The Parker Pen Company,  
Gentlemen:

At 4:10 P. M. yesterday I took off in my Yackey plane from Checkerboard field. When I reached an altitude of 3000 feet I leaned over the side and dropped a Parker Over-size Duofold Pen. A few minutes later I made a landing near my starting point, and a crowd was examining the same Parker Duofold pen, which had landed on hard ground. To my great surprise, the pen had not been damaged in the slightest by its 3000 feet drop.

Signed with the Parker that dropped 3000 feet.

Dropped 3000 feet!**

YES, the Parker Duofold Pen was tossed from an aeroplane at dizzy altitude to test our new Non-Breakable material "Permanite," and landed 3000 feet below—unharmd.

Tests such as this are the best guarantees that a pen will last practically forever.

For a year we kept secret the fact that Parker Duofold Pens and Pencils have barrels of this new lustrous, beautiful, light-weight Permanite until a whole series of heroic demonstrations proved that it does not break.

This black-tipped lacquer-red beauty is not only the smartest, shapeliest pen, but the greatest writing instrument the world has ever seen. Its yielding, super-smooth point is guaranteed 25 years not only for mechanical perfection but for wear.

Choose your point and color at any good pen counter. But look with care for the name "Geo. S. Parker" on the barrel—the mark of highest excellence.

**An Aged Course**

Good Hardware: Golfer—I went around this course in 85.

Friend—Really! I didn't know it was as old as that.

Assuming there will be a Quaker referee at the fight in the Quaker City, it will sound strange when he says to Mr. Tunney, "Thou art out—thine adversary hit thee a wallop on thy beezel!"
