

Aeronautical Club Hears J. A. Trail

J. A. Trail, instructor in mechanical engineering, spoke to the Aeronautical Society on the subject: "Gliding," at a meeting held in the lecture room of the mechanical engineering building, Tuesday night. Mr. Black, a local aviator, following Mr. Trail, spoke on the subject: "Modern Training Methods in Aviation."

Upon completion of the speeches, the club made plans to build a glider for the purpose of studying the methods used in glider construction. Although no decisions has been made as to the type of glider the club will build, it is the general opinion of members of the club that it will be a primary glider.

JAPAN VISITED—

(Continued from page 1)

ple and shrines, as well as its historical record. From here the travelers journeyed by train to Osaka, where they spent some time studying the cotton trade, including visits to a receiving ware house, large cotton and dye manufacturing plants, and the Sampin Exchange, where they called on numerous cotton firms for information relating to purchases, manufacturing, and sale of cotton goods to various parts of the world. By going into the rural sections the party observed at first hand the intensity of the agricultural operations taking place, a sight that proved enlightening and interesting to the entire group.

Leaving Osaka, they traveled through the southern part of the main Japanese islands and sailed from Shimonoseki for Fusan in Chosen, spending some time here studying the growing of cotton and visiting government officials in Keijo, capital of the province. Continuing their journey, the party went to Manchukuo, spending ten days visiting various agricultural sections, cities, and industrial plants in this new state. Two days were spent in the new capital of Hsingking, three days in Mukden, and two days in Dairen and Port Arthur.

In Chosen and Manchukuo the party met a number of ex-Aggies who extended to the party every possible courtesy. These men, now occupying important governmental and commercial positions in different parts of the Orient, spoke highly of their fellow students and former instructors, according to Mr. Mogford.

On sailing from Dairen in Kawtung, on July 18, with stop-overs at Kobe, Osaka, and Tokio, from whence they took a boat on July 26 for Honolulu and the United States, they landed in San Francisco on August 10, and arrived in Texas August 13, completing an 18,000 mile tour.

Offering Acknowledgement

We wish to thank the Senior Class, The Signal Battalion, and E Battery Field Artillery for the lovely floral offerings and for the sincere sympathy shown during our recent bereavement.

—Mrs. H. Engelbrecht and family.
—By G. E. and E. H. Schultis.

T C U Poll Reveals Agreement In Tastes

The likes and dislikes of Texas students reveal a striking similarity in tastes of literature, politics and music and a rather wide divergence in preference of movies and movie actors. This was shown by the result of a poll conducted by the student newspapers at T C U and A and M for radio station WSM in connection with its series of university programs.

The poll showed that at both T C U and A and M the student bodies agreed: (1) "Anthony Adverse" was the best book of the year; (2) students are favorable to the new deal—at T C U 99 per cent voted "Yes"; (3) "Love In Bloom" is the favorite tune; (4) Franklin D. Roosevelt is the favorite "New Dealer."

On the other hand, T C U students and A and M undergraduates disagree on movies. At A and M "Viva Villa" was voted the outstanding movie of the year with Wallace Beery the favorite male star and Ginger Rogers the favorite actress. T C U students selected "Barrets of Wimpole Street" as the year's outstanding motion picture and chose Norma Shearer and Frederic March as favorite stars.

A and M students named S. S. Van Dine their choice among authors, while the T C U group showed a decided preference for Kathleen Norris.

More than 3,000 Texas undergraduates voted in the poll which affords WSM continuity writers a line on student interests and thus helps them gauge various programs for the 34 colleges included on the "America's Tribute To Education" series.

Smith Selected To Head Valley Club

Harwood Smith, San Benito, was elected president of the Rio Grande Valley Club for the ensuing year at the time of the first meeting of the club held in the Y chapel Tuesday, October 9. Other officers elected were: Noel Langham, Mission, vice-president; E. D. Button, Harlingen, Secretary-treasurer; Paul E. Love, Brownsville, publicity chairman; and George Fletcher, Harlingen, social chairman.

Tentative arrangements for the annual Christmas dance were discussed following the election. Nothing definite was decided upon, however, and the club deferred its decision until such a time as replies arrive from contacts made in the valley.

Taking steps ahead in the direction of the Longhorn, the organization decided that an entire page was to be secured for their part as a club.

Tooth Paste Is Not Responsible for Healthy Teeth; Diet Deciding Factor

By R. E. Storms

Realizing the tremendous amount of pressure that has of late years been put upon the public by manufacturers in an effort to stimulate buying, an attempt will be made to inform our readers of the facts in the case concerning one item of advertising—tooth-paste. We are taking the data that has just been compiled by the Agricultural Experiment Station on the adequacy of the diet of Texas school children and are going to show what correlation, if any, exists between diet and dental decay. It must be stressed that tooth decay is not at all attributable to any one cause, and no one remedy has yet been found for dental decay.

There are several theories of dental decay. Some authorities suggest that it is caused by the fermentation of food particles which in turn forms organic acid. Another theory places the blame upon a deficiency of the proper elements needed for tooth building. Probably the real cause lies in both these and also in the racial characteristics of teeth.

FEDERAL AID—

citizens to participate intelligently in deciding the economic and social questions of the day."

Special attention through the Federal Works Administration and other Federal agencies to the construction and repair of needed school buildings.

Studies "looking to the development of Federal participation in a national minimum program of education."

Continuation of the new student aid, nursery schools, workers' classes and adult education now being financed by the Relief Administration.

Federal loans are to pay past due teachers' salaries and refund bond indebtedness on which schools are paying heavy interest rates. Chicago teachers this fall received \$26,000,000 in back pay through Federal aid.

Radio Club To Attend Convention

Fifteen members of the Radio Club will leave Thursday night for the West Gulf District Convention to be held in San Antonio, Friday, Saturday, and Sunday.

While at the convention the club will attend a banquet to be held in one of the downtown hotels. Speeches will be made by prominent members of the American Radio-Relay League of Hartford, Connecticut.

Prizes will be given to the winners of the code speed, equipment, code relay, and various other contests to be staged Friday and Saturday. Each club will be represented in the contest by its respective teams.

The convention will complete its activities sometime Sunday, and the members of the Radio Club plan to return Sunday night.

ADVANCED PIPE CHEMISTRY
FINE TOBACCOS + SECRET BLENDING PROCESS, MINUS ALL "BITE" = PRINCE ALBERT!

AFTER EVERY CLASS IT RINGS THE BELL!

WITH ITS different flavor, its mildness and rich, fragrant aroma, Prince Albert has often been described as "the National Joy Smoke." You'll enjoy this companionable blend of top-quality tobaccos. All "bite" is removed by a special process in line with the principle that "if your tobacco's right, your pipe won't bite."
