everything that is said to him. It is an amusing game.

So when you have finished practically all of your major engineering work and all of your dry, uninteresting courses sign up for one that will give you a kick. If you don't say at the end of the term with all of the others, that you enjoyed it you will be without a sense of humor and something is evidently wrong with your otherwise perfect constitution. If you stutter or if you can't stand being laughed at or if your knees play Old Black Joe with each other when you speak before an audience, be sure that you take this course, for, after three months of this man's tutoring you could tell the dizzy-eyed world just what it looked like.

We are a merciless corps of cadets.

We are inclined to laugh at the other fellow's misfortunes and the only time we smile is when someone else has received the raw end of the deal. We laugh out loud when the "roomit" loses his best girl and ache all over when we lose ours. SLANT'S!

Once in a blue moon, one finds a prof that will conduct a normal informal, interesting class and while doing it teaches you the art of keeping awake in class and of becoming a modern Demosthenes. In addition to this, without hurting your touchous little feelings, he razzes you and floats you out higher than a corker the Roosevelt dam. If you ever have the last word, in a battle of wits with him, consider yourself very intelligent—as well as lucky for it has never been done yet. And if he is inclined to make merry at the expense of the editor-in-chief of the Battalion it is not because he doesn't like him but merely because he wants the latter to take a different attitude towards life and the Art of Making a Public Speech.
