

THE COLLEGE FRESHMAN

(Continued from Page 1)

the College authorities, I am glad to say that the institution has been proud of its present Freshman Class. You have entered the institution with a better general preparation than any class that has preceded you. Most of you have come with ambition and determination to make the most of your College career. Your standards of conduct, your obedience to constituted authority and College regulations have been a matter of comment throughout the year. This record gives promise of future years of unusual achievement and satisfaction.

Every possible effort should be made by the Freshman Class to maintain its number throughout the College course. The losses in the number of students from each class in previous years have been too large. Only a small percentage of those who entered the Freshman Class have continued through to the end of the Senior year. The present Freshman Class should attempt to develop pride in the size of its membership and the relatively small decrease in its numbers through succeeding years. Let every member of the Freshman Class resolve to return to school next September and urge every other member to do the same.

But the pride of the class in numbers should be far exceeded by its pride in standards of scholarship and moral conduct. No class can achieve greatness merely through the number included in its membership. Quality always counts for more than quantity. The class, therefore, should lay stress on the percentage of its membership which take rank as distinguished students. Pride should be taken in the number who go through the four years of College without receiving a demerit. The record for military proficiency and class honors received should be matters of interest and concern.

Finally, I wish to congratulate you on the record you have made for your first year, and to express my personal appreciation for the loyalty you have already displayed for your College. I hope not one of you has had any cause to regret his choice of the College as the institution where he is to receive his collegiate training. It is my hope that your summer may be pleasantly spent and that you may return to College next year eager to resume your work and ambitious to make your Sophomore year one of great profit and happiness.

KEEN INTEREST HAS BEEN DEVELOPED IN FRESHMAN STOCK JUDGING CONTEST

(Continued from Page 1)

in the United States and Canada, as the trophy, which is a bronze bull, has been won only once by any other team. The A. H. students begin in their freshman year to work for a place on this team, and it has usually been the case that men making a place on the freshman team have stood a good chance of making the international team in their senior year. So it may be expected that some of the men in this year's contest will be on the senior team in the fall of 1922.

Below is a list of the men who have won a place in the contest. They are arranged according to sections. Six of these men will compose the

Freshman Stock Judging Team, and these six men will be awarded medals. These medals are coveted prizes, and each of the following students is working hard to win one of them:

Section 1.

Frerichs, W.
Ratliff, T. P.

CHAMPIONS NAMED SATURDAY

(Continued from Page 1)

her credit for the Southwestern honors.

Under the standing conditions it is possible for a team to finish with 1000 per cent in the Southwestern Conference and not really represent the best team in the State. Teams like Oklahoma A. and M., University of Arkansas, or Phillips University, might take the Southwestern championship and actually win only two of three Southwestern games.

Thus the importance of A. and M.'s standing in the lead for State honors can be appreciated.

Below is a record of individual honors of all members of the A. and M. baseball squad who have participated in as many as three full games. Capt. Lewis is leading with a batting average of .428 per cent.

The record follows:

Name	G.	A.	B.	R.	H.	E.	Av.
Lewis	18	70	23	30	10		.428
Matthews	18	67	16	24	4		.358
Alexander	12	38	6	12	0		.316

MILITARY QUESTION

Soph: I asked May for just one little kiss.

Fish: What did you want to do? Get the range?

EASY TO GET

Soph: "What's the difference between capital and labor?"

Fish: "If I had to work and turn three-fourths of my wages over to you, that would be labor."

Soph: "Yes?"

Fish: "On the other hand, if you had to work and turn three-fourths of your wages over to me, that would be capital."
