

Goodwin Hall.

The New Buildings

Some of the new buildings provided for by the last legislature are now nearing completion, while others, including the Engineering Building, will probably be built within the coming year.

The most notable addition to the campus at present is Goodwin Hall, a building of three stories and basement, on the west end of the drill ground. This is a dormitory of sixty-five rooms. It is designed to be heated with hot water, and is said to be built in accordance with the most modern ideas. The cost is \$50,000.00. It is named for a member of the Fourteenth Legislature, which made the first appropriation for A. & M.

A building which has been needed for a long time is the new Natatorium, situated back of the old "Nat," and north of the Textile Building. It is a roomy structure, built partly of brick, with the remaining portion of wood, covered with plaster. It will be heated by steam or hot water. A tunnel is now under construction for the various pipes. This tunnel will run under every shower, and will do away

with the necessity of tearing up the floor to fix the connections. There will be forty-two showers and the same number of dressing rooms. The stalls and the floor will be of marble.

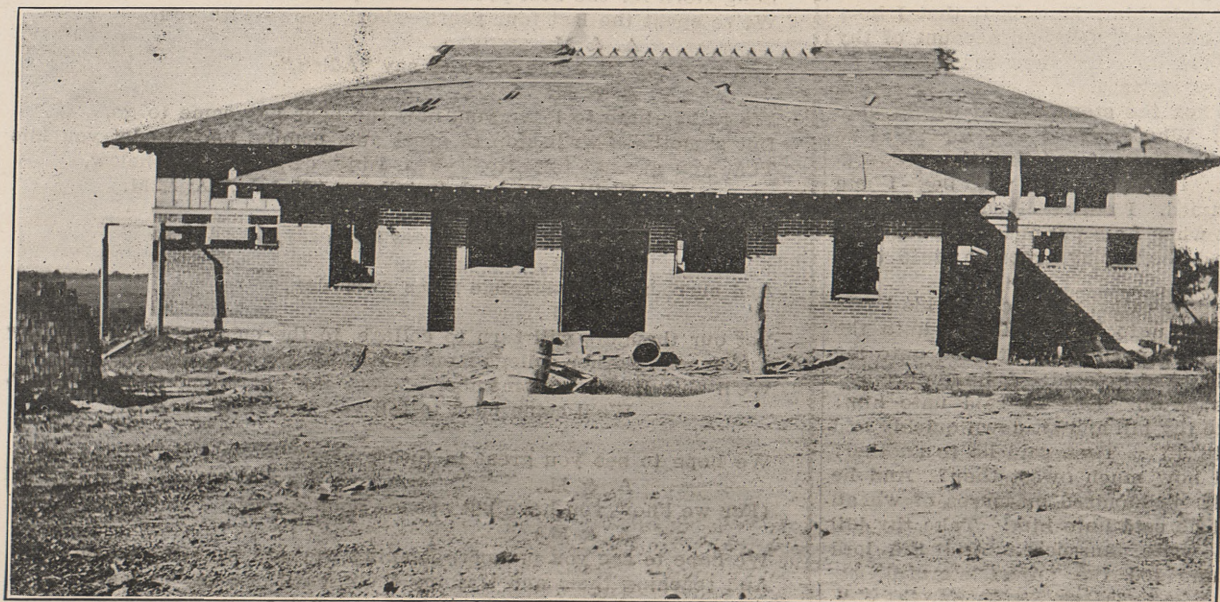

The Veterinary Hospital, built attractively of wood and plaster, is on the corner of the field, northwest of the mule barn. It is divided into box stalls and rooms, everything being arranged for the clinical treatment of horses and cattle. It is 135 feet long and 35 feet wide. There is a concrete floor throughout, and the whole structure is built in the most sanitary manner.

The large Farm Machinery Building is just back of the Chemical Building. Though a frame building, it is built for strength and durability. It will have place for the farm implements, which are loaned to the college, and there will also be a few section rooms.

Money will soon be available for several other new buildings, among them being the Engineering Building, which will cost \$80,000.00, and the Feed Control Building, the cost of which will be about \$100,000.00.

The graduating exercises of the Texas Woman's College at the First Baptist Church Wednesday morning were attended by a large audience of people whose interest and applause showed how well they appreciate the rare literary and musical treat. The program was as follows:

- Organ—The Brook Dethier Mrs. Robert Webb.
- Prayer Dr. G. B. Butler
- Piano duet—The Uhlans Bohm
- Miss Pauline Webb and Mr. W. Lay.
- Essay—Oliver Cromwell's Place in History Miss Ella Price.
- Essay—Comparison of the French Revolution and the Russian Revolution Miss Irma Harris
- Violin—Kiss of Spring Waltz Miss Gene Dennis
- Essay—The Larger Patriotism Miss Gertrude Eaves
- Essay—Sidney Lanier Miss Mabel Zimmermann
- Essay—Jane Addams Miss Gussie Buchanan
- Piano—Rhapsody No. 10 Miss Pauline Webb
- Commencement address Judge T. P. Buffington, Anderson
- Awarding of medals.
- Conferring of Diplomas.
- Organ—The Storm Lemmens Mrs. H. O. Boatwright.

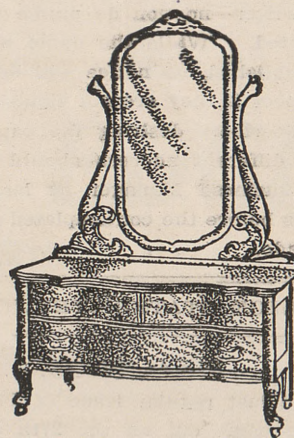

The New Natatorium.
