Steps in Manufacture of Cotton to be
Explained Saturday.

Exhibits of the Textile Engineering Department in the Engineering Show Saturday, will comprise a demonstration of the manufacture of cotton goods from the raw cotton to the finished cloth for both plain and fancy design.

In the picker room, where the cotton is received, the preliminary steps through which the cotton passes will be explained. A demonstration of carding, drawing, slubbing, spinning, spooling, wrapping, and slashing will complete the exhibits on the first floor.

The process of both plain and fancy weaving will be demonstrated on the second floor, with the Jacquard looms in operation to show how the fancy materials are produced. There will also be an exhibition of the administration of the finishing touches that are necessary before the cloth is sent to the consumer.
