

DID YOU KNOW

Ball playing started about 4,000 years ago?

There is a star in the universe which if put in place of the sun would raise the temperature to 7,000 degrees Centigrade; another would lower the temperature of the earth enough to liquify the air?

There are only about 3,000 members of the Ex-Students Association?

About 750 students were granted passes the last week-end we had no inspection?

There is one valve in the Colelge plant which weighs 3,200 pounds?

A new circulation pump in the College awter plant system pumped 1,650 gallons of water per minute?

The total tractive power of all the steam locomotives in Class 1 rail-ways last year was 1,289,898 tons?

A railroad train 5,740 miles long could be made of the equipment re-turned from service by Class 1 rail-roads of the United States in the last seven years?

FLASHES FROM EVERYWHERE

A straw vote on the Eighteenth Amendment held by the Targum, un-dergraduate weekly at Rutgers Uni-versity, revealed that the majority of the students at the university, while they are themselves abstainers, are against the Amendment.

The annual Shakespeare birthday festival at Stratford-on-Avon will commence April 21, and continue for five weeks. The regular summer fes-tival of Stratford-on-Avon will be-gin July 7, and continue until Sep-tember 13.

The results of a vote among New York State students at Vassar Col-lege (for women) on the Albany Bill to abolish capital punishment, result-ed in a vote of 160 in favor of the bill, 130 opposed and 55 undecided.

HARTFORD, Conn.—At least two “college degree mills” are at present operating in this state with full au-thority of the law, according to Al-bert B. Meredith, State Commission-er of Education, who has made an investigation, pending an effort to have the state legislature take an interest in the matter.

The Poet's Corner

ALL KIND OF BOYS

There's the ugle boy,
And the witty boy,
And the jellybeans who dance and
pet,
The boy that's a flirt
And the boy that “does you dirt,”
And the boy who's hard to get.

There's the “dumb” boy,
And the “rum” boy,
And the boys who imitate the Shiek,
There's the boy who offers a smoke,
And the boy who is always broke;
And the boy that's “seemingly” so
meek!

There's the blase boy
And the passe boy,
(The kind who comes up to the door
for you)
There's the candy boy,
And the handy boy,
And the boy to whom “we say” we're
true!

There's the “cave type” boy,
And the “rave type” boy,
And the boy who's just a pal,
There's the boy who's athletic

And the boy who's a “stick”
And the boy who's “looking for a
gal.”

There are many “Misters,”
Oh girls and sisters!
Than are named in this hymn,
But the best of all,
And the ones for whom we fall,
Are the boys of Texas A. and M.!

A. & M. SENDS MEN TO A. I. E. E. MEET

Five Representatives Attend Inter-
esting Convention of Seventh
District of A. I. E. E.

At the annual meeting of repre-
sentatives of all the schools of the
seventh district of the A. I. E. E. last
Friday and Saturday at the Univer-
sity of Missouri in Columbia some
of the latest developments in tech-
nical electricity was learned. Those
attending the meeting from Texas A.
and M. were H. C. Dillingham, as-
sociate professor of electrical enigi-
neering; P. M. Honnell, Sam Mosely,
T. M. Sowell and T. G. Banks, Jr.

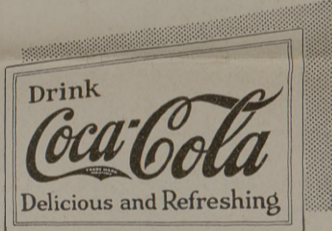

The convention opened at nine
o'clock Friday morning with coun-
selsors meeting; and continued during
the afternoon with the presentation
and discussion of seven of the four-

teen technical electrical papers pre-
pared for the convention. Among
the subjects of the papers may be
mentioned “Corona Losses in High
Power Transmission Lines,” “Prac-
tical Problems of Sound Reproduc-
tion in the Theatre,” and “Telephoto
Experiments,” the second named sub-
ject winning the trophy for the best
paper of the convention and being
written by Eldon Peek of the Okla-
homa A. and M. College.

The remaining seven papers were
presented and discussed Saturday
morning, the convention being con-
tinued on into the afternoon and ad-
journing after the meeting of all stu-
dent branch officers and after the
decision that the convention would
be held in Kansas City had been made.

A very colorful event new to the
representatives from A. and M. was
the St. Patrick Knighting Ceremony
Friday evening wherein old St. Pat-
rick knighted the candidates for en-
gineering degrees, and after the last
candidate had passed, the Saint pass-
ed from sight amid a camouflage of
dense smoke and was not to appear
until the St. Patrick's Ball Saturday
evening.

It is hoped that those attending
the convention will remember the en-
gineering displays well enough to
give impetus to our coming Engi-
neering Day with a reproduction of
some of them.

**Your good deed
for today**

the **Pause**
that refreshes

No matter how busy you are—how hard you
work or play—don't forget you owe your-
self that refreshing pause with Coca-Cola.

You can always find a minute, here and
there, and you don't have to look far or
wait long for Coca-Cola. A pure drink of
natural flavors—always ready for you—
ice-cold—around the corner from any-
where. Along with millions of people every
day, you'll find in Coca-Cola's wholesome
refreshment a delightful way to well-being.
