

INTRAMURAL TEAMS TANGLE IN ANNUAL FOOTBALL CLASSIC

Cavalry, First Artillery, Engineers, and Secondary Artillery Are Victorious.

Featuring the brilliant ball carrying of Welbert Randow, the Cavalry squadron football team established themselves as strong contenders for the intramural title again this year when they defeated the Second Infantry team 15-0 Sunday afternoon. The Cavalry Squadron won the intramural championship last year. The Cavalry team made two touchdowns and a safety to run up their score of fifteen points. In the first quarter long runs by Randow brought the ball to the Infantry one-foot line where it was lost on downs. A bad pass by the Infantry center was responsible for the safety. The two touchdowns were made by the Cavalry team on straight running plays.

In the game between the First Infantry and the First Artillery, an intercepted pass in the last minute of play was responsible for the lone score when the Wagon-soldiers triumphed over the Paddles 6-0. The intercepted pass, caught in the flat zone, was returned for the touchdown. Both teams were strong on the defense. The First Infantry were champions in 1931 and lost to the Cavalry last year by a tie game in the championship match between the two teams. The First Artillery has been close to the top also for the last two years.

The Second Artillery and Signal Corps played a hard game in the mud, but neither was able to score although the ball was advanced from one end of the field to the other by each team. The slippery condition of the field made passing difficult, but a remarkable number of these tried were completed.

The Engineers defeated the Coast Artillery 12-0. Charlie Rollins, playing his first game of football, caught a 25-yard pass to score one of the touchdowns for the Engineers.

RESULTS

American League
Field Artillery 6 First Infantry 0
Second Artillery 0 Cavalry 15.

National League
Second Artillery 0 Signal Corps 0
Engineers 12 Coast Artillery 0.

Remaining games are scheduled for January 15 and January 22.

Soils and Pressures Discussed By Former Student At Joint Meet

S. J. Buchanan, graduate of A and M in the class of 1926, spoke on Soil Tests and Foundation Pressures in the lecture room of the Physics building recently before a joint meeting of the Architectural Club and the American Society of Civil Engineers.

Mr. Buchanan, who was the first president of the student chapter of the American Society of Civil Engineers at A and M, received his Bachelor's Degree in Civil Engineering here and was awarded his Master's Degree from the Massachusetts Institute of Technology at Boston.

Since the receipt of his Master's Degree, Mr. Buchanan has done extensive research work on foundation pressures and soil tests at the Massachusetts Institute of Technology for the American Society of Civil Engineers, and his talk was composed of the results of this research work.

Morgan Addresses Scholarship Group

Meeting for the first time since before the Thanksgiving holidays, the Scholarship Honor Society was entertained with a speech by S. S. Morgan, professor of English, following a banquet in the Mess Hall Annex Tuesday night. Mr. Morgan spoke on culture, expressing the belief that the technical student should spread his interest to other fields.

H. W. Perkins, president of the society, spoke also, making an address of welcome to new members.

The Scholarship Honor Society meets each second and fourth Tuesday in the Asbury Room of the Library, and to retain membership, no member can miss two meetings in succession.

A committee for naming the speakers at future meetings was appointed by the president as follows: C. E. Beeson, St. Louis, Missouri; J. W. Wells, Arkansas Pass; W. A. McLeod, Cuero; and C. E. Praeger, Paris.

Along the Sidelines

By R. L. WILLIAMS

Though the writer was right on only two of his predictions of last week's games, those to be played this week-end are even harder to predict.

Here they are:
Friday night
Arkansas 28 Texas 32
Saturday night
Arkansas 32 Texas 30
Texas A and M 26 S.M.U. 22
Rice 26 Baylor 22
Monday night
Texas A and M 26 T.C.U. 24

All of these scores are picked as close ones because the teams by their records so far are fairly evenly matched. The results after the games only will indicate which are the strongest of the group.

The real test though for Texas, Arkansas, S.M.U., A and M, and T.C.U. will be this week end. Those surviving may be counted on to give lots of trouble to the more ambitious ones.

For the last few years the Aggie basketball teams have not finished so very high in the percentage column, but there has always been at least one outstanding player during the season. For the season of 1931 it was Captain Shiro Hoke, All-Conference forward and All-American mention. Last year several Aggies received considerable mention. Even though they played on a team that won only four of their conference games, Captain Charlie Beard, Lester (Squawk) Veltman, and Big Joe Merka were chosen for the second favored five of the conference. By virtue of their showing against the Rice Owls, in a game that some sport critics regarded as a toss up, the Aggies gave indications of their ability to finish high in this year's race. Judging by his play in the first game, Captain Joe Moody can not help but be considered when the mythical five is chosen at the end of the season. Lanky Joe Merka will also come in for his share of the praise when the bouquets are handed out if he is able to get back into condition.

Though Coach Reid has only four lettermen, with only three available now, it seems that he will not have so many worries as was first expected. Several sophomore prospects are showing up bravely now, with the work of Breazeale, a Crockett product, the most outstanding. "Grandpa" Gregory, Tommy Hutto, and Bob Comelley are other sophomore prospects worth watching.

Probably the greatest transformation from season to season though has been in the play of one Jocko Roberts, pride of Terrell. In the game against the Owls this elongated guard more than once caused the Rice players to err in their passing and it was his cool-headed playing that advanced the ball down to Moody who performed the finishing touches.

While the Aggies were giving Coach Jimmy Kitt's Rice Owls a severe shake-down last Saturday night, another team, and one that finished in the cellar last year, gave one of the favorites of the loop for the last three years a severe letdown. S.M.U.'s brilliant sophomore team handed the Horned Frogs a 20-19 defeat. The Schmidmen however were playing without their All-American center of the last two years, Ad Dietzel. Flash Walker, who supposedly was to take Dietzel's place, was snowed under by the Pony guards. The game, however, was decided in the last few seconds of the fray.

The undefeated Longhorns also made it plain that they would be in the running throughout the season when they defeated the champion Bears of Baylor 48-26, a score comparing with the one of the Aggie-Owl fray.

At Ohio State University recently a "depression" formal was held, at which the co-eds wore gingham dresses they had made themselves.

Prince Toumaneff, a former general in the Russian Imperial Army and for the last four years a librarian at the Harvard College School of Business, has recently renounced his royal title and become just plain citizen Leo Constantine Toumaneff of the U. S. A.

As a camouflage for corruption prohibition has been useful.—Exra Pound.

Discovering the Northeast Passage

The Sibirkiakov, the expedition ship of the Russian Soviet that recently set a new passage across the Arctic from Russia to Japan, stranded on the heavy ice floes of the Arctic during its journey when it lost its propeller blades. After grueling labors in the cold, icy waters, the crew succeeded in lifting up the stern of the vessel and fitting it with new blades for the remainder of the journey.

ECONOMIC SYSTEM IS DISCUSSED AT SEMINAR MEETING

McDougal Speaks Before Social Science Seminar Group Monday Night.

Dr. M. V. McDougal, associate professor of economics at A and M college presented an address Monday night at the regular meeting of the Social Science Seminar in the lecture room of the Physics building. The subject of his address was "Our Economic System of Today from a background of co-operative Economic Philosophy." Dr. McDougal traced economic structures from the time of the Feudal Manor to the present age, stating that agriculture was and still is the basis of all economic systems. Dr. McDougal was of the opinion that the present thinking on the part of the people will tend to change the economic system and perhaps develop into the beginning of a new economic period.

On Monday, January 16, at 8 p. m. the Science Seminar will sponsor an address by G. S. Frapps, state chemist, on the subject "Recent Advances in Our Knowledge of Vitamines."

Scholarship Fund To Harvard University Is Open Only To Murphy

Cambridge, Mass.—(IP)—A Murphy by any other name may smell as sweet, but he won't get part of the scholarship fund left to Harvard University for the benefit of boys of that surname by the late William Stanislaus Murphy, '85.

Recently Harvard made its periodic announcement of scholarships granted. There were, as always, Murphys and plenty of them. There were also a large number of Smiths who get help from the fund set up by their "angel", Dunlap Smith.

In addition to these, there were scholarships available for boys with such various names as Whitling, Saltostall, Pennoyer, Mowlin, Morey, Hudson, Fisher, Abbot, Davis, Brown, Borden, Downer and Haven.

AGGIES WIN 35-18 TILT WITH RICE

Joe Moody, Aggie Forward, Is High Point Man With Seventeen Tallies.

A tightly played defensive game that was even effective against the long range shooting of the Owls, played a very important part Saturday night when Coach John Reid's Texas Aggie basketekers won the first conference game they played this season.

The Rice Institute Owls, playing for the first time under Coach Jimmy Kitts, formerly of Athens High School, were the victims of the 35-18 count. Only once during the first half, and four times during the second period, were the Owls able to break through the tight man-for-man defence of the Aggies to score field goals. The rest of the Owls' counters came through the free throw route.

Captain Joe Moody, beside being probably the smoothest player on the floor, was the high point man for the evening with seven field goals and three free shots. Most of his two-point counters were made by shooting over his right or left shoulder, and the Owls guards were never able to cope with him.

Second place in scoring honors went to a tall, lanky sophomore from Crockett, Beazale of the Aggies. This tall East Texan was playing his first conference game and scored six points though he was guarded by a larger and taller Rice player. Breazeale was handicapped in that he had to fill the shoes of the regular center, Joe Merka of Bryan, who was voted the most valuable player on the squad last year and has been out so far this season because of an injury, but he took Merka's place in a very convincing manner.

Probably the coolest player on the floor along with Captain Moody, was Jocko Roberts, senior guard from Terrell, who although scoring only five counters himself, was very instrumental in keeping the Ricemen from scoring. Another senior, Bull Marcum, was also a very stubborn defensive player.

Virgil Dixon, the famed long distance shot of the Owls, and Captain Bubba Koch, were outstanding in their play for the owls, but the too-close guarding even made the long shots for which Dixon is famous impossible.

DUKE UNIVERSITY SCHOOL OF MEDICINE

DURHAM, N. C.
Four terms of eleven weeks are given each year. These may be taken consecutively (M.D. in three years) or three terms may be taken each year (M.D. in four years.) The entrance requirements are intelligence, character and at least two years of college work, including the subjects specified for Grade A Medical Schools. Catalogues and application forms may be obtained from the Dean.

Journalism Students Advised To Continue Studies By Gannett

Ithaca, N. Y.—(IP)—Frank E. Gannett, head of the Gannett chain of newspapers, last week told Cornell University journalism students to take advantage of the current lean years to do graduate

work and acquire a store of varied information before going newspapering.

He spoke before the Cornell chapter of Sigma Delta Chi, journalistic fraternity. The modern newspaper, Gannett said, demands men of broad knowledge which could be more readily acquired before entering the profession than afterward.

6 o'clock means nothing to telephone service!

Bell System service must go on all the time. Day and night, Sundays and holidays, it must handle with speed and accuracy not only the usual traffic but also the unexpected rush of calls.

To meet this obligation, Bell System men tackle problems of many kinds. At Bell Telephone Laboratories, scientists develop new kinds of apparatus. At Western Electric, engineers find ways to make telephones, switchboards and cable more and more reliable. In the telephone companies, traffic engineers devise improved operating methods that make service faster, more accurate, more dependable.

Result: at noon or in the dead of night, the public reaches confidently for the telephone, knowing that Bell System service never stops.
