

FISH BASEBALL TEAM OFFERS GOOD MATERIAL FOR VARSITY

The freshman baseball squad has just completed a highly successful season, although they have played only six games. They beat the Allen Academy team in two games and also took the measure of the Caldwell team in two contests. Last week they went to Brenham where they defeated the Blinn Memorial College on Monday and tied them in the second game.

Coach Pierce has developed some stars of the first water from the men who reported at the first of the season. He has picked an infield which is indeed hard to beat, and it should be of great assistance to Coach Rothgeb when the call is issued next spring. Sykes and "Lefty" Graham at first, Hunt and Barnhardt at second, Williamson and Furneaux on short, and Clark at third with Harris and Churchill catching. Of the outfielders, Ewing, Broiles, Matthews, Schow and Bradford have proved themselves capable ball players.

The fish team is to be congratulated upon its work for the season and for withstanding the hardships they have worked under. They have had to practice on the drill field this year and the diamond was not of the best.

Several pitchers have been developed who should be able to hold their own on the Varsity squad next year. Bell and Wyman have shown much promise along with Jones and Mound.

Heard in the showers: "How do I know that's my soap? I ought to know it by now, I've had it for two years!"

There are times when even a witty guy can't think of something funny to say. This is one of them.

Let us fit you in a pair of these comfortable

Men's Oxfords

You'll enjoy your vacation in a pair of them.

New models in the new light shade of tan, as illustrated, or in the broad toe that was designed to wear with wide trousers.

\$8.50 to \$10.00

Many other models, in black or tan calf.

\$5.50 to \$7.50

TRYOUTS IN PHYSICAL TRAINING SHOW MANY PROMISING ATHLETES

During the last week freshman physical training classes have been given over to participation in track and field events with the result that several men have been discovered to have above the average ability in the different events. Mr. House was highly elated over the results he obtained in the tryouts and the high men in each event should be able to relieve a few of Coach Anderson's worries about the strength of the track squad of 1926. Compared to track records, the marks made by the freshmen may seem far below, but when taking into consideration that the participants wore the regulation military uniform it may readily be seen that their records were fairly high.

Two freshman, R. L. Rogers, and C. R. Bergstrom, ran the 100 yard dash in 11 seconds flat. There were twenty-five other men who ran this distance in less than 12 seconds.

M. R. Hudnall was the only fish to make the 100 yard low hurdles in less than 13 seconds, his time being 12.4 seconds.

In the hop, step, and jump, C. H. Miller and G. S. Pomeroy tied for first place, both clearing 38 feet, 2 inches. Four other freshmen made over 36 feet. Since this event is not in the Southwestern Conference, the distance obtained in the Olympic games in Paris last year is offered for comparison, which was 50 feet, 11 1-4 inches.

E. M. Fontaine was first in the broad jump with 19 feet, 9 inches, while C. F. Scott was second with a jump of 19 feet, 2 inches. Ten other men cleared over 18 feet.

In the high jump D. B. Schultz cleared the bar at 5 feet and 5 inches with H. G. Swift second with a leap of 5 feet, 4 inches, and with fourteen other fish jumping over 5 feet.

In the gentle and aged art of "chin-ning", P. E. Bret took first place by "bearding" the bar 28 times. Four other men exceeded the 18 mark in this event.

In the shot put, few men went over 35 feet, while all men cleared the bar vaults with ease.

SCHOOL OF AGRICULTURE DESIRES DATA ON SENIORS

Dean Kyle, in an attempt to obtain reliable data in regard to the graduates of the School of Agriculture, has sent every senior of the department a card requesting certain specific information.

In many instances requests have been made for agricultural graduates and it is only by such a method as this that accurate information can be kept and a reliable man obtained for the position. The department takes a great interest in the employment of its graduates and urges cooperation of the seniors in making this information complete.

It is Dean Kyle's belief that every student should know the objects, purpose and system of operation of the Experiment Station and Extension Service. Consequently, two meetings were arranged. One was held last night at which Doctor Youngblood, director of the Experiment Station, spoke. At 7:30 Thursday night, in the Extension Building, Director Walton will speak on the Extension Service.

It is expected that a large number of seniors will attend.

Bell and Spigot Joint

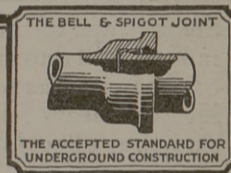

THE Bell and Spigot Joint for Cast Iron Pipe adopted over one hundred years ago, is the preferred joint today.

It is tight, flexible, easily made and non-corrodible—there are no bolts to rust out—it makes changes of alignment or insertion of special fittings a simple matter—it can be taken apart and the pipe used over again, without any injury—it is not subject to damage in transit—in fact, it embodies practically all of the desirable qualities in an underground joint.

THE CAST IRON PIPE PUBLICITY BUREAU, Peoples Gas Bldg., Chicago

CAST IRON PIPE

Our new booklet, "Planning a Waterworks System," which covers the problem of water for the small town, will be sent on request

Send for booklet, "Cast Iron Pipe for Industrial Service," showing interesting installations to meet special problems
