NUMBER 11

**SPRING FOOTBALL  
TRAINING UNDER WAY**

**Prospects for Winning Team  
Very Bright.**

With from thirty to forty men out every afternoon under the supervision of Coach Bible, football prospects for next year loom up brighter every day. Every letter man of this year's team, with the exception of those, is out, and from the way these men are hitting the ball in this preliminary practice it will take some mighty good men to keep them off the team next year. Every man of this year's team, excepting Elam and Walker, are expected to be in uniform next fall and in addition there are already on the campus such men as Higginbotham, all-Southwestern Half '17; Gouger, one of the fastest ends ever seen on an Aggie eleven; and Knickerbocker, an old Southwestern star. All of these men and a promising bunch of new material are receiving daily instruction from Mr. Bible, and the general coach expresses himself as being well pleased, especially with the work of some of the new men.

"Woodrow" Wilson and Mahan, both all-Southwestern players of '17, Wendi, Dinan and Marrah, linemen, have announced that they will be in school next fall. There is also a strong possibility that Rogers, Settegast, McMurrey, Garth, Griesenbeck and Joe Ellis may return to finish their education where it was broken off by the war. It may be stated, however, that no position on next year's team is "cinched" in any way and any new man has an equal chance with the older heads. A regular schedule is being arranged for the Scrubs and they will receive a recognition of their work as well as the regulars. Next year's schedule will include games with T. C. U., Baylor, S. M. U. and L. S. U. away from home and with Oklahoma A. and M., Southwestern and Texas U. at Kyle Field.

**THE FACULTY TEAM  
TRAMPLES THE CASUALS**

**The Game is Crowded With  
Novel Features.**

The curtain of the baseball season went down in grand style. There were styles of baseball displayed in the H-A and Casual Company-Faculty ball games which probably never were flung in the faces of the spectators before.

The Casual-Faculty game was just anybody's game until the final error had been made. After taking a number of herculean swings at the pill, Professor Stangel finally succeeded in connecting and smiting the ball clear out of the infield with a signaling grounder. Lieutenant Benton gave a most magnificent account of himself and knocked the ball harder and more times than any man on either team. Tubby Graves completely bewildered his opponents by the flashiness and quickness of his delivery from the mound. It was beyond the comprehension of the Casuals why a man should catch a bat by the wrong end. Various kinds of violence were resorted to by either side in endeavoring to reach a victorious decision. Catcher Munsch of the Casuals did a very cowardly thing by smiting a fleeing Professor running to first with all his strength right in the stern with the ball. But the superior playing of a few of the Professors carried their team through to a victory.

The feature of the A-H company game was the outstanding performances of the two running mates, Williamson and Hooper.

**MUSIC ONCE MORE.**

Really we didn't know how much we did enjoy music with our meals until the music stopped, due to having to move the piano to the chapel. But due to the perseverance of Col. Mueller we again have music with our meals. Hence, the matter is made all the more binding. The military department is to be especially bestowed with honors for purchasing an exclusive piano for our entertainment and the corps extends to Col. Mueller a vote of thanks for finding a way to purchase a piano.

**R. O. T. C. STUDENTS  
LEAVE JUNE 19TH**

**Nearly One Hundred Men is  
Expected to Go.**

All R. O. T. C. students who are to attend the summer training camp at Camp Taylor, Ky., will depart from College at noon, June 19th, according to information released recently by the Military Department of this institution. To date more cadets have signified their willingness to attend this camp than have been allowed the college by the war department but a telegram has been sent to Washington asking that our quota be extended to 100 men. In the event that this request is granted a few more applicants will be admitted to the camp. All students who intend to join the R. O. T. C. should attend this camp in order that they will not have to attend a camp after graduation. Transportation to the camp will be furnished to all before leaving college and uniforms and all equipment will be issued immediately after arrival at Camp Taylor.

**REV. H. W. KNICKER-  
BOCKER VISITS COLLEGE**

It was again the pleasure of the student body to hear Rev. H. W. Knickerbocker of the First Methodist church of Marlin on last Sunday. Rev. Knickerbocker chose as a theme "The Power and Beauty of Holiness" and it may be said that few men are capable of delivering such a well expressed and straightforward message as Mr. Knickerbocker delivered to us. The student body is always glad and ready to have such men as their guests and we hope it will not be long before Rev. Knickerbocker will be with us again, as he always has a standing welcome here.

**THE REVISED CUR-  
RICULA FOR 1919-20**

**The Entrance Requirements  
are Raised by Faculty.**

By Charles E. Friley.

As one of the beneficial effects of the war from the standpoint of higher education, the colleges of the country have been taking a careful and serious self-survey, in order to correct existing defects and place their work on a par with the world's progress. This has been done in every phase of our modern life. The colleges realize that their work must be broadened, and made more of a national affair, if they are to keep the esteem and confidence of the American people, which they won so heartily during the war.

In line with this process of readjustment, and as a part of a comprehensive plan to extend all the facilities of the institution to the people of Texas in the largest and most efficient manner, the faculty of the A. and M. College of Texas has devoted several months to a careful revision of the courses of study. The revised curricula have been made public for the information and guidance of the students of the College and a great many improvements may be noted over those published in the forty-second catalogue. A few words in explanation of some of the changes which have been made may be helpful to the student body.

In the first place it should be stated that the revised curricula entirely supersede the curricula of the forty-second catalogue. Students who have completed the work of a certain year will not be required to go back and pick up a course which has been added or substituted in that year. For example—Cotton Cladding has been substituted for Physics in the Freshman year of the Agricultural Course. Students who have completed all the Freshman Agricultural work prescribed for 1917-18 will not be required to make up the new course in Cotton Cladding. The same principle applies to all other classes and courses.

In the Freshman and Sophomore years of the Course in Agriculture more emphasis has been placed on the sciences underlying the general field of agriculture. At the same time
