## ELECTRICAL SHOW TO BE STAGED MONDAY MORNING

**Coulomb Chasers Put on Annual Show.**

As Commencement approaches, all the departments of the college are getting ready for their exhibitions. The exhibition which will probably entertain the commencement visitors the most will be the exhibition of electrical phenomena, put on by the seniors and juniors of the E. E. Department. The show of last year proved to be a decided success; it had the visitors guessing as to what could cause the freak things they saw. Electricity is a very interesting field of our modern sciences, and with the apparatus that is afforded, many seemingly impossible feats can be accomplished.

Prof. N. F. Rode has been working on the program for some time; he has not yet announced a complete program, but he indicates that the show will be complete in every detail. Among the interesting details of the show will be a talking skull, a bottle that can't be emptied, some diving ducks, pail welding under water, a tin can motor, a reversing motor, car starting by radio, an illumination display, artificial lighting, an oscillograph, and the death ray.

The entire E. E. Building will be given over to the exhibitions.

## 14TH ANNUAL STOCK JUDGING CONTEST HELD

**Fish Boethel High Point Man With 551 Points.**

The fourteenth annual Freshman Livestock Judging Contest, held in the Animal Husbandry Pavilion last Saturday, resulted in one of the closest contests ever held. Only fourteen points separated the first six men as the high point man had 551 to his credit and the sixth score was 537.

This contest is held annually for

## NEW DORMITORY PLANS COMPLETE

**"Sections" to be Unique Feature of New Halls.**

Since the college has received the \$300,000.00 appropriation for the two new dormitories the Seniors of the Architectural department have been working on the plans and will have them completed at an early date. When the plans are completed bids will be received and the contracts let.

The dormitories are to be of a different type from any that we have on the campus or any we have seen in the state. They are to be built in sections and can be added to at any time that the money is available for their construction. They will be three stories high.

There will be a flight of stairs leading to each suite of four rooms, and to any other floor you will have to go to the bottom floor. There is a door

## CATTLE RAISERS' ASSO. MEETS AT AGGIELAND

**Many Subjects of Interest to School Discussed at Meeting. Amarillo to be Scene of Next Meeting.**

The executive committee of the Texas and Southwestern Cattle Raisers Association met for the second time at the College, last Thursday and Friday. The object of the meeting was the consideration of agricultural and livestock problems and their remedies, definite steps being taken Friday at the meeting of the Committee looking toward the organization of a state agricultural congress or federated committee. The functions of the federated committee will be to discuss matters of common interest to agricultural and livestock interests and to work in behalf of such interest.

About twenty members of the Committee were present at the two-day session including some of the largest producers of livestock in Texas and
