
**WEEK'S NEWS
 IN REVIEW**

Dean E. J. Kyle has accepted an appointment as a member of the board of seven trustees for the \$1,000,000 Luling Foundation, established by Edgar B. Davis, president of the United North and South Oil Company. This foundation was established by Mr. Davis for the betterment of agricultural conditions for rural people in Guadalupe, Gonzales and Caldwell counties. It was in that section of the state that his oil properties were developed.

Announcement of Dean Kyle's appointment on the board of directors was received from K. C. Baker, official of the oil company representing Mr. Davis.

Graduates sign with Purina Mills.

As has been the custom for the last five years, contracts have been offered this year to a number of A. and M. graduates by the Purina Mills, with offices at St. Louis and Fort Worth. Notification that such contracts had been offered to ten of this year's graduating class was received recently by Prof. D. W. Williams, of the animal husbandry department. It is understood that six of the graduates contemplate going with the company following graduation, these being R. A. Goodson, Jacksonville; L. E. Driver, San Antonio; W. G. Ralph, Farmersville; R. A. Wilson, Farmersville; W. L. Lee, Weatherford; and A. J. Florey, Jr., Brownwood.

C. E. Erickson of Bryan, winner of first place in the fifth annual chemical contest for students in freshman chemistry, the results of which were recently announced at the banquet for the contestants, is the third electrical engineering student to take first honors in this annual contest since its establishment in 1923.

Only 29 out of nearly 1000 taking freshman chemistry entered the finals of the contest. Elimination tests narrowed the field to one student from each chemistry section. C. C. Valle, Rio Grande; H. D. Maples, Dallas; and R. S. Jackson, San Antonio; took second, third, and fourth places respectively in the contest.

Erickson is a student under H. C. Tidwell, instructor in chemistry, and is the third student taught by Mr. Tidwell to take first place in the contest.

There will be a joint convention of the Y. M. C. A. and the Y. W. C. A. at the Y camp at Hollister, Mo., from June 7 to 17. This will be essentially a student conference where student problems will be discussed. About three hundred and fifty delegates are expected, six being the quota allowed A. and M. Anyone who has been to such a convention knows the value of them, and should be anxious to get a chance to go to this one. None of the A. and M. delegates have been chosen, and Mr. Cashion will be glad to give anyone all the particulars of the convention.

The West Texas Utility Company has been giving a fellowship of \$250 for several years to the Electrical Engineering senior who presents the best paper on some phase of public utility operation or management. This

year the fellowship has been divided into three scholarships, valued at \$150, \$75, and \$25, given for the three best papers from the senior E. E. class. The E. E. department selected the best papers, and forwarded them to the officials of the Western Utility Company for the final selection. Those who will be eligible for this award are E. J. Allen, J. L. Hurff, E. E. Umlang, L. W. Webb, G. H. Lovell, J. E. Jennings, F. J. Zak, C. A. Altenbern, Theodore Schultz, H. L. Reynolds, Ulrich Langhammer, M. T. Lewis, J. R. Meador, J. P. Smith, G. D. Heye and R. T. Falkenberg.

Dr. E. C. Campbell, associate professor of agricultural botany in the Purdue University School of Agriculture since 1920, has tendered his resignation effective at the end of the present school year to become dean of men and head of the department of biology in Transylvania College, Lexington, Ky. Dr. Campbell is a graduate of Hiram College, received his master of science degree from Purdue while here teaching some years ago, and his doctor's degree from the University of Chicago.

Prior to returning to Purdue in 1920, he was assistant professor of botany in Texas A. and M. College and head of the department of biology in the College of Wooster. Within the last six years he has published six research papers on botanical subjects, four papers on general educational policies and has obtained a patent on a pocket dissecting microscope.

SAY BO! DIDJA.

Say Bo, Didja

Ever get all "Macked"

Out and make that

Journey to Navasota to see

A new "Squaw" and

Didja have a feeling of

A Grand and Glorious

Time ahead of you,

And Didja go over

Big for the first few

Minutes and Didja

Have her ask you

If you were a "Fish"

And then ask her why

And Didja have her

Tell you it was because you had such

A Darling Baby Face?

R. N. Jennings did.

Artless Arthur says:

That if women were as adept at making up their minds as they are with their faces, what a difference there would be.

That his room-mate's ideas are as aimless as a grapefruit's squirt.

That the guys who declaim perpetual motion never saw an A. and M. mealhound.
