

WEEK'S NEWS IN REVIEW

(Continued from Page 1)

For many years The Westinghouse Electric Company has been employing a number of A. and M. graduates in Electrical Engineering. This year, out of thirteen seniors that sent in their application to The Westinghouse Company, six have secured employment with the company and as soon as they have finished their work here, they will go to Pittsburg and take up their work with Westinghouse.

The men selected were: R. N. McCollom, Lubbock; R. T. Falkenberg, Taylor; H. L. Miller, San Antonio; J. L. Hurff, Bryan; B. J. Carrol, Bryan, and L. M. Haupt, Kyle.

Mr. M. V. Smith of the class of '15, has been with the company since his graduation and is recognized as one of their foremost designers. C. C. Hudspeth, '15, was for several years foreman of Westinghouse's Transformer Testing Department, is now with their General Engineering Department. E. M. Clayton is with their Marine Department. D. M. Davis, '26, is also employed by Westinghouse and is doing good work.

The executive, educational, and A. and M. College committees of the Texas Cotton Seed Crushers Association met here last Wednesday as guests of the college. In an executive session preceding an inspection of the campus, they selected Galveston as the city for the 1927 convention. After this meeting, the rest of the morning was spent in inspecting the Feeding and Breeding Station of the Experiment Station.

The afternoon was largely spent in inspection of the electrical, mechanical, textile, and chemical engineering departments, and the Experiment Station. The most interesting phase of the tour was the visit to the \$10,000 cotton seed oil mill unit recently established here by the Association as part of its work in cooperation with the College.

A review of the cadet corps, a conference basketball game between A. and M. and Rice, and a special musical program concluded the entertainment. This organization has shown special interest in A. and M. recently and we should certainly be grateful for their cooperation.

The Sunday afternoon program offered by the Y. M. C. A. failed to attract as large a crowd as before, but even with the speedball game going on at the same time, a very good audience was present. The program for next week will consist of the singing, a talk by Dean Friley, and four reels of pictures: "Nazareth," "Despoilers of Jungle Gardens," "With Roosevelt in Turkestan," "Aesops Fables." This will be a program that can be appreciated by practically any cadet and it is hoped that you will show

your appreciation of the great progress the Y is making towards the improvement of our entertainment by your presence at the program next Sunday.

The Presbyterian banquet, held last week was one of the best attended this season. There were something like 150 guests, two thirds of whom were students. There was also a long list of notables present: Rev. Henderson, representative of the committee on home missions for the Brazos Presbytery, Dr. James Hardy of Houston, who looks after the religious life of Presbyterian students at the various colleges, and Dr. Tenney of Dallas, the secretary for the board of education of the synod.

A large attendance of railroad men and shippers is expected for the fourth short course on diseases of fresh fruits and vegetables in transit which is to be held at the A. and M. College of Texas on March 7-8, Dr. J. J. Taubenhau, chief of the division of plant pathology and physiology, Texas Agricultural Experiment Station, has announced. Producers and members of the press have also been invited, Dr. Taubenhau said.

The program of the short course provides for lectures on plant diseases as well as laboratory demonstrations. Refrigeration is also a subject that will be given attention. A banquet will be held on the night of March 7.

The recent shortage of water, which has been the cause of considerable inconvenience, has been caused by the sanding up of the big well north of the campus. This well was the best that the college owned, and as it cannot be cleaned by ordinary means owing to the conditions left by previous repairs, its loss will be very noticeable. There is enough water from the other wells the college owns to adequately supply the demands of the campus. The real cause of the recent scarcity of water being that one of the pumps of an important well was being repadded at the time the shortage developed, and consequently that well was cut off. When it was finally connected, the situation was relieved and (washing began again.)

The seventh annual convention of the State Baptist Students Union was held in Houston, February 18, 19 and 20th. The meeting was more or less a general assembly of college students from the Denominational schools and State Colleges of Texas. The keynote of the assembly was "Aggressive for Christ." The delegates were treated with the warmest of hospitality during their stay in Houston. Tours were made of the city Friday afternoon.

There were about 300 delegates in attendance at the meeting and 31 of these were from College Station. Some of the principal speakers of the conference were: Mr. W. R. Owens, Ma-

con, Ga., Dr. Price of the Seminary of Fort Worth; and Mrs. J. M. Dawson, of Waco. There were also student speakers from the various schools, one of whom was J. B. Bell of College Station.

"D" Company, Infantry, having obtained the greatest percentage of extra subscriptions during the contest in the fall between the various organizations, will publish a special edition of the Battalion. First Sergeant M. E. Dietert established the excellent record of selling subscriptions amounting to 135.8 per cent. This is the highest record ever obtained and he deserves the moving picture pass offered by the Fairman and Schulman interests as prize.

This is the first time in three years that any other organization other than "B" Battery Artillery has won this distinction. As a result of Mr. Dietert's work "D" Company has the privilege of publishing a special issue of the Battalion, devoted to their own interests, containing short "write-ups" of their personnel, with articles, jokes, and cartoons contributed by men of that unit.

The "D" Company Battalion will probably follow this issue, with R. O. Pearson as editor, and M. E. Dietert as business manager.

RESOLUTIONS UPON THE DEATH OF MR. A. C. HEARNE

Wheras, God in His infinite wisdom has called to his last resting place Mr. A. C. Hearne, father of our fellow student and beloved classmate:

Therefore, be it resolved, by The A. and M. Cherokee County Club, that we extend to the members of his family our sincerest sympathy in their hour of bereavement:

Be it further resolved, that a copy of these resolutions be sent to Mrs. A. C. Hearne and family, a copy to The Battalion, and a copy to The Daily Progress at Jacksonville, the home of the deceased.

(Signed) W. B. COX, President.

A. and M. was well represented at the meeting of the superintendents and principals section of the National Education Association which convened in Dallas on February 26 and lasted through March 2, by Dean Chas. E. Friley, of the School of Arts and Sciences and Registrar of the College, Dean C. H. Winkler of the school of Vocational Teaching, Dr. D. C. McIntosh, Prof. and Mrs. J. P. Buck, Prof. W. L. Hughes, Prof. G. B. Wilcox, Prof. E. L. Williams, and Dr. F. B. Clark. Dean Friley presented a paper on the question of preventing duplication in college courses

The general themes of this national meeting, which was held at Washington, D. C. last year and has come to Texas for the first time, included ideal character and citizenship and national unity. Music and its education value were also given emphasis.

Among the noted speakers that appeared on the program were: Governor Dan Moody, Frank W. Ballan, Superintendent of the Schools of Washington, D. C., Randall J. Condon, Superintendent of the Schools of Cincinnati, Ohio, and president of the Department of Superintendents of this meeting.

First Section Hand: "Hear the S. P. just bought a couple of new freight engines."

Second C. E.: "Baldwin's?"

First: "Sure, who ever heard of a locomotive with hair on it."

* SAY BO! DIDJA. *

Say Bo, didja' ever

Go thru "Ye Athletic and Military College for four years

And aspire to be a great athlete

And while you were in pursuit of

Your ideal, Didja' become a great

Billard drinker and didja' even think

How the hearts of the fairer sex in

Bryan would flutter when they watched you perform.

And then suddenly in your last year

Didja' realize your dream

And become that master athlete,

A GOLF HOUND,

And have your brilliant services

Rewarded by one meal a day

On the training table.

G. "Johnnie" James did.

JUNIOR A. H. TEAM TO STOCK SHOW.

(Continued from Page 1)

Fifteen junior animal husbandry students have been practicing every afternoon since Christmas under the supervision of Mr. A. H. Groth, and it was no easy matter for him to select the six for the team. Those who were finally chosen were: W. S. Amend, Ideal; J. M. Bird, Dublin; T. G. Greenwade, Whitney; H. E. Howard, Devine; R. R. Peeples, Tehuacana; and N. E. Ryalle, Jasper.

The team will leave the college Saturday morning, stopping over in Waco Saturday and Sunday at F. E. Goodman's shropshire sheep ranch, where a final preparation will be made. In Fort Worth the members of the team will meet many widely known livestock experts, and this alone will make the trip a success. The junior team of this year will more than likely be the team which will represent A. and M. in the national contests next year, and the Fort Worth contest will afford some valuable experience to the team.

A new \$10,000 cottonseed oil mill unit has just been installed in the Industrial chemistry laboratory, and is now ready for operation. This equipment makes A. and M. one of the two schools in the south and southwest to have such facilities for the use of the students. It is complete in every detail from the cleaning of the seed to the refining units for the manufacture of refined oil, cake, and soap. This valuable addition to the chemistry department was furnished through the generosity of the Texas Cotton Seed Crushers Association, which has cooperated in many ways with the chemistry department.

Fish: "Er—captain, what kind of a track man is Felix?"

Parker: "Felix who?"

Fish: "Felix Austed."
