## THE SWIMMING POOL

Although work on the new A and M. College swimming pool wa
started last spring with completion scheduled for August 1, 1932, the opening date yas first delayped until February 1, 1933 , and is still unwhich should be completed in the near future. Regrettable though this delay may be, it is not as deplorable as the pre⿻ficament in which it
completion will place the officials of the college Authorized only complition will place the officials of the college Authorized only
complete the pool, the officials were not granted funds for maintain ing atd operating the pool.
This beaudful swimming pool, erected at an approximate cost of
\$75,000. has largely been made possible through the work of P. Downh, Jr.. member of the Board of Directors of the college and chair
man of the Building Program. Mr. Downs conctived the ided of man of the Byilding Program. Mr. Downs conctived the idea of the
pool os in expenditure from which the student could derive enjoy-
ment and recration in contrast to the numerouss class room buildings ment and recreation in contrast to the numerous class room buildings
which were peing constructed, and consequently secured appropriations anmonting to $\$ 40,000$ for this pursosen l/ter securing an in-
crease making the total approximately $\$ 75,000$. Much eredit is due crease making the total approximately 875,000 . Much credit is due
Mr. Downs for his work on the pool as it is vely likely that withou his efforts the pool would be non-existent. been proposed to the Executive Committee. The finst of the pool have a "small ampount to the students' maintenance fed of these is to add proposed was that the pool could be made self-sustaining by cherging
the students an additional fee for use of the pool it is regrettable that the stadents an additional fee for use of the pool ut is regrettable that
the stadents should be required to pay for the use. of a building erect ed for their pldasure.
Eatimated cost for starting and/operating the pool for the second
term approximates $\$ 2500$. The pool was built with money realized from the Oil Land Fund and this mones can be used only for building and
cannot be utilized for maintaining these same buildings. The executive connot be utilized for maintaining these same buildings. The executive
committee is af present turning over every plan open to them in an
endeavior to open the pool at an early date, and to continue its main-
tenance.

## COOPERATION Daring the past few years the Mess Hall aththorities have been striving to build the standards in general and the service rendered by striving to build the standards in general and the service rendered by that braneh of the college in particular up to the present high plane that braneh of the college in particular up to the present high plane and higher. But now their efforts are meeting with a tremendous dif- fieulty due et the reduction of the maintenance fee and the subsequent loss of revenue Despite the fact thatit a high standard hass altready been obitained, those in charge of the Mess Hall had visions of still been oftained, those in charge of the Mess Hall had visions of still greatee progress. along the lines of service to the students but eeo. nomic conditions have all but brought about the thendonment of pro nomic conditions have all but brought about the abandonment of pro- gressive panns and neeessitated the expenditure of muect thought on the ways and means of maintaining conditions as they now exist. No plan can be devised that will meet the approval of the entire student body, that is a certainty, but the cooperation of the corps, down to the last that is a certainty, but the cooperation of the corps, down to the last man, will lighten the burden of readjustment immenaurably and in the face of the presint conditions; which owe their existence to a desire on the part of the college officials to do their utmott toward lessening the part of the college officials to do their utmost toward lessening the finaniial struin of a college education, cooperation should be freely forthoming. fortheoming.

in fees brought about a reduetion of. Mess Hall fevenue of approximately. $\$ 150$ per day which amounts to $\$ 4500$ per month or $\$ 18,000$ per
semester. How to continue operating at the same high standard and with the same efficiency under the new and unfayorable conditions is
the problem now facing those in charge of the Mess Hall. Various plans have been suggested. A saving of $\$ 60$ per day could be achieved by serving milk at only one meal, $\$ 30$ per day could be saved by using
an inferior quality of meats, and a large expenise could be saved by an inferior quaity of meats, and a large expense could be saved by
eliminating chicken and ice cream from the menu, but - that does not
meet the approval of the Mess Hall authorities. All of these suggesmeet the approval of the Mess Hall authorities. Al of these sugges-
tions have been vetoed because they would take something away from the students that those who have the power to decide feel that the
stadente should have. What then is to be done? A plan that is. nearer aceeptance than any of the others is one
that would entail no inconvenience to the students and one that should be given their wholehearted approval. It consists merely of filling the empty places by reorganizing the seating arrangement and thereby
eliminating many, of the tables. With the smallet number of tables ased there would be a smaller amount of help heetded and the waste fifty-five tables there was at one time as many as fifty plates of meat firty-fife tables there was at one time as many as fifty plates of meat
left untouched. Such enormous waste must be elininated if the Mess lert untouched, Such enormous waste must be liminated if the Mess
Hall is to operate successfplly under its reduced budget and the only
plan that will meet the conditions without lessening the plan that will meet the conditions without lessening the quality or
quanatity of food served is a concentration of the students on fewer uanatity of food served is a concentration of the students on fewer
bles than are now being used.
Guests in the Mess Hall have been carefully ahecked thi yer and Guests in the Mess Hall have been carefully checked this year and Che number of, meals served to them has reached \& surprising figure.
The following data proves the point-Oetober, $188 ;$ November, 2388 ; - December, 2172; and January, 540, or a total' of 5258 guests since the
beginning of school in September. The cost of the meals served to them was $\$ 1,109$. It is not to be inferred that these meals to guests are not wiilingly given, but students can aid materally in the solving
of the problems of financial nature from the standpoint of the Mess Hall by cooperating and practicing care in the number of guests taken
to meald at the expense of the college.

## BOOTS AND SLACKS

 order requiring the abolition of boots and slacks as a part of the senior
uniform? Soch a procedure would result in open dissension and might even go so far as to throw the entire senior class in revolt. And to
What could the yeniors refer as an explanation for any action they
might take? The answer is timple, perhaps too simple. "It is a senior

ODD THINGS AND NEW-By Lame Bode

rivilege to wear slacks and boots." They
The senior section in the assembly hall has been usurped by un dighassmen; freshmen, sophomores, and juniors are seen in Bryan
nate extend this privilege to them; courtesy and consideration are term that have long been obsolete; and respect is as dead as Sanskrit, the
ancient sacred language of the Hindus of India. Do not these faets deserve consideration under the category of "senior privileges"?
The senior class would rise en masse to stage a fight order to do away with its rise en masured boots and slacks. Then why not make an effort to re-establish in full force these other prviileges that rre fast beeoming decadent? 'One man or as small group of men canot oversee rigid enforeement of the rules that constifute the priviperation of every member of the senior class,
The yoot of all this evil is the utter lack of respect by the underassmen for seniors. Respect is the vital element in all walks of life, ad yet it is sadly lacking here in college. The employde respects hi mployer's position, ability, and direeting power; so should the qnder-
lassmen respect the senior's position, ability, and directing power. respect were demanded by seniors the other corrections would follow if respect were demaral a matter of natural equence.
"But what of the friendethip of
based primarily on respect, and should any so-called friendships be ost as a result of the enforcement of the "privilege rulds", then those
riendships would be better lost. The ods axiom ve stand, divided we fall," holds true. In 4 united attack on the usurpwe stand, divided we fall", holds
ers of the senior privileges lies
privileges of the Senior class.

Campus Personalities
 Charles Mabry Cummings, cap
tain-elect of the 1933 Texas A an College football team, was bor and reared in Houston, Texas, in
October 1910. When he was eight ears old, his fanily moved to
Later he entered Stephen F. Austip High School at Bryan and there began a football carder that ha tain of next year's Aggie team. In
hifh school he made four letter
in both football and baseball. For three years he played tackle on the
Bryan High football., and was ifted to the backfield during his he Bryan High baseball club. In
1927 Charlie was placeed on. the eoond team of the all-state footar picked him as a first team all tate football player.
In the fall of 1928 Cummings tuyned down a scholarship to the A and $M$ as a freshman student
cal education. He woun his freshman
