**THE HON. BANANA**

Essay by a Japanese Schoolboy

The Banana are a remarkable fruit. He are constructed in same architectural style as Hon. Sausage. Difference being skin of sausage are habitually consumed, while it are not advisable to eat rapping of banana.

Perhaps are also intristing the following difference between the two subjects; Banana are held aloft while consuming; sausage usually left in reclining position. Banana are first green in culler, then gradual turn jallowish. Sausage start out with indeffinit culler (resamble terrier cotta) and retain same hue indeffinitly.

Sausage depend for creation, etc., upon being or stuffing machine, while banana are pristine product of Hon. Mother Nautre. Both article resamble the other in that neither have pit or colonel of any kind.

In case of sausage, both conclusion are attached to other sausiages. Hon. Banana, on other hand, are joined on one end to stem; other termination are entirely loose.

And finally, banana are strictly member of vagitable kingdom, while affiliation of sausage are often undecided.
