Bull Pens Among Fish Sponsored

Somewhat of a supervised "Bull-Pen" of Freshmen and chosen upperclassmen was begun recently under the auspices of the Y. M. C. A.

The discussions are scheduled over the entire campus on each Tuesday night, at which time such topics are discussed as, "What are we in college for," "The mistakes of college life," and, "what should a student get out of four years in college?"

The discussions are held for, and by the freshmen in every case, but to help out in any complex problems which might arise, the Freshmen in each military organization designated some outstanding man on the campus whom they desire to meet with them and take part in the discussion. The meetings are held in some convenient place in the various dormitories where plenty of fresh air is available.

The sole purpose of the plan is to promote sound thinking among freshman and to help them solve some of the problems that naturally arise after the jump from high school to college.

At the close of the discussions groups which are scheduled for about ten weeks it is most likely that a banquet will be given to all freshmen who attend at least nine of the meetings.

Parents of 57 striking high school pupils, have opened a school for their youngsters in a church rather than allow their children to cross several railroad tracks daily going to and from a new school building to which they have been assigned by educational authorities.

STATUS OF P. E. NOW TO BE MAJOR

Several New Courses Also to be Added to Curriculum.

At the request of the Department of Physical Education, and in response to a growing demand and necessity for this type of training in the College, the general faculty has approved a number of new courses in physical education, to be offered in the session 1930-31 and thereafter. These courses will be made the basis for a major in Physical Education, given in the general curriculum in Liberal Arts, and leading to the degree of Bachelor of Arts.

Following is the revised list of courses in physical education:

Physical Education 203-204 (2-4), Methods in Physical Education; Physical Education 206 (3-0), Personal and Community Hygiene; Physical Education 305-306 (3-0), Public School Physical Education; Physical Education 311-312 (3-2), Fundamentals of Athletic Coaching; Physical Education 401-402 (3-2), Theory and Practice of Athletic Coaching; Physical Education 403-404 (3-0), Organization and Administration of Physical Education.

W. L. Penberthy of the Depart-

ment of Physical Education will have immediate charge of the work, and he will be assisted by other members of the Department.

Detailed information regarding the major in physical education may be secured from Mr. Penberthy or from burg, Copenhagen, Berlin, Dresden,

SURVEY MADE OF 100 LEADERS

Interesting Facts About 100 Prominent Business Men Revealed.

College halls seem to have a decided edge on the little red schoolhouse as a training ground for industrial leadership, according to facts just compiled by The Sherman Corporation, engineers. The careers of one hundred men who direct the destinies of many of the richest industrial corporations in the United States were studied, as presumably being typical of the careers of executives in places of large leadership. Only 22 received a formal education limited by the walls of the red schoolhouse. Fourteen went on to secondary school but did not go to college. Sixty-four attended college and three out of the 64 took advanced degrees.

The study was made in connection with the Sherman Corporation's re-

searches into the present trend toward merger, after these merger searches had seemed to indicate that management leadership is the factor of limitation in merger successes.

Only 4 of the group are of foreign birth. Twenty-nine per cent are of rural origin. Forty per cent were born in cities of over 100,000 population. Seventy-one per cent originated in communities of 5,000 population and over.

The ages of the men studied indicate that from 50 to 70 are the years when large leadership capacities come to fruition. Only two men of the group are in the 30-40 year decade; further age grouping being by decades—40-50, 13 men; 50-60, 34 men; 60-70, 35 men; 70-80, 14 men; and over 80 years of age, 2 men.

An analysis of first jobs indicates that white collar beginnings just about break even with "blue shirt" beginnings. The largest number, in any one class of first jobs, is represented by clerking. One out of ten of the men rose in a direct line, that is their positions today are the direct results of humble beginnings in the same company or in an allied line. Law and teaching have contributed several leaders to industry, according to the study.
