

WELCOME FRESHMEN

By Dr. T. O. Walton

The members of the faculty and the executive officers of the College are happy to have the opportunity to extend a cordial welcome to all the members of the Freshman Class and the old students who are returning for the session of 1933-34. Those who are entering College for the first time will find conditions very different from their high school careers, and readjustments will be imperative if the student is to attain a high measure of success. It is the desire of the officers of the institution to assist students in every practical manner in making these adjustments upon a constructive basis. We invite you to bring your problems to us in order that we may give you such assistance and counsel in dealing with them as we are in a position to give. We believe you will find conditions here satisfactory and that you will have an opportunity to pursue your College courses under a wholesome environment.

We urge you to take advantage of the daily opportunities that are extended you for your own advancement. We know that if you apply yourself as you should your academic progress will be satisfactory.

There is need for trained men in positions of leadership to take charge of the program of national rehabilitation. Old institutions of the government and social order are being broken down and discarded at a rapid rate. Ten and twenty years from now the young men who graduate from this and other colleges will be called upon to play a large part in re-establishing

DR. T. O. WALTON, PRESIDENT A AND M

the Nation upon a sound economical basis, and to either rescue what is worth saving of the old social order or to revamp and lead a new social program. It is a great challenge to the man that is willing to make the necessary sacrifice to prepare himself for real leadership. We hope that every member of the group now entering this College will measure up to their own expectations and the expectations of their parents, their friends, and their faculty.

T. O. WALTON,
President
