The Battalion Offers You The Best and Easiest Method of Keeping in Contact with Them.

Proposes Limiting Football Schedules And Reducing Period of Eligibility

CLEVELAND, O.—Limitation of intercollegiate schedules, reduction of intercollegiate athletic eligibility to one or two years, organization of two or more teams in each sport, and endowment of college athletics were proposed as possible means of reducing emphasis on intercollegiate football by Prof. Joseph E. Raycroft, speaking before the American Association of University Professors here.

Prof. Raycroft, chairman of the association's committee on student health and athletics, admitted none of the proposals were original with him, but said he believed them the best of the many solutions being offered in the widespread discussion of the problem.

He indicated little alarm over the situation, saying there was a general decrease of interest in intercollegiate

football on the part of the undergraduates themselves, who often preferred other diversions while big games were going on.

"I think the next five years will find considerable improvement in the condition," he said, "as is already being evidenced in a number of institutions."

"The plan of Dr. Nicholas Murray Butler, of Columbia university, to have the alumni endow undergraduate sports, both intercollegiate and intramural," the Princeton professor said, "was an old plan 30 years ago. It was then proposed by Dr. Charles R. Harper, the first president of the University of Chicago."

Although the organization took no official action on Prof. Raycroft's suggestion, there was considerable informal discussion of the entire athletic situation.

Discover Dinosaur Tracks In Canada

OTTAWA, Canada—Discovery of footprints of dinosaurs along the Peace River in British Columbia, among the foothills of the Rockies, is believed here to throw new light on the life and habits of these prehistoric monsters.

The footprints were of five different species of the animals, the animals ranging in size from 12 feet long to 35 feet long.

At that time, when the animals lived, the section in which their footprints have been found, was tropical in climate, and was on the shore of a great salt water sea which stretched northward from the present Gulf of Mexico to the Arctic Circle.

The discovery was made 475 miles north of the international boundary line.

Sixteen Student Clubs Meet In New Library

It was learned from a statement recently made by Thomas F. Mayo, librarian, that sixteen different student organizations, all with an intellectual purpose, meet in the Asbury room of the new library. Dates for club meetings were drawn for by the presidents or a representative from the various organizations. The clubs are as follows: The Press Club, Architects' Club, The Hillel Club, Engineer Seminar, Scribblers Club, Round Table, Industrial Arts, Junto Club, Debating Club, Accounting Club, Scholarship Club, The Fortnightly Club, The Agricultural Administration Club, The Agricultural Engineering Club, The Pre-Med Club, and The Dramatic Club.

PHILADELPHIA, Pa. — James Bond, of the Department of Vertebrate Zoology at the Philadelphia Academy of Natural Sciences, has started on a trip to the West Indies where he is planning to collect birds for the museum here.

A Wellesley student can now invite a Harvard man to "in" dances at the college, and can smoke in a canoe, but she cannot own an automobile according to students.

A new course in government at Barnard College for Women will allow students in the course to go to all parts of New York City to inspect at first hand the manner in which various phases of government operate.

The chief lesson of history to those who have eyes to read is that history throughout is the history of freedom. —Senatore Croce.

Plants for the assembling of Ford cars and trucks are being built by Henry Ford in Bombay, Calcutta, Madras and Multan. Indian natives are to be added to the sales staff of the company in India.

RIVER SCENE OF COLLEGES

MIDDLETON, Conn.—That the Connecticut River has on its banks more institutions of higher learning than any other in the world, including the Thames, in England, is the claim set forth in an article from the Boston Transcript, reprinted in the Wesleyan Argus here.

From north to south, on the banks of the river, these institutions are:

Dartmouth, at Hanover, N. H., Norwich University, in Vermont; Northfield and Mt. Hermon Seminaries in Massachusetts; Amherst College, Massachusetts Agricultural College, at Amherst, Smith College, Mt. Holyoke, two colleges at Springfield, Trinity College and Hartford Theological Seminary at Hartford, and Wesleyan at Middletown.

Until recently the Berkeley Divinity School was on the banks of the river, and for the first fifteen years of its existence Yale University also was so situated, at Saybrook.
