

INTRAMURAL ATHLETICS.

For a number of years an Intramural program has been carried out very successfully; each year a greater number of students take active part in the program arranged. This year a very extensive program has been worked out under the able direction of Mr. Pemberthy. The plan to be carried out this year will allow more men to compete in some branch of athletics. Last year there were two leagues in every sport, one for upper classmen and one for freshmen. Men from three units composed the team and the champion of each league played for the championship of the college. This season there will be as many leagues as necessary but each unit will have a team. This will induce more men to come out for their favorite sport and every student is expected to take active part in some form of athletics.

Basketball will be started next week. It promises to be very hotly contested. Already teams are practicing and conditioning themselves for

Improvements unknown until recently are introduced in the New Model Parker Duofold—Non-Breakable Barrel, and Pressureless Point by means of capillary flow, combined with gravity feed. We spent 35 years on 47 improvements—made 16,000,000 pens—own 32 Pen Patents besides 12 on Pencils and Desk Sets.

How would you advertise this pen? Give us your ideas. Write an ad and win a prize.

Seven well known advantages of the Parker Duofold are told here. The new one—announced April 1st—Factor number 8—is missing. If you find it—if you write an advertisement including it with the following seven—you may win as much as \$100 cash or one of nine smaller prizes.

Here
Are 7 Factors!
Can you find number 8?

1. Pressureless Point—starts and writes at feather-weight touch—extra strong because of extra thick gold. But tempered so it yields to any hand yet never loses shape.

2. Non-Breakable Barrel—now made of Parker Permanite—28% lighter than rubber formerly used—hand sized, and perfectly balanced.

3. Instant Ink Flow—tip always moist. Capillary attraction combines with gravity to produce pressureless writing.

4. Over-Size Ink Capacity—writes longer on one filling.

5. Duo-Sleeve Cap—a positive safeguard against leakage when cap is kept on tight.

6. Press-Button Filler—concealed inside the barrel out of sight, out of harm's way.

7. Beauty Rivalling Colorful Jewels—lustrous Black-tipped barrels in Jade, Lapis Lazuli, Mandarin Yellow, or Lacquer-Red. Also plain Black and Gold.

8. The Missing Factor! . . . What is it?

Try Parker Duofold at your dealer's and ask him about the missing factor. You do not have to buy unless you can't resist. Either way—write an Ad and win a prize. Note conditions of contest.
