, and our first victory was attained. We stood as one to lead our athletes on to victory. Day after day we were assembled together in the sectionrooms to "sink or swim," as our genuine knowledge or ability to dodge, directed. Together, through it all, we have shared our troubles and our triumphs, and, finally, those who have overcome all, who have fulfilled every requirement, stand together to begin of their training.

as comrades, as heretofore, each is than any class heretofore. happy in the thought that wherever

initiation into the "club" of independent thinkers. We have, with few exceptions, been living a mapped-out life. At home we were care-free, and our many may have taken advantage of current literature to broaden their knowledge, yet many have been content to prepare, with more or less success, the daily lessons, not seeming to realize that effort should be made to acquire learning otherwise. They have simply tried to pass away the about the age of electricity. The textime on the principal of least work. tile engineers will further the industry

Agricultural Seniors.

W. L. Heller-"Wheat, Its Improvement and Possible Adaptability to Tex-

H. H. Jobson and R. B. Neale-"Study of Cotton, Culture, Varieties and By-Products."

J. R. Lauderdale-"The Dairy Industry in Texas."

E. R. Robinson-"Corn, Its Culture, and a Study of Texas Varieties.'

Animal Husbandry Seniors.

W. G. North and R. W. Faust-"A Test of the Comparative Feeding Values of (1) Indian Corn, Kaffir Corn, Milo Maize and Blackstrap Molassas; (2) Cotton Seed Meal and Cotton Seed for Fattening Steers."

A. J. Smith and C. E. Jones-"A Test (1) to Determine the Comparative Feeding Values of Indian Corn, Spanish Peanuts and Blackstrap Molassas; (2) to Ascertain the Feeding Value of Skimmed Milk as an Addition to Straight Corn Ration for Fattening Hogs."

C. M. Evans-"Stock Raising in the South."

J. H. McLeod-"Swine Industry of Texas."

Veterinary Science Seniors.

H. Schmidt—"Comparative Anatomy of the Brain of the Horse and the Ox." Chemistry Seniors.

S. Lomanitz—"The Determination of Crude Fiber in Feeding Stuffs."

Horticultural Seniors.

T. E. McElroy and E. A. Miller-"Improvement of Our Native Pecan and Hickory by Grafting and Budding the Paper Shell Pecan on Them."

N. W. McGinnis-"Testing Different Methods of Planting Pecan Nuts and Transplanting Pecan and Hickory

Civil Engineering Seniors.

L. Adams and M. C. Spivey-"Triangulation and Stadia Survey of the Col-

lege Farm." V. Z. Beall and G. F. Moore-"Plans and Specifications for Pavement of College Roads."

T. S. Buchanan-"Design of a Railroad Bridge, Span 183 Feet 9 Inches."

A. L. Cornell and C. P. Wilson-'Plans and Specifications for a Street Car Line at Groesbeck, Texas.'

W. W. Washburn and J. B. Crockett -"Surveys and Estimates for the C. & W. Railway."

I. Dale—"Design of a Railroad Bridge, Span 189 Feet 6 Inches."

C. W. Homeyer-"Design of a Railroad Bridge, Span 189 Feet." L. R. Jones-"Design of a Railroad
