

WEEK'S NEWS IN REVIEW

(Continued from Page 1)

to date in every way. There will be no short backstops or ditches next to the side line for the player to fall

in when dashing madly after some of his opponents wild blows. The varsity games will be played on these courts.

An effort to interest students in scholarships and fellowships offered

annually by large universities to promising candidates who desire graduate work is being made by a committee on scholarship recently appointed by President Hubbard.

Tempting awards from many colleges and universities are on file at C. I. A.

A plea for additional dormitory facilities and higher salary schedules is being made before the Legislature by L. H. Hubbard, president of the College of Industrial Arts. The board of control failed to recommend any dormitories for C. I. A. for the next biennium.

President Hubbard says: "If C. I. A. is to continue its organization as a residential college—and all colleges for women should be organized on such a basis—it is essential that more dormitories be added to the C. I. A. system."

The campus now provides accommodations for 600 students, the rest reside in houses near the college.

John Tarleton seems to have about as brainy a group of students as can be found anywhere in a school of its size, that is according to the grades that went out from there for mid-term. Their honor roll requirement is grades of "B" or better in every subject. There were sixty-three students who made the necessary grades to entitle them to a place on the honor roll.

Mr. Sullivan is finishing the Gym. by degrees. The degree that is being worked on at present is the building of showers and lockers for the Physical Training students.

The space under the seats in the north end of the gym. will be filled in with showers and over a thousand lockers so that the fish taking P. T. next year will be able to change into their gym. suits there instead of in their rooms.

All of the P. T.'s will be required to have a gym. suit of some sort and that "some sort" will leave room for lots of individuality and original conceptions as to just what constitutes a gym. suit.

It might be interesting to the cadets to know that if this were C. I. A. the Gym. class would be called a course in "Aesthetic Dancing," and the so called suits would be "Costumes?"

In carrying out the intensive program of repairing started last summer the college will begin work on the dormitories about the 1st of March. The work is to consist of repairs to the heating and water systems and painting the pipes and radiators. All screens and windows will be repaired and the exterior of the windows will be painted. Alpha and Beta halls will be painted both inside and out. These halls have long been in need of repair and it will be a great treat for the Sons of Rest to have their palaces put in good shape once more.

This work will cost somewhere between six and eight thousand dollars by the time all repairs are finished that they are figuring on. Some work is done every year but this is to be a more complete job than they have tried to make of the others.

Possibly some of the cadets have been wondering what it is all about and at last we know. It is a new power line to take care of the increased output from the power plant. The new

line is No. 2 bare wire which will replace the old No. 8 wire. The line is strung on 35 ft. poles. It will extend from the power plant to the Consolidated School and to the I. & G. N. Depot. The production of the power plant has been increased in the last year or two and the little wire has been unsafe to use. This new wire will take care of all development for the next twenty years.

The line is being put up at a cost to the college of about \$5,000.00. The material alone will cost a little over \$3,000.00. This is another good move and maybe the college will keep up the good work and our system will soon approach somewhere within the bounds of perfection.

Texas Tech is going strong for a college as young as it is. The 1500 students has been registered and a few more are still expected to register. This puts Tech up on a basis with the best of the colleges in the state.

A fraternity bathing society contest has been banned at S. M. U. by Dr. Selecman. It seems that the main objection was that the organization was an outlaw fraternity.

Mr. "Tommie" Mayo, well known librarian, has been granted a leave of absence and will study at Columbia University next year. He will take his doctors degree.

The Battalion's attention has been called to the marriage of H. C. Bennett, of Fort Worth, former Lieut. Col. in the cadet corps, to Miss Alice Kizer, last Thursday evening. "Luck to you Henry."

ANNUAL MEETING OF BOARD
HERE FEB. 22ND.

plans of the Athletic Department for permanent improvements on Kyle Field; and other general routine matters of the college. The outcome of the meeting was not public at the time the Battalion went to press, but will be given in a later issue.

DEBATING TEAM TO MAKE
DEBUT.

(Continued from Page 1)

debated in public with the Kansas Aggies on March 17th.

Anyone interested is invited to attend this debate Saturday night.

The first Sunday afternoon program, sponsored by the new Y cabinet, was a pleasing success. A very large crowd of cadets and campus people turned out and found the "Y" putting on a work of real value. The song service attracted many, but Prexy's talk received the most attention, a very short talk, but so full of meaning that the students appreciate, and chapel speakers overlook, that everyone enjoyed it. The show "The Man Nobody Knows," was very good for its type, and was very interesting. The program for next week will be reports of the A. and M. delegates to the National Y. M. C. A.-Y. W. C. A. convention held this year in Milwaukee, the regular song service, and show, "The Heart of Lincoln. The cooperation of the students was appreciated by the "Y" cabinet, and the encouragement will lead them to more constructive work, that will be a solution to the many sore spots of the campus life today.
