

UNDER PREXY'S MOON

EARNEST LANGFORD

Even if you are not studying Architecture you should visit the fourth stoop of the main building and meet Mr. Langford. He is a fine fellow and a man worth knowing. He hasn't got a 'line' and he doesn't possess a high-pressure-personality, but he is just what his name implies, EARNEST, sincere, and upright. When you meet him you'll know him, and when you know him you'll admire him just as others have done since his Fish Days in '09. This quiet personality and steady character of his has, ever since those days, been gathering behind him a tremendous force of friends and influence which this year placed him as Head of the Department of Architecture.

Earnest Langford graduated with the class of 1913. After graduation he was employed for two years as an architectural draftsman in Austin. He returned to A. and M. as an Instructor in the Architectural Department until 1919 when he became a member of the same Department at the University of Illinois. He received his master's degree from Illinois in '24 and in '25 returned to A. and M. as professor of Architecture, and in four years worked up to Head of that department.

Three years ago he designed and superintended the construction of the first unit of the concrete stadium on Kyle Field. He has been awarded several prizes for his architectural designs. All in all, Langford is a real success, and we are sure proud of the fact that he is one of us—an Aggie.

M. P. FRANK

Frank hardly requires an introduction because most everybody on the campus already knows him. Last year he was in boots and buttons and lived in Hollywood with the Cavalry. Last June he received a B. S. in Civil Engineering and now is working towards a master's degree. All his

time this term however, is taken up in putting the sophomores over the hurdles of surveying and mechanics, and giving the juniors a run in strength. We are mighty glad Frank is back and wish him success towards his master's degree.

A. S. C. E.

(Continued from Page 1)

E. W. Steel, while the defense of the issue will be taken by J. M. Garcia and Prof. L. E. Grinter. The rules of the debate are "anything goes"—so that if the judges don't die laughing an answer shall be forth coming. It's all in fun and the club invites any and all who care to listen. An announcement of the meeting place will be published in the Daily Bulletin Friday morning.

The feature of last week's meeting was a talk on the present conditions and reclamation of the Brazos River by A. D. Jackson of the U. S. Agricultural Experiment Station. The address was immensely enjoyed and was followed by an open discussion on the prospects of harnessing and controlling this river and the benefits to be derived.

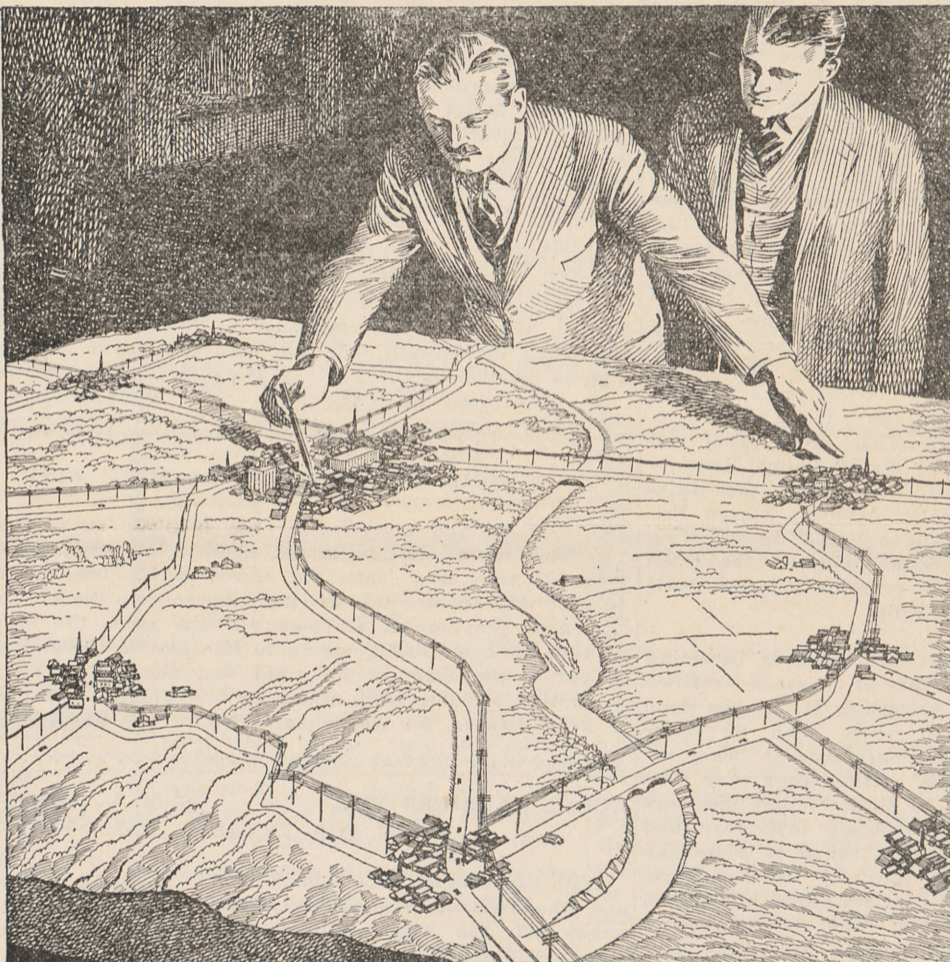

A report of the Corps Christi Convention by the club delegates is also to be heard at the next meeting. Some sixty future C. E.'s were present and it is hoped a larger number will be there for the fun next Friday night.

A well educated Vienna man has offered to sell the film rights to his suicide, which he is planning for the near future. The plans to blow himself up with a home-made infernal machine.

Two members of the family of the Rev. William A. (Billy) Sunday, have encountered marital difficulties in the past few weeks. Mr. Harriet Sunday, wife of George Sunday, has brought suit for separate maintenance. Mrs. Mae Sunday has filed suit for divorce from Billy Sunday, Jr.

A soccer game played last week between Worcester, Mass., and Worcester, England, for the purpose of developing friendship between the two communities, ended in a tie match of six goals each. Both teams were made up of amateurs.

Dr. Morton Prince, one of the country's most prominent neurologists, died recently at his home in Boston.

Key Town selling —a new telephone idea

Commercial development men of the Bell System have originated a new use of the telephone which is proving economical and efficient for modern salesmanship. From important central towns the salesman makes periodic visits to customers and prospects *by telephone*.

To conceive this idea, to make it practical

by selecting Key Towns on a basis of most advantageous rates to surrounding points, and to sell it as a business practice—all this illustrates how telephone service is as open as any commodity to constructive imagination.

Key Town selling is one of many indications of the steady demand, present and to come, for more and more telephone service.

BELL SYSTEM

A nation-wide system of inter-connecting telephones

"OUR PIONEERING WORK HAS JUST BEGUN"
