

CAVALRY 7, ARTILLERY 0

On Monday afternoon the Cavalry won the deciding game of the inter-battalion football series from the artillery by a 7 to 0 score. Once when an attempt at a place kick by Fish Hunt was blocked the Wagon Soldiers had a chance to even the score but the man who recovered the ball was too slow and was soon overtaken and downed.

The game soon resolved itself into the Artillery vs. Fish Hunt as this man was doing practically all of the work for the backfield with his punting, passing and running with the ball. It was on a wide end run of his that "Zu" Parks was able to plow over in his habitual "Red Grange" style for the single touchdown of the game.

Connerty of the Artillery did quite a bit of their backfield work, handling the punting end of the game exceptionally well, at one time putting one down the field for a distance of eighty yards and another time for sixty. He passed well also but the men on the receiving end did not seem to be able to snatch the ball even with it coming right into their arms.

Fish Deffebach playing end for the Artillery soon convinced the Cavalrymen that his end was a hard one to get around. He is without doubt a ranking end in the inter-battalion league. Closely following him during the afternoon was Bailey of the other team.

The two lines did not show up near so well as they had in some of the

past games but since they both seemed to be lacking in their usual game, the contest was pretty evenly matched throughout. Vance and Dodson for the Artillery and Lanham and Rideout for the Cavalry looked good throughout the game.

WE ASK YOU.

If you don't feel just right
If you can't sleep at night
If you moan and sigh
If your throat is dry
If you can't smoke or drink
If your grub tastes like ink
If your heart doesn't beat
If you've got cold feet
Why don't you marry the girl?
—Princeton Tiger.

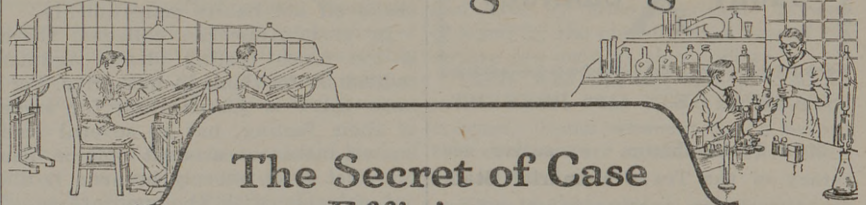

* * *

I don't feel just right
I can't sleep at night
I moan and sigh
My throat is dry
I can't smoke or drink
My grub tastes like ink
My heart doesn't beat
There is cold in my feet
My head's in a swirl
I'm married to the girl.
—Kansas City Star.

* * *

Now he's feeling just right
He can sure sleep at night
Not a moan or a sigh
And his throat isn't dry
He can both smoke and drink
Food tastes nothing like ink
Heart has regular beats
Not a sign of chilled feet
And the reason, of course—
The judge gave a divorce.
—Sunflower Daily.

The CASE Engineering Code

The Secret of Case Efficiency

CASE field reports cover fully the cause and remedy of every interruption in the satisfactory operation of Case machines. Case engineers have reduced the handling of these reports to a science.

Month by month they chart the comparative efficiency and durability of the parts and units affected. Month by month the charted information is checked against the record of repair parts sold. From this record an endurance factor is established by the simple formula:

$$\frac{\text{Number parts used}}{\text{Number machines}} = \text{Endurance factor for each part.}$$

Every effort is made to reduce this factor to the lowest possible point. The whole process of refinement is continuous and now almost automatic in its operation. No weakness of any kind can escape attention.

This is why the development of Case machines can be, and has been, carried to a point far in advance of the ordinary. This is the secret of the efficiency and dependability of every Case machine.

J. I. Case Threshing Machine Co.

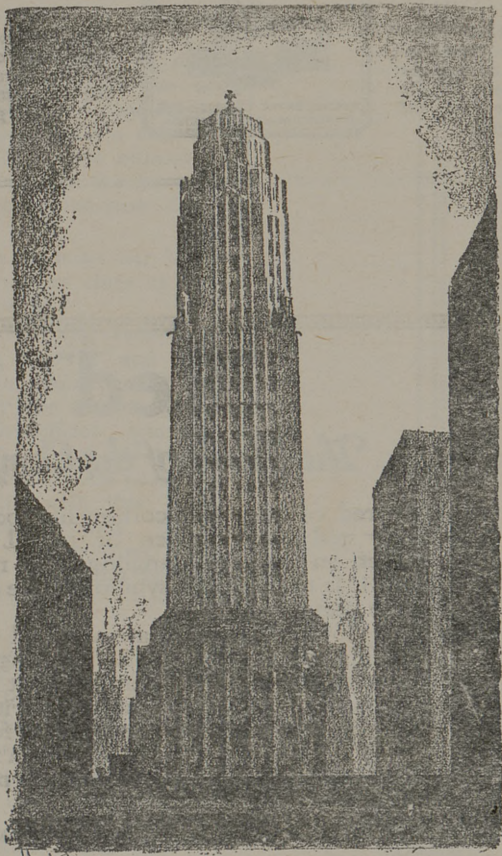

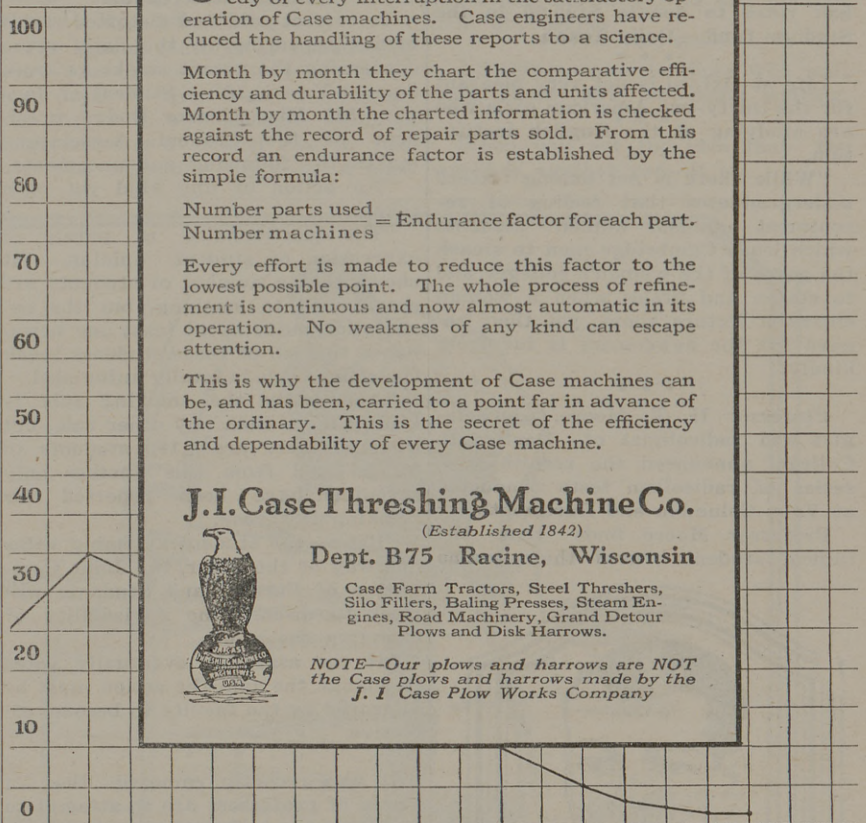

(Established 1842)

Dept. B75 Racine, Wisconsin

Case Farm Tractors, Steel Threshers, Silo Fillers, Baling Presses, Steam Engines, Road Machinery, Grand Detour Plows and Disk Harrows.

NOTE—Our plows and harrows are NOT the Case plows and harrows made by the J. I. Case Plow Works Company

"A Noble Profile"

The Bush Building, New York City
HELMLE & CORBETT, Architects

FAR more strongly than most churches, this great tower of commerce bespeaks the real spirit of Gothic architecture— aspiring, rugged, virile—an inspiration for the thinking, creating architect of today. Contradicting the antiquarian, this great tower declares that the spirit of Gothic architecture is a living, organic thing, adaptable to modern problems of accommodation and engineering, and endowed with a future as magnificent as its past. Certainly modern invention—modern engineering skill and organization, will prove more than equal to the demands of the architecture of the future.

AMPLE EXCUSE

London Tit-Bits: The prize excuse was introduced during the trial of a man charged with wife-beating.

A neighbor who was present during the assault was called as a witness for the prosecution. He described the blows in detail and the wife's helplessness.

In astonishment, the Judge turned to the witness and asked: "Do you mean the Court to understand that

you stood by and saw this man strike the poor woman again and again?"

"Yes, I saw it all."

"And you made no effort to interfere?"

"I couldn't."

"Why not?"

"I was filling my pipe."

A goat ate all our other jokes,
And then began to run;
"I cannot stop," he softly said,
"I am so full of fun."
