

Campus Layout To Be Shown On Model

A campus model showing the entire outlay of grounds and buildings of A & M College is to be started soon by Dr. F. E. Giesecke, college architect, it was learned from that department recently.

The model will be of moulding material on a table about twelve feet by ten feet in plan dimensions and will show contours, lakes and other ground characteristics as well as buildings, to proportional dimensions on a small scale.

The purpose of the model is to assist the college architectural staff in making building locations and other college structural improvements of the future, Dr. Giesecke said.

Work on the campus model will begin as soon as attendance records show no dormitory demand for Ross Hall, this allowing Dr. Giesecke and his staff to move into the building. Work on the model will continue until all present equipment of the College is placed, and other improvements will be added as additional improvements are made to the College.

The engineering Experiment Station staff and possibly the freshmen architects, with senior instructors, will probably move into Ross Hall with the college architect's staff, it was learned.

Two Additions To Experiment Staff

Addition of Paul A. Cunyus, former assistant county agent of Bexar county, as assistant poultry husbandman, and of John H. Jones, Fort Worth, as animal husbandman in the Extension Service of the A & M College of Texas gives the Extension Service an increased staff for the coming year.

Cunyus assumed his duties August 1, and will devote the majority of his time to the marketing phases of poultry.

Jones assumed his duties as assistant animal husbandman in charge of beef cattle investigations in the recently released tick areas and those areas in the process of being released, September 1. He will work closely in cooperation with county agents in the supervising and getting records on beef cattle feeding and management on the farm.

Buford Well Pleased Yell Practice Crowd

"I am well pleased with the attendance and interest being shown in yell practice thus far in the season," Fred Buford, chief of the yell staff said in commenting upon the attendance of the first few nights. "I only hope that attendance throughout the year will be equally as good," he added.

Books containing the college songs and yells, and copies of "There Shall Be No Regrets", new song by Curtis Vinson and R. J. Dunn, have been on sale for several days and will continue to be on sale in room 80 Milner, Buford announced. All cadets who have not obtained books or copies of the song or who wish to get extra copies to send away may get them from Buford at that place.

"With the books and songs well distributed we should be able to notice a marked improvement in the yell practices of the next few nights and with the freshmen particularly laying stress on them, our yells should be almost perfect Saturday," Buford said.

Technoscope Staff Announced by Laney

Plans for the first issue of The Technoscope, magazine published by the students in the School of Engineering are well under way according to announcements by J. E. Laney, editor-in-chief of the publication.

There will be four issues of the magazine during the current college year, featuring articles on engineering topics and phases in non-technical language for the promotion of new developments in engineering research.

The magazine is published under the supervision of the Faculty Advisory Committee, and has for its aim a membership in the Engineers' College Magazines Association.

The editorial staff: J. E. Laney, Eastland, editor; A. C. Showman, St. Louis, associate editor; Willis Collins, Schenectady, N. Y., and W. N. Keisling, Stanton, associate editors; C. V. Ellis, Wichita Falls, publications editor; J. W. Mims, Cleburn, assistant publications editor; and W. D. Staples, San Antonio, articles.

The business staff: John W. Simons, Orange, business manager; W. M. Andrews, Abilene, associate business manager; C. L. Pickett, Post, sales manager; H. A. Eddins, Marquez, circulation manager; D. F. Cheaney, Electra, accounts manager; J. A. Shellberg, Ft. Worth; J. A. Cotton, Abilene; A. H. Grantham, Mc Gregor; H. P. Carothers, Pyote; W. E. McCorquodale, Orange; H. F. C. Rumpf, Dallas, and F. R. McIntosh, Covina, Cal., assistant business managers.

J. K. Norwood Dies In Houston Sat.

J. K. Norwood, student of the A & M College from Beaumont, died Saturday afternoon, September 20, in Herman Hospital, Houston.

Norwood was a member of the class of 1932 and a student of architecture. He is the only student who ever made enough points in the Beaux-Arts Institute of Art to progress from one grade to the next before the expiration of any school year.

Norwood, in his two years as a member of the cadet corps, demonstrated characteristics which marked him as a man possessing abilities which would have made him an invaluable asset to the school.

Yes, the intellectuals always have microscopes before their eyes.—Professor Albert Einstein.

New Profs Added By C. E. Department

The beginning of a new year brings to the campus of A & M not only students but new faculty members and although a complete list of faculty changes has not been learned, a few of the engineering departments have given their improvements.

In the civil engineering department C. S. Adams of the 1930 graduating class and L. A. Comp, Oklahoma University graduate, will give part time to the drawing department, while S. A. McCosh is absent to instruct in Colorado School of Mines at Golden, Colo.

W. E. Long, '27, after one year at Westinghouse and two years at Texas Tech at Lubbock, comes to the mechanical engineering department along with W. I. Truettner of Michigan University, who has completed a year in commercial work and two years of master of science work as graduate assistant in Michigan University's school of aeronautics. J. A. Oakey, who spent last year with the mechanical engineering department, returns to his Alma Mater, Michigan University, as hydraulics instructor.

L. M. Haupt, jr., '27, takes R. F. Wick's place as instructor in the electrical engineering department after working with the Westinghouse company for a time.
