

ACCOUNTANTS TO MAKE INSPECTION TRIP TO HOUSTON

Arrangements Have Been Made For The Group To Visit and Inspect Eight Different Business Concerns.

Sixteen senior and two graduate students specializing in accounting and statistics will visit a number of Houston business establishments on their annual inspection trip which lasts from Monday, April 15, to Wednesday, the 18th. T. W. Leland, head of the department, has made reservations for the group at the Rice Hotel at a complimentary rate.

The itinerary while in the city includes the following places: Hughes Tool Co.; Foley Bros., department store; National Bank of Commerce; Humble Oil and Refining Co.; Federal Land Bank; County Auditor's office; Anderson-Clayton; and Lykes Bros. and Ripley, shippers.

The group will be shown through the plants and offices of the various concerns and have been invited to inspect the accounting systems and records employed at each place.

The Hughes Tool Co., the largest manufacturing plant in Houston, manufactures valves, bits, drills, and other oil well supplies and machinery. The company employs more than two thousand men at this time and is operating on a twenty-four hour basis in order to fill orders. Howard Hughes, well known as the producer of several spectacular motion pictures, has succeeded his father in the business.

Anderson-Clayton, the world's largest cotton merchants, has modern warehouses in Houston that extend more than a mile and a half in length. They are floored with concrete and are so thoroughly fireproof that the company has received a double "A" rating on all insurance covering the buildings. It is interesting to note that last year Anderson-Clayton bought a little more than one-third of the entire cotton crop produced in this country, this included the total production of Texas, Oklahoma, and Louisiana. An interesting problem that confronts the accounting offices of this firm is that the company itself is divided into two distinct parts. One part of the company buys and holds the cotton while the other part sells the product to the world. Because of this arrangement it is necessary to draw up separate profit and loss statements for each division.

Rewrite men on newspapers may lose their jobs when the teletypewriter system is perfected, predicted W. C. Roberts, former editor of the Minneapolis Star.

SPRING IS HERE... I SAW THE NEW Varsity-towns

Mr. Robin has long been a harbinger of spring. What has puzzled us tho' is - - - who tells the robin? And now we know that he takes his cue from -

A and M Artillery Is Not To Be Motorized

The recent plans for motorization of the Field Artillery, which provides trucks and tractors for the moving of light artillery, will not effect the Field Artillery of A and M for some time to come. However, the course in Military Science will have in its curriculum a few points of the motorized battery.

Fort Sam Houston is undergoing the change from horses to trucks, and a gradual replacement in the whole standing army will follow. After the regulars have been replaced, the National Guard and ROTC will be motorized. The "horse countries", such as Texas and Oklahoma, will doubtless be the last to be motorized, so A and M need not fear the loss of its horseflesh for some time to come.

ROTC INSPECTION—

(Continued from page 1)
when the system of rating was changed, the school was rated excellent. The corps is prepared for the inspection this year, for it is in much better condition than it was this time last year, according to Colonel Emery.

AGGIE MARKSMEN—

(Continued from page 1)
Ott, and J. B. Heinen, also of Dallas.

Over 85 per cent of the intercollegiate matches were won by the Aggies this year, the matches being held with about 65 teams in the United States. The average for the year also places them within the high eight rifle teams in the country, which completes an unusually successful year. Results of the Hearst match will be announced the latter part of next week.

An investigation at the University of Iowa shows that one of eleven campus engagements result in marriage.

Michigan State College is considering a football course for men and women.

An anti-pun society has been organized by students at the Stevens Institute of Technology to deal with advocates of "the lowest form of humor."

DODD SPEAKS ON STATISTICS AT SEMINAR MEETING

Averages or Means As Constructed For Specific Purposes Discussed by University of Texas Mathematics Professor.

Dr. E. L. Dodd, professor of mathematics at the University of Texas, was the guest speaker for a meeting of the Texas A and M Science Seminar last Monday night. His subject was; "Averages or Means as Constructed for Specific Purposes."

Dr. Dodd discussed common uses for averages or means, such as their use to engineers in solving problems and also their uses as applied to financial problems and other matters of general use.

This lecture was in the nature of an "exchange lecture," as Dr. C. C. Doak of the A and M staff, talked before a meeting of the university seminar recently.

Hildebrand, star Cleveland pitcher, was an All-American basketball player at Butler University in Indianapolis during the session of 1929.

Houston Boys Guests of Houston Mothers of Houston Mothers At Banquet Sunday

The annual Houston Club Banquet, given by the Houston Mother's Club, took place Sunday at noon in the banquet room of the Mess Hall with Dr. T. O. Walton, president of the college as the speaker.

Urging a continuance of the custom, Dr. Walton stressed the value of parent-teacher relationship. Understanding between these two groups of people is a valuable asset to harmony in student life, he said.

Music for the occasion was furnished by the Serenaders.

Satisfy Those Desires

For Good Food Parkhill's Cafe

For CORRECT SUMMER EVENING WEAR

Made of Genuine PALM BEACH and Tailored by International

You can be assured of that well dressed feeling if you buy one at

THE CAMPUS CLEANERS

There's Bounce in a PALM BEACH SUIT

RESILIENCY! COME-BACK! RECOVERY!

Hang it up over-night, and the wrinkles bounce out. The suit comes back to its normal beauty and shape, almost as well as if pressed with a iron. This is due not to any added finish which might vanish in the laundry... but to new developments in the actual construction of the fabric.

The wrinkle-hating, crease-holding quality of the new 1934 Palm Beach and its smooth, unfuzzy yarns which repel dirt and dust, combine to keep down upkeep. Now you can stay cool and smart all summer at low cost. In white and many colors. Stylishly tailored by GOODALL. Fully pre-shrunk.

GOODALL COMPANY - CINCINNATI

Showing how Palm Beach Suits retain their smooth lines. Each of these summer suits, made of four totally different summer fabrics, was subjected to precisely the same muzzing treatment. Two sets of photographs were taken: (1) immediately after muzzing; (2) after hanging the suits up over-night. The Palm Beach Suit not only wrinkled or muzzed less than the others... but also showed truly amazing facility in the matter of "automatic recovery." (See actual photographs. In each case photo on left shows results after hanging.)

— what it means

— to store 70 million dollars worth of tobacco — 4½ miles of warehouses

Everything that Science knows about is used in making Chesterfields.

It means something to keep 70 million dollars worth of tobacco in storage. It means just this:

One thing we do is to buy mild, ripe tobaccos and then lock up these tobaccos in modern storage warehouses to age and mellow like rare wines.

We do everything possible to make Chesterfield the cigarette that's milder, the cigarette that tastes better.

It takes about 3 years to age the tobaccos for your Chesterfield, for Time does something to tobacco that neither man nor machine can do.

the cigarette that's Milder

the cigarette that TASTES BETTER
