

WEEK'S NEWS

(Continued from Page 2)

ing, she found twenty-nine letters all addressed to her in her mail box? That was the exciting experience of Miss Nedra Cooper, last Tuesday; and, to add color to that experience, all of them were post-marked College Station, which meant that it was no usual collection of letters! Upon investigation it seemed that the "boy friend" who is an upper-classman at A. and M. had solicited the aid of a number of freshmen in providing a new thrill for "Miss C. I. A."—Lasso.

Equipment Donated to Chemical Engineering Department

Equipment for the manufacture of soap and Hardened cotton seed oil has been received by the Department of Chemistry and Chemical Engineering

Department from the Procter and Gamble Company of Cincinnati. This consists of a soap kettle, mixer, and hydrogenation outfit. Added to the complete mill equipment presented by the Texas Cotton Seed Crushers' Association last year, the Department is now completely equipped for the taking of cotton seed through the various processes to its finished products, and is the first and only institution so equipped for such work enabling the students to come in direct contact with mill operation on a commercial scale.

The Chemical Engineering students will operate the cotton seed oil mill during the months of October and November under the direct supervision of a man specialized in each field of work, sent to the College by the Texas Cotton Seed Crushers' Association. Chemical Engineers with a theoretical and practical training in

engineering and chemistry are in demand, and it has been impossible for the Department to fill all the requests for men from the industries.

Lubbock Aggies Prepare for Big Time at A. & M.-Tech Game

At noon on the 28th, the Aggie Ex-Students in Lubbock will stage a barbecue for all Aggie visitors who come to attend the A. and M.-Texas Tech game. They are planning to serve wild duck barbecued, the duck being furnished by two Ex-Aggies. The visitors will be given a big reception, including plenty of cars to "tote" them anywhere merely by saying that they ar Aggies.

Every effort is being made to make the day the greatest A. and M. day ever held in the State and to see that every visitor has the time of his life. Specials will be run into the city from all over the Plains and some of those

cowboy Aggies of the West are coming in off their ranches for the first game they've seen in a long time.

University Registration Reaches 5,120

A total of 5,120 students had registered in the University of Texas at the close of Monday, a number equal to the largest former enrollment. With the second semester matriculations Feb. 1, the total enrollment will be nearly 5,700, and this will break all records of the University.

SAY BO DIDJA!

Boy I askya  
\* \* \*  
Did you ever go  
\* \* \*  
Up to Cool Dallas  
\* \* \*  
To see the Sewanee  
\* \* \*  
Football game and  
\* \* \*  
Didja put everything  
\* \* \*  
Into that game and  
\* \* \*  
Forget all for the time  
\* \* \*  
Being, But after the  
\* \* \*  
Game was over you  
\* \* \*  
Were fortunate enough  
\* \* \*  
To have a long New  
\* \* \*  
Hudson Sedan at your  
\* \* \*  
Disposal and didja fare  
\* \* \*  
Forth upon the streets of  
\* \* \*  
Dallas to look for  
\* \* \*  
Some sweet young thing  
\* \* \*  
To ride with you and  
\* \* \*  
Imagine how all eyes  
\* \* \*  
Were being cast upon  
\* \* \*  
You with awe and admiration  
\* \* \*  
At the killing you were  
\* \* \*  
About to make  
\* \* \*  
And then didja finally  
\* \* \*  
Come to the realization of  
\* \* \*  
The fact that you had  
\* \* \*  
Been riding for nearly  
\* \* \*  
An hour and hadn't been able  
\* \* \*  
To pick up a girl and  
\* \* \*  
Had to get your old  
\* \* \*  
Lady to ride around with  
\* \* \*  
You and enjoy that nice car  
\* \* \*  
Without any feminine company?  
\* \* \*  
I ask ya didja?  
\* \* \*  
Capt. L. E. Hobbs did!

G. CO. WINS TROPHY COVETED BY MANY

(Continued from Page 1)

From the looks of things at the outset he is certainly going to have it too.

To improve the machine

Practice — hours of practice. Every glee club knows the constant striving for improvement, for the coordinated smoothness essential to perfect harmony.

So, too, are Western Electric men engaged in the never-ending work of improving the machinery of telephone manufacture and keeping the stream of production flowing smoothly.

Even time-honored processes, such as the manipulation of rubber, are under investigation in order that newer and better methods may be developed. This striving for perfection—a spirit that regards nothing as finally standard nor too small for further improvement—permeates the Western Electric organization and offers inviting opportunity for alert minds.
