

Landscape Art Club Elects Blasingame

J. C. Blasingame, senior landscape art student from Ennis, was elected president of the Landscape Art Club at a meeting held in the Landscape office Tuesday night. Other officers elected were K. S. Buchanan, Bryan, vice-president; and G. H. Brummerhop, Seabrook, secretary.

Tentative arrangements were made for the annual flower show, and a social program was planned. The regular meeting time was set for the first Tuesday in each month.

LOTS OF BOOKS—

(Continued from page 2)

front-door lock when you've arrived along about two in the morning, when it's important not to awaken the family—if you know what I mean. In fact, it never quite clicked for me until this summer, when I read "The Economy of Abundance", by Stuart Chase.

If you'll read Chase's "Economy of Abundance"—either the book of that name, or the article in Harper's for March, you'll have at least one explanation of what the Depression is all about. It may not turn out to be the correct explanation, but it's probably as near to the truth as any.

Anyhow, that's my best idea of 1934.

I'll be glad to print your esteemed Editor's (David Tisinger's) in this column next week—or did he have one?

While I'm on the subject, let me recommend Stuart Chase in general. He is an entertaining fellow, and, whatever real economists may think of him, he seems (to a non-economist at least) to talk common sense. Here are some of his books:

(1) Men and Machines, a lively account of the effect of the coming of modern machinery on people's lives and happiness.

(2) The Tragedy of Waste, showing how much poorer we are than we need to be.

(3) A New Deal, the best book I know of for making allusions to "Fascism", "Communism", and so forth, really mean something to you.

It will, undoubtedly, be a relief to you to know that this column will not be filled exclusively by the present writer, but will from time to time contain remarks from various shining intellectual lights among the Aggies. Two or three have already promised some gems of thought.

No, you're wrong—they are not taking a course under me!

The Big Fall order of books has not come to the Library yet, but a few have straggled in. Among these, I recommend: "I Went to Pit College", by Lauren Gilfillan (a college girl, by the way); also, "The Robber Barons", by Matthew Josephson—an interesting account of the careers of the great American capitalists; "The Night-Club Era", by Stanley Walker—the title speaks for itself; and, for pre-meds, "Behind the Doctor", by Logan Clendenning, whose "The Human Body" is an excellent book for anybody to read.

A young married couple is studying biscuit-making and law at the University of Washington.

Rackwell Kent, noted illustrator and author, has been secured to illustrate the 1934 Ohio University yearbook, "The Maker."

Weekly Information Regarding Work Of Experiment Station To Be Given

By R. E. Storms

It has now become our privilege to conduct for these columns, in the future, highly interesting material gathered from one of our very important divisions of the College—the Agricultural Experiment Station. This division, not only of great value to the College itself, contributes very largely to the promotion of better management in agricultural circles.

Constant experiment enables the director, Mr. A. B. Conner, and Mr. A. D. Jackson, Chief of Publications, to enlighten those who pursue agriculture as their life-work. Texas represents a very great agricultural productive unit, and we are proud to say that this station is outstanding for its many varied and interesting contributions relative to agriculture.

There are many things conducted behind the doors of this experimental station, which we feel, is of great interest to everyone; therefore, we will attempt to give

in sketchy form the achievements of this organization during the past months. In weekly installments to follow we will, through the courtesy of Mr. Conner, offer for your enjoyment intensely interesting and instructive researches.

These research facts, are but a daily occurrence within the Station, but to us they are everything that savours of the new, novel, and important.

In quoting Mr. Conner let us say that he has felt that the cadets have long needed such a column as this hopes to be. Mr. Conner says, "Students should become better acquainted with our work, since it is relative to many fields; for example, our soil survey maps are used not only by farmers but also by highway engineers and even by oil drillers."

In the future, with the kind assistance of the various staff members, we will attempt to keep you constantly in touch with the many developments in agriculture by means of successive weekly installments.

COLLEGE EDITORS DRAFT COVENANT IN NEW YORK MEET

Would Promote Peace and Progressive Education; Roosevelt and La Guardia Hall Aims

Its motives lauded by President Roosevelt and Mayor Fiorello H. LaGuardia of New York City, the Association of College Editors met in New York on September 15, and drafted the Covenant of the Association of College Editors.

The preamble of the Covenant stated as the aims of the A. C. E.:

"To stimulate the interest of students throughout the world in promoting international understanding and cooperation in the hope of ultimately achieving and insuring international peace and security; to arouse the students in the several countries to seek to understand and obtain an honest, intelligent, and efficient government; to enlist the aid of all students in securing a higher and sounder standard of living in the spirit of greatest good for the greatest number; to provide media for public expression and direction of the thoughts and energies of both undergraduate and graduate students interested in realizing these aims; to promote progressive education."

2. "The Association," according to the current issue of the Literary Digest, "is a product of the spirit of the times. There are groups of young college graduates all over the United States collecting for dinner, for lunch, for talks to discuss problems more serious than the approaching football season at their alma maters."

John H. Sorel, Executive editor of the Scripps-Howard Newspapers, according to the Digest, was moved to remark:

"The thing that impresses me is that all these young men and women seem agreed, they all know where they want to go."

The organization is comprised of editors of some thirty college publications, the geographical locations of which range from Canada to Virginia.

Judging Team Will Enter Dairy Meet

E. N. Neal, Yoakum; J. C. Froese, Cuero; C. D. McEver, Hillsboro; and L. D. Smith, Bryan, four senior members of the Kream and Kow Club left Tuesday, September 25, for Waterloo, Iowa, where they entered the dairy judging contest of the National Dairy Show. The show was staged during the last week of September.

An inspiring send-off was given the team Monday night in the "Y" Cabin. The Kream and Kow Club had as its guests the Saddle and Siroloin Club and the Poultry Judging Team. All three organizations joined together to bid farewell to the honored members.

Last year the team won honors at the Fort Worth Fat Stock Show. This team should make a showing at the National Dairy Show this week. They will return to the campus October 5.

Sixteen executives from Chicago department stores have been engaged to teach a course in department store administration at Northwestern University.

Aggie Grad Is Named To Instruct Lighting

The second issue this summer of the magazine LIGHT published by the General Electric Company carries a picture of W. G. Darley, Texas A and M Electrical Engineering graduate of the class of 1929.

Darley has been selected as a member of the instruction staff for group 3 of the lighting school courses that are to carry the story of the Science of Seeing to the nation. Darley is a member of the group which will conduct schools at Raleigh, Birmingham, Atlanta, and five other cities in the southeastern part of the United States.

More than 25 tons of desert are used at the University of Minnesota hospital every year.

English Department Gets New Teachers

Pedro Garcia, a native of Porto Rico and graduate of Sam Houston State Teachers College and R. S. Northwang, who has his Masters of Arts degree from the University of Colorado have been added to the teaching staff of the English department.

Mr. Garcia is teaching freshman English and is also doing graduate work in English and education. He came from Porto Rico to the United States in 1925.

Mr. Northwang is also teaching freshman English and doing work in English and language. He has taught at Mississippi A and M and at the University of Tennessee.

Angelina Club Elects Officers

The boys from Lufkin and Angelina County met Sunday in 33 Miller for the purpose of organizing for the ensuing year and of electing officers, of whom S. C. Sellers, Headquarters of 1st Battalion Field Artillery was chosen president. Other officers elected were J. C. Fortenberry, G Infantry and C. A. Swarthout, B Signal Corps, Vice-president and Secretary-treasurer, respectively.

Plans for a Christmas dance and the insertion of a page in the Longhorn were discussed by those present.

LIKE A PEN FROM ANOTHER WORLD

Come to Open the New School Year

100% Greater Ink Capacity—A Visible Ink Supply—A Twice as Useful Point—New, Exclusive Laminated Pearl Style

In order to hold as much ink as this sacless marvel, an ordinary rubber sac pen the same length would have to be as big around as a case. For the Parker Vacumatic eliminates 14 old-time parts, including not only the rubber ink sac, but the squirt-gun piston pump found in other sacless pens. The Parker Vacumatic contains none of these—that's why it's guaranteed mechanically perfect!

The only transparent style with visible ink supply that doesn't look transparent. Says Everett Genter (student at College of Physicians and Surgeons, Boston)—"When we medic used rubber sac pens, we had to carry bottles of ink to lectures and exams. The Parker Vacumatic has ended that nuisance. Do you wonder we've gone for it in a big way?"

Don't penalize your earning or learning by clinging to an obsolete pen. Stop today at the nearest pen counter and try this new wonder of science. The Parker Pen Co., Janesville, Wis.
