YOUNGER COLLEGE MEN ON RECENT WESTINGHOUSE JOBS

The Holland Tunnel

Where do young college men get in a large industrial organization? Have they opportunity to exercise creative talent? Is individual work recognized?

THE HOLLAND TUNNEL is one of engineering's greatest triumphs, because—
—it is twice the size of any tunnel ever bored beneath the bed of the Hudson River.
—it is over a mile and a half long.
—it is designed for automobiles to use. Because they generate poisonous carbon monoxide gas,

motor cars create an entirely new need for tunnel ventilation. Yet even when the Holland Tunnel is filled to capacity and 2000 motor cars are passing through it in each direction, the air is fresh and pure.

This is a type of engineering undertaking with which young men in an organization of the size of Westinghouse frequently are brought into intimate contact. Opportunities to work on the

stupendous, the never-before-undertaken, are not rare here. Hence young men of capacity, of enterprise, of genius, find much to challenge their imaginations and abilities.

A battery of 56 fans driven by Westinghouse motors pump fresh air into, and foul air out of, the Holland Tunnel. Twenty-eight more Westinghouse-motored fans are a reserve. Westinghouse planned the lighting system in the tunnel; also the system of remote control.

DEBATING TEAM MAKES PRE-SEASON TOUR.
(Continued from Page 4)

teams for the coming season. Some of the teams who will debate here on the Campus are: Texas Christian University, McMurray, Bethany College of Kansas, and the University of Southern California.

Attention should be directed toward the coming debate with the University of Southern California. This will not only be the first debate on our own Campus this year but it will also be the first time a debate has been held with a West Coast College. The Query for the discussion will be: "Resolved; that Democracy is a mistaken Ideal."
