

DEDICATION

(Continued from Page 1)

throughout the huge structure and the famous Aggie Band of 110 pieces will play.

The first five sections of the stadium were put into use last year, these comprising the bulk of the west side of the structure. The initial units were erected by the J. E. Johnson Construction Company, of Waco, at a cost of \$100,000.00. Ground for the remaining sixteen sections, completing the huge U-shaped structure, was broken on July 8th, of this year and the concrete work finished on October 18th. The latter sixteen sections were built by Rollin J. Windrow, Dallas contractor, at a cost of \$265,000.00.

The completed stadium gives A. and M. College one of the finest athletic plants in the South. It has an actual seating capacity of 32,890, but this can be supplemented by temporary stands accommodating 5,000 at the open or South end if needed.

The credit, almost in its entirety, for the erection of the stadium, is due to the untiring, conscientious, unselfish efforts of Mr. Sullivan, who came here as a stenographer in the Secretary's office during the administration of President H. H. Harrington in the fall of 1908. He served in this capacity for two years, later was appointed secretary to the president and the board of directors for four years, and after acting as executive secretary of the Feed Control Service in the Experiment Station for six years, he was elected to manage the business end of the Athletic Department, where he has been making almost unheard of improvements for the last nine years. He has not missed a Thanksgiving Day game since his arrival at the College, twenty-one years ago.

"Sully," the name by which Mr. Sullivan better known when he accepted the position of business manager of athletics, found that the College owed the Athletic Council \$17,000.00, had no plans for the development of athletics, and practically no equipment. Now the department is equipped with the best equipment available and the complete athletic plant is worth \$525,000.00.

When asked to comment on the situation, Mr. Sullivan stated, "Never have I spent a happier time than the years spent at A. and M. College. The completion of the stadium is one of my greatest ambitions realized and has come much faster than I had ever expected. I have always wanted a worthwhile athletic plant and now that I really have one there is little else which gives me more pride.

There is no place I had rather live than College Station, among people whom I know to be my friends. The contract with the student body has afforded me great pleasure and through them, I have learned to know many throughout the state which I would have never known otherwise."

The brief speaking program will begin at 1:00 o'clock and the whistle to start the game which will write the dedication record in the Aggies athletic annals, will be blown at 2:30 o'clock sharp.

AGGIELAND MECCA

(Continued from Page 1)

and Texas Aggies will be fought.

The day of days is at hand. Already several thousand Exes are in Aggieldand for the annual gridiron tilt of national fame.

Preparations for this, the gala occasion of the year, have been in force for some time. Hotel reservations have been impossible to obtain both in Bryan and in the Aggieldand Inn, there being such a demand for rooms by those wishing to stay over after the game for the dances and other festivities that Mitchell and Foster halls have been ordered vacated to accommodate part of the students' friends and relatives.

According to the most accurate information received, there will be some thirty special trains, originating in various sections of the state and terminating at College Station to bring the large majority of the countless throngs to the New Kyle Field concrete stadium for the 2:30 p. m. initial play of the Texas Aggie-Texas Longhorn football game Thursday afternoon.

Streets of the college are to be closed to general traffic beginning Thursday morning so as to avoid hindrance to the heavy pedestrian traffic which will be encountered throughout the Turkey Day riot. Automobiles will be parked on the parade grounds as far as possible.

And then at noon between 11 a. m. and until such time as all visitors' palates are satisfied, an elaborate Thanksgiving dinner will be served in the Mess Hall. Students

will be treated as guests in the matter of compensation for their dinners.

Preceding the Thursday afternoon tilt will be the dedication of the \$350,000.00 stadium with Governor Dan Moody as principle spokesman for the occasion. Other distinguished visitors who will participate in the ceremony are President H. Y. Benedict of the University of Texas, Lutzer Stark, president Texas University board of regents; F. M. Law of Houston, president of the A. & M. board of directors; and President T. O. Walton of Texas A. and M., the latter presiding.

Temporary accommodation for the visitors and their baggage will be given at the Y. M. C. A. and at Guion Hall.

Succeeding activities of the turf-diffusing sport classic will be the Thanksgiving Hop which, even though lacking the customary dance-room decorations, will be as complete as ever due to the torrid orchestra obtained for the dance through extensive efforts of the dance committee members.

Because this will be the only Southwest conference game on Turkey Day, a state wide broadcast of the clash will be arranged for with main stations of San Antonio, Dallas, Fort Worth, and WTAU, College Station.

For the special benefit of cadets, the "relatively new" electrically powered Toonerville Trolley will make a special trip to Bryan in its former rapid transit style to accommodate those not wishing to remain on the campus??

Welcome to our college city Longhorn fans and Aggie faithfuls: You may be fully compensated for your efforts extended in being among those present.

AGGIES SET FOR STEER TILT

(Continued from Page 4)

and blocking in interference running. He is a real asset to the club. Hebe Dorsey, little blonde-headed comet from Cowtown, will see plenty of action in the fracas. His loose-hipped running has been a thorn in the side of every team he has played against this season. A broken hand has hampered him in his last year with the Ags.

The Steers will present backfield that has been outstanding all season. With little Nona Rees, brainy quarter, at the helm of the gigantic machine, they will be hard to stop. Dexter Shelley, Texas' claim to football fame, will start at the fullback position. Pap Perkins and Eddie Beular, two fast elusive backs are slated to hold down the half back positions.

Big 'un Rose, the outstanding end of the current season, will pair up with Rutledge Vining at the Texas Wing positions. Captain Gordy Brown and Billy Hargrove, will take care of the tackles. Curtis Beatty and Grover Emerson, two powerful guards, will be hard to get out of the center of the line.

The Steers' best defensive threat, Mac Burnett, will be at his old center position. The slim, wiry pivot man is probably the best of the lot in the Conference this season. He always turns in a great game. Watch him tomorrow.

Yep, the thirty sixth meeting of the ancient foes, should be one of those things you read about. Aggies to win by a touchdown.

F and B Club Holds Interesting Meeting

Mayo and Lee are Speakers of the Evening.

The Farmers and Bankers Club held its first regular meeting last Tuesday night in the lecture room of the Agricultural Building with an attendance of about forty members.

Doctor V. P. Lee, head of the Department of Agricultural Administration, gave a very interesting talk on the reasons for coming to college and what is benefited by attending. "It is not possible, said Dr. Lee, "to get a complete college education from our class room work. We must, and do, get a large part of training from other sources, and such organizations as the Farmers and Bankers Club are means to such an end." He also brought out the fact that if one tries to be serious all the time and keeps his mind in one channel he will grow stale very quickly.

The second speaker of the evening, Professor Thomas Mayo, gave a most interesting talk on the subject of "Inferiority Complexes." He distinguished between a feeling of inferiority complex along with many other points of vital interest and the talk proved to be quite an instructive one.

Prospects for A. H. Team are Bright

With one trophy permanently won and another to be competed for November 30 at Chicago prospects are bright for the Texas Aggie Animal Husbandry team, now on its annual tour of colleges and expositions in the north. The only setback met by the Aggie team thus far in the season is the illness of George Love, high-point man in the initial contest who was forced to return to his home at Del Rio, where he may be confined until after the Christmas holidays.

After winning the trophy at Wichita, Kansas, the Aggie team went to Kansas City, Mo., where they participated in the American Royal Contest with fifteen other colleges. They won first in sheep and fourth in horse judging. M. D. Lacy, Marble Falls, placed fourth in the 75 contestants competing.

The team is now in the contests at the University of Illinois and will leave Thanksgiving Day for their final and largest contest, the International Livestock Exposition meet at Chicago.

CORRECTION

The article in last weeks issue of the Bat on the tearing down of the old armory stated that "the labor for this work will be at the rate of fifty cents an hour, more than the eight hours work would bring at the regular student labor rate." It should have read "the labor for this work will be at the rate of fifty cents a day more than the eight hours work would bring at the regular student labor rate." This will make the pay for eight hours \$2.50.

A. AND M. FIGURES IN SOUTHERN ART EXPOSITION

Complying with the invitation extended them by the Southern Architectural and Industrial Arts Exposition, the Architectural Department at A. and M. has entered six plates in the exposition at Memphis, Tenn.

The purpose of the show is one of comparison of the works of entrants of the leading colleges of the country and no prizes are offered. Following is a list of the plates submitted and the names of the students who drew them:

- Memorial to Lindbergh's Flight—P. G. Norton.
- Greece and Western Asiatic Details—J. F. Martin and J. H. Norwoods.
- Charcoal Study of Zeus—J. L. Foxhall.
- Freehand Studies—Carlos Ordonez.
- Protestant Church Group—Royal Cantrel.

D'YOU S'POSE

If you cared just a little bit,  
How do you s'pose I'd know?  
And if you do—I think you might  
Try once to tell me so!

And if you longed to kiss me—  
If you only would dare!  
Would I withhold one little kiss?  
Do you imagine that I'd care?

If you should try to steal that kiss,  
Now, do you reckon I'd oppose?  
Couldn't you just try it once—  
D'you s'pose?

—M. J. M.

NEW PROCESS. Make fine cream and chocolate candy without cooking. Recipe 10c coin. Material obtained in your home town. Make your own candy at home or make in quantity and sell to stores at a profit. New Process Candy Co., 810 Campbell St. Kansas City, Mo.

WHAT YOUNGER COLLEGE MEN ARE DOING WITH WESTINGHOUSE

This 5,000 h. p. motor in the Columbia Steel Company's plant, with its frame of arc-welded steel, is physically the largest synchronous motor ever built.

Ninety days to go—  
teamwork wins

While you Seniors were shuffling worries about machine stresses and saturation curves with those of football last fall, a group of your predecessors, not so many years ahead of you, were playing the game with grim realities.

The Columbia Steel Company of Pittsburg, California, completed plans on September 12th to build a new tinplate plant. On the 13th they gave an order to Westinghouse for two 5,000 horsepower synchronous motors to drive the rolls, to be physically the largest synchronous motors ever built. Delivery of the first was wanted in ninety days.

Ninety days in which to design, manufacture, assem-

ble, test and ship any large unit, let alone a new achievement in size and type of construction, affords no time for idle speculation. Westinghouse men went at the job as only an experienced and thoroughly equipped organization could do. And on the scheduled date, four flat cars and a box car rolled out of the Westinghouse plant, carrying the completed and tested motor.

It was an industrial victory, as satisfying as any athletic gain. Teamwork and individual skill had won. Westinghouse had once more made good and upheld the reputation that earns the big electrical jobs for Westinghouse men.
