INTERESTING PROGRAM
FOR SECOND TERM

(Continued from Page 8)

The situation in football has taken a very interesting turn. As the teams stand now it is possible that any of those in the first division may emerge the victors.

TEXAS RELAY GAMES MARCH 25

(Continued from Page 8)

University, college or academy class will enter a team in the relays this year.

Information blanks concerning the relays and announcement cards announcing the Texas and Rice relays have been sent to practically every college and University in the land. The joint announcement was sent out due to the fact that the Rice Relays follow the Texas Relays one day at Houston.

Entry blanks will be sent to the various colleges and Universities from the Texas office, March 1, and the schools will tender the various athletes that will take place in the events. Entries must reach the University of Texas by March 15.

Negotiations are under way to secure several track celebrities to feature the relays at Austin.

HOUSE PASSES APPROPRIATION

(Continued from Page 1)

\$110,000 for the University summer school, allowing a total emergency appropriation for that institution of \$121,500.

The total emergency appropriation voted by the House committee for higher educational institution was \$794,026.

Each year the General Electric Company sends representatives here to select men graduating in Engineering work for the company after graduation. This year ten seniors were selected from the Engineering Department by the five representatives who were on the campus Monday, February 7. The seniors that were selected to go to work at Lynn, Mass., were E. J. Allen of San Angelo and F. B. Hornby of Dallas. The other men will go to Schenectady, those to take the regular student course will be C. D. Heye of San Antonio; J. Hume of Houston, S. B. Foster of Ward, Colo., R. F. Olsen of Clifton. Those to enter the radio department will be J. T. McLamore of Westover, and J. P. Smith of Granbury. Those to enter the factory training course will be H. C. and F. W. Glitsch of Dallas. These men have not definitely accepted these jobs, though the majority will accept, as it is quite an honor to be chosen from so large a class and be offered such a chance for advancement into the higher realms of engineering. The Glitsch brothers and R. F. Olsen will receive their degrees in Mechanical Engineering while the others are all Electricals.

After shaving — WHAT?

WHEN you finish your shave, what do you do for your face? Probably wash off the lather and let it go at that. Here's a better idea. Slap on a few drops of Aqua Velva, Williams new scientific after-shaving liquid. It helps the skin retain its needed natural moisture—keeps it flexible and comfortable all day long. In big 5-oz. bottles — 50c.

Williams Aqua Velva
