Parker Pressureless Touch - presented in Duofold Pens - asks no one to strain his muscles and exert his mind to do its job of writing. The ink connects with your paper a split-second sooner than the point, and its flow keeps pace with the speed of your hand by contact alone -not by pressure!

Pressureless Touch is Geo. S. Parker's 47th Improve-

ment, combining capillary attraction with gravity feed.

A census of pens in 13 technical schools disclosed that Parker leads in popularity 2 to 1. It was voted the favorite by students in 55 colleges. And a nation-wide poll conducted by the Library Bureau proved Parker the preference by 25% over the second pen and 48% above

Non-Breakable Barrels - 28% lighter than rubber, holding 24% more ink than average, size for size.

Step up to any pen counter and select your color and point. Look for the imprint, "Geo. S. Parker—DUOFOLD." Pencils to match, \$3 to \$5.
