

## AMONG THE COMPANIES

### CO. "I" 14—CO. "B" SIGNAL CORPS 3.

On Monday, November 23, Co "I" won its second victory in basketball over Co "B" Signal Corps. The Co "I" team still showed lack of practice and team work, but the ability of the individual players gave them the big end of the score. Co "B" Signal Corps played well as a team but they could put nothing over "I's" guards.

Monday's game eliminated Co "B" Signal Corps from the contest and gave Co "I" a good chance for the inter-company championship. Mayfields guarding was the feature of the game. The line-up was as follows:

Co. "I": Mitchell and Kohler, forwards, Stoner and Mayfield guards, Dinwiddie center.

Co. "B" Signal Corps: Amber and Beck forwards, Vinther and Adams guards, Wyatt, center.

Yes, Battery A lost her first football game, but her team is now singing "The Worst is Yet to Come" to all fish teams. That includes Company E also.

Fish Garrett of Battery A has been out of his head recently. It seems that he met a girl from Baylor-Belton in Waco, whose love seems to have gone to his head instead of to his heart.

Why is that all envy Battery "A" and their guidon?

led his eyes when he gazed upon his old organization during his attendance at the game Thursday.

"Rosy" Taylor, "Rat" Runge, and Womack were among the old C, Infantry, men who returned for the Thanksgiving celebrations.

Company B, Signal Corps won one and lost one basketball game. We will admit that I Co, has a good team and if it doesn't win the company championship we'll be fooled. They have played the best game we have seen.

Ask "Doc" Garrity where he got 99% of his fish for his helpers in decorating the military walk. He'll say—from B, Signal Corps.

The only and original Pb. A. Club has been formed over on the third stoop of Mitchell. So far Q. B. Schafer is the president, promoter, secretary and members.

Company B. of the Signal Corps is glad that it has one officer immune to the lures of the ladies.

Cox and Harkrider went to Ft. Worth to spend the holidays. More ladies!

Company B, Signal Corps is out for the inter-company football trophy. While not a scrub or squad man is in the company we know we're going to make it hot for somebody.

Lee Hugon has been very much griped because a fish beat him out of his girl for the "Hop."

There are rumors current that Signal Corps fish had a great deal to do with the 7-0 flag on the Mess Hall.

in favor of Co. A, S. C. We were very much disappointed to be unable to battle the G. Company, Infantry, for we intended to get a better score than was given us. The team was also anxious to get into action, and show some of their ability.

Rare remarks heard on the drill during radio practice: Sergeant Collier explaining some of the radio sets: "The use of this set is to send for short distances only. This little do-hickey is connected to the receiving set, and when a message is sent this do-floppy starts to jiggle up and down and causing the message to be audible to the person receiving."

We wonder if any of the audience will know how to do it by themselves the next time. They all took it in, or took it for granted that it was true.

The Fish of the Signal Corps have held two meetings to decide who should be elected President of the Fish Class. They should decide to elect a Signal Corps Fish. We hope that they will succeed.

The other Saturday night a very melodious strain was floating thru the floors of Mitchell Hall. After an investigation it was found that Perdue was being entertained by a couple of Fish. The entertainment had all the originality of a ten cent show, although that the fair sex was missing. Nevertheless they enjoyed it, because it continued into the wee hours of midnight, and they weren't convinced that it was over until W. T. Burns came in and told them that taps had blown.

Gardner took charge of the letter. What we the members of Co. G wish to know is why Mr. Gardner writes letters to "Blonde" under an assumed name.

The side line of Battery B is the straightest line you ever seen. From captains to privates, they act as one man and only ex-soldiers can understand. With such experienced and trained men, they could chase the Kaiser from his den. Lt. Barnes deserves much credit, whose semi-weekly efforts helped make it. His clean cut ways and sharp commands, pierce each heart of his Battery and they understand. To obey is the law of the nations and it has been known since creation that clean moral and spiritual thought is something that cannot be bought. Each and every man of Battery B has this reputation it seems to me. So Battery B we salute you. And when this year's term is through we know who will be ahead in line. For a better unit is hard to find.

Watch Battery B Thursday.

Battery B has taken a long step forward in basketball for she comes out with the big end of the score every time. Every company is wondering where the sweaters are going. Just watch Battery B and find out. We've got a hard playing team, one that will put forth all they have in clean sportsmanship and judging by past performances, we should be able to bring home the bacon.

Who heads the list for efficiency? Artillery of course. That is not all. The batteries have not been graded on Artillery drill. When Col. Muller takes the gun squad drill and equitation into consideration the artillery will be in a class by itself. But just by way of comparison it might be interesting to the Signal Corps and Infantry to know that the Artillery has won seven out of the first eight lines when the Corps has passed in review. Of these seven, Battery B has won six and Battery A one. Ask Colonel Muller—he knows. By the way, Colonel, a Signal Corps man said it didn't take brains to pass in review with a straight line. Perhaps so, but what does it take to get beat 20 to 13.

And Company C is only beginning. The reward of such recognized efficiency will be repaid in the future and the company stands untied in its efforts to maintain such standards and improve upon their own record. The highest spirit, morale, and pep—that is our goal.

The Seniors of Company C, Infantry, scored on e of the highest averages of grades in Military Science. Lieutenant A. B. Smith making the highest grade of any Infantry cadet officer.

In gallery practice Company C, Infantry, averages higher than any other organization according to a statement by Colonel Muller in the Daily Bulletin.

## A Gateway—Electrical

ONLY a forty-foot gateway bounded by two brick pilasters and ornamental lamps, but unlike any other gateway in the entire world.

For back of it is the General Electric Company's main office building, accommodating 2300 employees. And just next door is its laboratory with the best equipment for testing, standardizing and research at the command of capable engineers. Then down the street—a mile long—are other buildings where everything electrical, from the smallest lamp socket to the huge turbines for electrically propelled battleships, is made

by the 20,000 electrical workers who daily stream through.

What a story this gate would tell, if it could, of the leaders of the electrical industry and business, of ambassadors from other institutions and from foreign lands.

The story would be the history of electric lighting, electric transportation, electric industries and electricity in the home.

This gateway, as well as the research, engineering, manufacturing and commercial resources back of it, is open to all who are working for the betterment of the electrical industry.

*Illustrated bulletin, Y-863, describing the company's several plants, will be mailed upon request. Address General Electric Company, Desk 43, Schenectady, New York*
