HEATING SYSTEM IS IMPROVED

A very decided improvement in the water heating system of all the dormitories except Hollywood, Law, and Puryear was accomplished by the Buildings and Grounds department of the college during the past few months.

Two systems of heating are now employed in contrast to the one which existed last year, \$7,000.00 representing the expenditure for the necessary changes.

Formerly it was necessary to turn steam heat into all the rooms of the dormitories so that hot water might be available for the bath room and the system required an expensive regulator and heat booster at each point of distribution which was being continually bothered by students and which required extensive repair and replacement each year. It is now possible to obtain hot water at any time desired through a separate circuit including a 4-inch hot water line to the dormitory showers and a 2 1-2 inch return to the power plant connected to a recirculating pump which will keep hot water at the desired points when such points are not using enough water to overcome the heat losses in the pipes.

Also the water is now heated by exhaust steam through a heat exchanger and is capable of heating 20,000 gallons of water per hour.

A saving of \$1,020 a year has

YOU'D BETTER LOOK INTO THIS PAUL WHITEMAN MATTER!

HERE'S a new Paul Whiteman record that's a real smash. Just as always, the King of Jazz sets the pace for the finest in modern dance music.

If you pride yourself on knowing the smartest and latest dance arrangements, you *must* hear these two great talkie hits played by this master bandsman.

And these others are worthwhile, too. . . .
