

CARLTON NAMED SULLIVAN SUCCESSOR

Faculty Approves Adoption of Five Year Plan For Architectural Design

Thursday Final Day For Exchanging Y Tickets

Final date for the exchange of "Y" cards for this term has been set for Thursday, February 12, from 1 p. m. to 7:30 p. m. All students will present their identification cards to receive new cards.

A bill board has been put in the entrance of the Assembly Hall, and a schedule of the shows for a month in advance will be kept. Particular effort is made to secure the shows at the earliest possible date, and several excellent ones have been booked for this month and next. The following is a partial list with dates of the shows that will be here during the next few weeks:

February 14, afternoon—Free Love, at night—Just Imagine.

February 18—The Boudoir Diplomat.

February 20—The Right To Love, (Benefit Show).

February 21, afternoon—Laughter; night—Lightin'.

February 25—The Painted Desert.

February 28, afternoon—Rich People; night—The Eyes of The World.

March 4—Paid.

March 6—Morocco, (Benefit Show).

March 7, afternoon—Only Saps Work; night—Be Yourself.

March 11—Sin Takes A Holiday.

March 14—The Big Trail.

March 18—Love In The Rough.

March 21—The Sea God.

March 25—Min and Bill.

March 28—The Spoilers.

Shakespeare Players To Appear February 24

On February 24 "Julius Caesar," and "Macbeth" will be presented in the Assembly Hall by The Shakespeare Players, an American company, under the auspices of the Campus Theater Club.

Claire Brue and James Hendrickson, who are among the foremost Shakespearean players of the day, head a well rounded company. The diction of the American players, it is believed, will be much easier to understand than that of the British players, who appeared during the early part of the season.

This is the third of a series of productions being sponsored here this year by the Campus Theater Club. It is the intention of the club to bring high quality shows to College Station where they can be shown at very moderate prices.

A & M Students As Rule Return Money Borrowed

Whatever may be the failings of the A & M cadet corps, one of them certainly is not the failure to pay back money borrowed for educational purposes. Although during the last seventeen years the college has loaned hundreds of thousand dollars all except one-half of one percent has been returned, according to S. G. Bailey, secretary to the president. In the last seven years the Association of Former Students has loaned many thousands of dollars and only one third of one percent is still unpaid.

During this scholastic year a total of \$160,000 has been advanced by the two loaning agencies on the campus, \$20,000 more than last year. Notes

ADD GENERAL COURSES IN ARCHITECTURE AS SENIOR ELECTIVES

The faculty of A & M has approved the adoption of a five year course in architectural design in the department of architecture to be effective in September, according to Ernest Langford, head of the department.

Mr. Langford, in comment upon the change, said "The American Institute of Architects, through its committee on education, the Association of Collegiate Schools of Architecture, and the various schools offering courses in architecture, have long realized the necessity of extending courses in architecture to five years. The department of architecture at A & M has realized the desirability of such a program, and, after some five years of study, a curriculum to include a five year course in architectural design was presented to the general faculty on Wednesday, February 4."

Among some eighteen or twenty other institutions in the United States offering five year courses in architecture are Alabama Polytechnic Institute, Yale, Harvard, Cornell, Columbia and the state universities of California, Ohio, Oregon and Pennsylvania.

In addition to the five year course in architectural design, another plan was devised whereby those students who are not taking architecture but who desire a general knowledge of the fine arts and history of architecture may take the prescribed courses in the department of architecture as electives.

Mr. Langford says that of the ten suggested courses to be taken as electives, the course which is particularly desirable is the study of fine arts which includes the following: a general survey of the history of the fine

Longhorn Opening Sales Campaign On Monday, Feb. 16

Beginning next week the Longhorn staff is opening a subscription campaign under the supervision of Karl Watterson, business manager, the object of which is to sell as many extra copies of the publication as possible. Subscriptions will be taken in the Longhorn office or in 42 Goodwin until February 25.

According to the advance reports received, the new Longhorn is to be more pictorial and colorful than heretofore. While the Longhorn staff does not make any claims for the yearbook, it feels that, due to the slight change in arrangement, it will be more interesting to the student body as a whole.

There has not been as much advertising this year as in former year, but the staff believes that the interest for the publication is still in the corps, and that the appreciation of the corps will be shown in the coming campaign.

Modified Ring Is Chosen by Juniors

ADOPT RING ONLY SLIGHTLY DIFFERENT FROM THOSE OF PAST

Voting to adopt the modified ring presented for their approval by the class ring committee, members of the junior class Sunday made definite selection of the 1932 senior ring. Balloting was close.

Sankey Park, local jeweler, has been chosen dealer by the ring committee, and has given notice that orders may now be placed. Prices are the same as in former years.

An effort is being made to enforce a restriction upon the purchase of the rings, making them available this year to the class of '32, and present seniors desiring to obtain them, Jack Hurley, chairman of the ring committee, stated.

In accordance with the agreement with the manufacturer, if this ring had been voted down, none would have been made. It is not a radical change from types used by other classes, merely adding a band bearing the words "Texas A & M College" in bold faced lettering around the head.

Announce Summer Camp Locations

Final dates and arrangements for the summer ROTC camps have recently been made, according to Major J. E. Sloan.

The infantry, signal corps, and artillery will be at camp Bullis, San Antonio, from May 31 to July 11. During the same period the engineers will be in Ft. McIntosh, Laredo, and the cavalry, at Ft. Clark, near Bracketville. A limited number of students of chemical engineering will be allowed to train at the Edgewood Arsenal, Maryland. They will begin June 12 and continue until July 23.

Major Sloan also said that 38 members of this year's graduating class will be given the opportunity of attending O R C camps immediately after graduation. The rest may attend during July or August if they so desire.

Film Is Presented At A S M E Meeting

At the regular semi-monthly meeting of the A S M E, held Thursday February 5, in the Mechanical Engineering building, the technical film, "Happy Landings", was shown.

The picture dealt with the various processes that must be completed in order to turn out a perfect parachute. Views were shown of the Japan silk industry, the special weaving necessary, the attachment of rope, and the final packing of the product. Several slow motion jumps done by army jumpers gave added thrill to the exposition.

Seventy members and visitors were present. The next meeting will be held February 19 in the M E building.

DR. FROST CHAPEL SPEAKER

Dr. S. E. Frost, pastor of the Congregational Church at Austin will occupy the pulpit for chapel Sunday, February 15. A selection by the Glee Club will be given.

A & M Graduate and President Fort Worth Ex-Students Will Take Over Duties As Business Manager July 1

SENIOR RECEPTION

Invitation to the annual senior reception to be given by President and Mrs. T. O. Walton Monday evening was extended to members of the senior class by Ray Walker, class president, Tuesday. The reception will be held on the lawn of the Walton home. Uniform Number One will be worn.

Debaters Will Meet Weber College Team

Professor C. O. Spriggs, coach of the debating team, announced recently that a team yet to be selected from the A & M Debating Society, will represent A & M in a debate with representatives from the department of public speaking of Weber College, Ogden, Utah. The A & M team will have the negative side of the question, "Resolved That All Nations Should Adopt the Policy of Free Trade". The argument will take place in the lecture room of the physics building at eight o'clock on the evening of February 23.

Mr. Spriggs remarked that the A & M team was victorious last year when they debated with representatives from Weber College on a question of disarmament.

Junior Livestock Judges Working

Daily work-outs are being held by candidates for the junior live stock judging team which will be selected in a few weeks. The team, composed of six men, will represent the college in a live stock judging contest at the Fort Worth Fat Stock Show in March.

Through a process of elimination the best men will be selected and will be given final coaching here before leaving for Amarillo to attend the Amarillo Stock Show the week before the Ft. Worth show. While in the Panhandle, they will judge some of the fine live stock that will be exhibited at that show and get ready for their contest.

At Ft. Worth they will enter in competition for stock judging honors with teams from other schools. The animals at this show will represent the best of the finest herds in this part of the country and by grading this show, it is hoped some fine material for the team that will to the American Royal Live Stock Show next November will be developed.

A large exhibit from the college is being prepared to be sent to Ft. Worth and will consist of about six carloads of animals. There will be a car load each of sheep, swine, and horses and three carloads of cattle. This exhibit, consisting of some of the best examples of pure bred live stock, has wide reputation in the show ring, and receives recognition where ever it is entered.

IS NOW AVIATION AND CONVENTION MGR. FORT WORTH C. OF C.

D. W. Carlton, aviation and convention manager of the Fort Worth Association of Commerce since 1926, will succeed James Sullivan, recently resigned, as business manager of athletics at A & M, it was announced Monday by Dean Charles E. Friley, chairman of the A & M athletic council. Carlton advised of his acceptance in conference Monday at Waco with Coach Madison Bell, and he will assume his duties here July 1.

Carlton is a graduate of A & M of the class of 1923 and as aviation and convention manager of the Fort Worth Association of Commerce during the past four years he has had much experience in handling large crowds and in dealing with the public. He is president of the Fort Worth A & M club and since his graduation from the college has taken an active and outstanding part in A & M former student activities.

Carlton is thirty years old and is married. He took his B. S. degree in agriculture at A & M. After graduation he taught in the Fort Worth public schools and held a position with the city health department there. In 1926 he became connected with the commerce association. He is a Shriner and captain of Field Artillery, Officers' Reserve Corps of the United States Army. He came to A & M as a graduate of the Central high school at Fort Worth. In his high school days Carlton took part in athletics and at A & M he went out for baseball although he did not make his letter.

Much gratification was expressed by members of the athletic council and Coach Bell over Carlton's acceptance of the post at the college.

Textile Engineering Dept. Given Oil Spray

Through the influence of J. J. Brown, Weston, who graduated from A & M in the class of 1928, an oil spraying apparatus valued at \$200 has been donated to the department of textile engineering by the Borne Scrymser Company, oil refiners. Professor John B. Bagley, head of the department, explained that the device is used in spraying cotton with a light grade of oil as it goes into the first processing machine.

The apparatus is an invention of the Borne Scrymser Company and is handled by them, however, their chief revenue is derived not from the distribution of the pump, but from the sale of the oil used in its operation.

Mr. Brown is a representative of the company and he personally attends to the installation and adjustment of the small machine. The chief feature of the appliance is that it is so regulated that the cotton is allowed to absorb only 2% of the oil. The purpose of the machine is to prevent the fly waste of cotton that is caused by the centrifugal force of the mill machinery.
