We are showing many new Gifts to help you in your selections.

WEEK'S NEWS

(Continued from Page 1)

plates were taken back to Dallas by airplane. Capt. Howard Woodall, well-known Dallas pilot, was employed to fly to College Station and bring the pictures back Thursday afternoon.

The trip was made in a little over two hours and the plates rushed from Love Field to the News by automobile where prints and zinc etchings were made in time for the pictures to appear in all editions of the paper.

The tenth International Student Volunteer Convention will be held in Detroit from December 28 to January 2. These conventions are held every four years, the last meeting being in Indianapolis. The purpose of the meetings is to promote not only a forum of student thought but an organ for missionary enterprise on the part of colleges and universities.

Texas Christian University has an-

nounced its intention of sending ten student delegates and one faculty representative to the convention, and Rice will send its full quota of ten delegates. Support is being sought in Houston from the downtown luncheon clubs, the churches, and student organizations at the Institute.

The convention will bring together between 3000 and 4000 college students from all over America and Canada, and speakers are being brought from all over the world. Some of the topics to be threshed out are: "Why Christians of other lands criticize our Christianity and our efforts to give Christ to them"; "If the time has come for Westerners to withdraw from the work of the church in other lands"; and "Why we have not been successful in presenting Christ to the world."

Speaking of the student convention reminds us that a religious census has been completed here, the number of Methodists giving them the lead with 718, and the Baptists next with 588. Students of other denominations are: Presbyterian 261, Christian 153, Episcopal 144, Catholic 129, Church of Christ 73, Lutheran 39, Jewish 15, Christian Science 12, Congregational 6, Protestant Methodist 6, Mohammedan 4, Evangelical 2, Unitarian 1.

The census is made by the Y. M. C. A. and was begun at the first of the year, when each student was asked to indicate his preference at registration. The census shows a total of 2,151 students with religious affiliation or preference out of the total enrollment of 2,400.

We have on hand a letter written to Prof. Fermier of the M. E. Department from the Dallas Aggies, expressing their appreciation of the A. and M. shield recently presented to the Dallas Club. The letter concludes, "The shield is beautiful, different from the others, in that it is solid, and we appreciate the fact that it was made at A. and M. College. The other shields are mostly stamped and are much lighter in weight." The Club voted that a note of thanks be sent to

Good enough for Dad— good enough for you

Everything New and Modern

Prof. Fermier and Dean Bolton.

The Pathe Exchange, Inc., and Harvard University, have made a contract for the preparation of a series of pictures dealing with different scientific subjects, to be known as the Pathe Science Series. These are designed primarily for university, college, and school uses, but will be appropriate for the theatre, the church, club and other social organizations. The series will be made from films selected by the Harvard committee from Pathe's vast film library which includes fifteen years of the Pathe News, nine years of the Pathe Film magazine, The Review, and eleven travel feature pictures.

The Science Series will be of a dual nature. One set of pictures of a highly technical nature and under the supervision of the heads of the various departments, will be for use in universities and colleges and will follow closely the corresponding courses in Harvard. The second series will be for use in grade and high schools and will be used in connection with school courses in geography, dealing with the physical conditions of life, the different types of man, and the adaptations to environment.

The film selected for these series will be classified, cut, assembled, and titled by graduate students at the University.

MACHINE GUN MOUNTING RECORD BROKEN

On Tuesday afternoon, November 22, a machine gun crew of juniors,
