

## NEW BUILDINGS NEXT BIENNIUM COST \$315,000

(Continued from Page 1)

States. It will be a modern office structure with all conveniences. Its form will be of two sides of a rectangle. It will be built on the corner lot just west of the Research Administration building facing on the street leading west from the entrance to the Research Administration building and also on the street leading south on the east of Guion Hall. The main entrance will be at the corner of this lot. It will be three stories.

Present plans for the hotel building which is to be located on the lot west of the Mess Hall, contemplate that room shall be provided for transients, also for some of the mature students and that the lower floor shall be occupied by the barber shop, confectionery and possibly a drug store. First consideration of plans included the Exchange Store in the building, but it is thought now that a separate building will be provided for the Exchange Store.

### New Assembly Hall.

In place of the old dilapidated airdome for assemblies the student body will have the advantage of a beautiful, comfortable and convenient building erected on the same space in the cedar grove west of Mitchell hall next year. It will be a frame building with stucco exterior finish and Spanish architecture with a spacious veranda on two sides. It will seat 2100 on lower floor and balconies. The main floor will be unobstructed with pillars or other obstacles to vision from seat to stage and the balconies will be on three sides on the same plan as Guion Hall. Exterior dimensions of the building will be 92x116 feet. The stage will be fitted for all the dramatic performances and other activities including picture shows. The building will be steam heated. President Bizzell has already banned the use of the name "Airdome" and has substituted the name "Assembly Hall" to be applied to the new building.

The new dairy building is similar in plan to the Animal Husbandry building and will be known as the Dairy Building. It is being built of hollow tile with brick veneer. It is of triangular form 48x109 with porticos on the north and south ends. Instead of a circular arena there will be two straight driveways through the building intersecting at the center and the seats will be in four sections in parallel tiers. It is expected that eventually all the executive offices of the Dairy Husbandry department will be in the new building. The creamery will be moved from the old agricultural building to the new dairy building as soon as construction is complete. There will also be laboratories and classrooms and a dairy lunch counter will be operated in one room.

Completion of the new greenhouse which has been the hope of August Tomsen for many years will permit of the removal of all the unsightly buildings along the street east of Gathright hall and it will also give greater opportunity to Mr. Tomsen in his work of providing ornamental plants for outside beds and interior decoration.

Gathright hall will provide about 35 rooms for students and it is planned to fit up several more rooms in the old hospital building which has been used the past few years as a dormitory for short course students. These rooms are expected to accom-

modate the student body again next year. Negotiations are now being carried on to exchange the old tents for new ones.

### Plenty of Water.

Shortage of water will be a thing of history when the new well is completed. The contract has been let to Layne and Bowlen of Houston and calls for the completion of a well that will supply 450,000 gallons every twenty-four hours by January 1. There is a penalty of \$10 a day for every day of delay. The new well will supply half the demands of the College and the others will be taxed to only half their former capacity, giving a sufficient reserve.

All work is being rushed by W. W. Kraft, superintendent of Buildings and Grounds and it is expected that the Assembly hall, Gathright hall and the Dairy building will be completed and made ready for occupancy by the opening day of school.

### SGT. SMART LEAVES EMPLOY OF COLLEGE

Sergeant George Smart for many years one of the main cogs in the Commandant's office, has severed his connection with the College and returned to his old home at 92 Western Avenue, Waterville, Maine. Letters from Sergeant and Mrs. Smart reveal the fact that he is spending much of his time fishing, with splendid results.

Sergeant Smart came to the College in 1912. For eleven years he rendered good service to the institution and left this summer only because he felt that he should spend the rest of his days at play.

### The Houston Post allows:

With the West Texas College located at Lubbock, which is a fine little city in Northwest Texas, the majority of boys in what is known as West Texas, will continue to be served by the Old Reliable, viz., the Agricultural and Mechanical College of Texas at College Station.

### SUMMER CANDIDATES FOR DEGREES ANNOUNCED

The following candidates for the Bachelor of Science Degree for the summer session of 1923 have been announced by Registrar Charles E. Friley:

Agriculture: H. L. Alsmeyer, Mission; R. C. Burns, San Antonio; D. W. Carlton, Fort Worth; C. Elwell, College Station; E. Hobbs, Rice; W. D. Kirkpatrick, Lewisville; R. Mallow, McKinney; F. C. Newport, Tomahawk, Arkansas; R. H. Wyche, Riesel.

Agricultural Education: B. L. Bradford, Iowa Park; N. A. Cleveland, Beaumont; W. C. Horn, Bryan; J. F. Mangum, Hempstead; I. M. May, Normangee; C. D. Parker, Gilley; R. C. Patterson, Kyle; R. Reece, Farmersville; C. V. Reed, Cooleedge; J. C. Snow, Menard; A. C. Strickland, Cooleedge; T. White, Sealy.

Agricultural Administration: S. Antoline, Cheneyville, Louisiana.

Industrial Education: V. C. Dabney, San Antonio; H. U. Miles, Dallas.

Chemical Engineering: B. C. Jones, College Station.

Textile Engineering: A. Ram, Calcutta, India; T. Reese, Freeport.

Mechanical Engineering: A. V. Weise, San Antonio.

Many a man has been robbed of everlasting fame because he didn't die soon enough.

Our greatest undeveloped natural resource is—men.

### AGGIE CADET KILLED IN MOTOR ACCIDENT.

Written expressions of appreciation have been received from Mrs. E. T. Parsons and family of Greenville, to A. and M. friends who were thoughtful and helpful to her following the death of her son, Joe Parsons, near Waxahachie recently. Parsons, a Junior at the College was going home to visit his mother when an automobile in which he was riding turned over on the Waxahachie road instantly killing him.

Joe was an exceptionally fine boy. He was working his way through school and had earned the respect of his associates and instructors at the College. He was taking a course in mechanical engineering and was in the Aviation service.

Parsons had just completed his six weeks R. O. T. C., training at San Antonio and had come by College for a brief stay before going to visit his mother in Greenville.

Aim for the highest; never speculate; never endorse beyond your surplus cash fund; make the firm's interest yours; concentrate; put all your eggs in one basket and watch that basket; expenditures always within revenue; lastly, do not be impatient, for as Emerson says, "No one can cheat you out of ultimate success but yourself."—Andrew Carnegie.

Most businesses are big because big men are behind them.

A husband who has his own way in everything seldom amounts to much.

## ANNOUNCING THE FAMOUS "TEXAS AGGIE MINSTRELS."

### GENTLEMEN BE SEATED!

HEAR YE—All brethren in the limits of all Aggeland (which includes the entire universe).

On the last Wednesday in the week just before and preceding Thanksgiving Day, at 8:00 p. m., in Guion Hall, College Station, Texas, the Texas Aggie Minstrels will make their initial appearance. This decision was made after many, many, urgent demands of the amusement seeking public. Don't forget the day, don't forget the time, don't forget the place and above all don't forget to make your reservations EARLY. The occasion promises one long to be remembered by those present, for the entertainment in itself will be the most novel and unique of its kind ever presented in the history of A. and M.

The purpose of this minstrel is the furtherance of the financial limitations of the Ex-Students' Association of the A. and M. College. Every dime that so merrily clinks its way into the coffers will be used in helping A. and M. to fulfill its obligatory mission of serving the student, ex-student, state and nation in its true and just manner, i. e., the greatest college, in the greatest state, in the greatest nation on earth.

The men in charge of the minstrel are sparing no time or trouble to scour the entire state in an effort to hunt out the best talent that A. and M. affords to make the show THE BEST. A. and M. clubs and A. and M. men are urgently requested to lend their aid in making the minstrel go over in big style. Don't wait for some one to write you personally—just sit down and send in your ideas, songs, jokes, or suggestions to The Aggie and they will be taken care of as well as appreciated. The management is trying to so plan the show that there will be interesting features for the old timers as well as the youngsters.

At the present writing the survey of the talent available has not been completed, hence a detailed programme can not be published at this time. However judging from potential prospects 'the customers' will receive about the snappiest, full 'o pep, two hours of songs, dance, jokes, and monologues that it has ever been their privilege to buy (not barring professionals). Patrons are warned now to keep their eyes open for announcements in these columns concerning the sale of tickets.

W. K. HANSON,  
Manager.

### BE STRONG.

O friends, be men, and let your heart be strong,  
And let no warrior in the heat of fight  
Do what may bring him shame in others' eyes;  
For more of those who shrink from shame are safe  
Than fall in battle, while with those who flee  
Is neither glory, nor reprieve from death.

—Homer.

W. L. Knapp '22, has been employed by the Stamford school board as instructor of agriculture in the city schools, in accordance with the Smith-Hughes act.

Knapp was a member of the judging team from the Agricultural and Mechanical College in Oklahoma City, the Texas State Fair, Kansas City, and at the National Fat Stock show in Chicago.

The citizens of Stamford feel that they are unusually fortunate in securing Mr. Knapp for this position, since Stamford is the center of thoroughbred activities. He will assume his new duties September 1.

Superintendent N. S. Holland of the city schools is planning a large program for the coming year and the citizenship will co-operate in this splendid undertaking. — Stamford Leader.

Frank G. Anderson of Sparta, Tenn., Fish football coach and head coach in track was back in Texas the latter part of July. Anderson, who is a Major in the Field Artillery Organized Reserves attended the annual training camp at San Antonio.
