

METHODS SUBJECT OF ADDRESSES TO ACCOUNTING CLUB

Members of the accounting society were addressed by K. T. Dickson, Lexington, and J. H. Kelly, Athens, at a meeting of the society in the Asbury Room of the library last Thursday.

Both talks were on subjects which are of importance to practicing accountants. Dickson spoke on the system of deduction for depreciation of machinery in the yearly tax reports required by the Treasury Department, and Kelly described the most outstanding plans to rearrange the calendar.

This rearrangement has long been discussed and many business concerns are at present using some special calendar for internal use. The more simple and practical substitutions which could be made universal and which have been offered for adoption by various countries were described.

T. W. Leland, head of the accounting and statistics department discussed the application of substance of these talks to the practical accountant's work.

Tap Dancing Taught For Vaudeville Acts

Tap-dancing, under the leadership of W. L. Collins, Tyler, Miss., is now being taught to a group of eight students by a Bryan teacher for the purpose of preparing them for vaudeville features of the play, "The Aggies of 1935", to be given in April.

The management of "The Aggies of 1935" is willing to refund half the expenses of teaching fifteen students to tap-dance provided that they can satisfy Collins as to their proficiency and that they will perform in "Aggie" plays as long as they are in this college. Students desiring to participate should see Collins in 13 Puryear immediately.

Brewster Falls Through Glass Door of Main Bldg.

Ed Brewster, of Temple, B Troop cavalry freshman, fell through the glass door of the main entrance of the Main Building last Friday afternoon, and is in the hospital suffering a badly cut lip and gum besides minor scratches about the body.

The unfortunate accident happened when he slipped after playfully running from a friend. His associates and the student body in general will be glad to know that his lip, which was cut entirely through, is steadily healing.

Morris to Head Rusk Club

D. K. Morris was chosen president of the Rusk County Club at its first meeting Sunday night. The remainder of the officers are to be chosen at a later date.

Plans were discussed regarding a Christmas dance that is to be held at the Cooper Club in Henderson sometime between Christmas and New Years. No definite date is to be set until further arrangements can be made in regard to obtaining Vincent Lopez to play for the dance.

The question of chartering a bus to Henderson Christmas was also discussed by the club, but nothing definite was decided.

Students Will Study N.R.A. in Laboratories

South Hadley, Mass.—Not satisfied with what their textbooks have to say about economic and political theories, a group of 22 students in American government at Mount Holyoke College have taken it upon themselves to find out the workings of the N.R.A. by establishing laboratories in Holyoke in order to study the textile mills and paper factories.

Plans call for a thorough survey into the conditions of the industries.

"We shall endeavor," a spokesman of the group said, "to complete our survey of the field, and then return to the classroom to discuss what we have found out, and then sit down to formulate some good, honest criticisms of the whole system, detailing what seems to be all right, and what improvements or changes are needed."

Soil Erosion Shown By Ag. Eng. Dept.

The agricultural engineering department is now displaying the Soils Erosion Service exhibit which has been shown at the State Fair at Dallas and at the Brazos County Fair in Bryan.

This exhibit, which is in the hall of the agricultural engineering building, consists of several models made of plaster of paris and concrete and of pictures showing the advantages of terracing. One model exhibits gullied land, and the other two large models show the advantages of terracing, strip cropping, and contouring pastures. There are also miniature models of several types of check dams that help prevent erosion.

Odd Chandelier Made From Discarded Farm Implements

An item of interest that has probably been noticed by only a few students is the chandelier in the lecture room of the agricultural engineering building. This chandelier, strung by a trace chain, is made of parts of discarded farm implements, consisting of a wagon wheel decorated with plowshares, cultivator points, discs, sickle guards, and harrow teeth.

Officials Turn Nimrod

S. G. Bailey, secretary of the college, and R. K. Chatham, manager of the Exchange Store, left Thursday morning for Mason County for a ten day deer hunt. They were met at Hearne by Guy Anderson of Calvert, a member of the Board of Directors of A and M College, and several friends, who accompanied them to Mason for the hunt.

Date Set for Beaumont Dance

Plans are underway for the annual Beaumont A and M Club dance to be held in the Hotel Beaumont, Friday December 28.

The club is working in collaboration with the Beaumont ex-students. The ex-students are in charge of floor decorations, and the club will arrange for the orchestra.

Because the dance will be an invitation affair, bids will be under the supervision of the thirty members of the club.

New Calculator to Solve Simultaneous Equations

Cambridge, Mass.—What is believed to be the first mechanical calculating machine for use in solving simultaneous equations has been designed by John B. Wilbur of the department of civil engineering at the Massachusetts Institute of Technology.

One of the things which in the past has stood in the way of efficient analysis of many engineering problems has been the solution of large numbers of simultaneous equations. It is for this reason that Dr. Wilbur's invention is important to practically all fields of engineering.

A reporter for "The Daily Texan" while scouting around for news, slipped into the main lounge of the Union and peered over the shoulders of twenty-odd students to note what part of the daily papers they were most interested in. With but one exception they were all turned to the funny page.

Finally the colleges are getting down to fundamentals. The University of Oklahoma has started a course on "how to live without money".

ECONOMIC PROBLEM SUBJECT OF TALK BY V. K. SUGAREFF

V. K. Sugareff, professor of history, addressed the Scholarship Honor Society on "Economic Nationalism" at a meeting held in the Asbury Room of the library Tuesday of last week.

The address by Professor Sugareff was the concluding one of a series of lectures sponsored by the society for the purpose of studying the economic problems of the world and their possible solutions. Other speakers who have appeared on this program at past meetings are: Dr. T. F. Mayo, Dr. V. P. Lee of Houston, and Mr. B. D. Marburger.

At the next meeting, which will be on December 3, Gates Thomas of San Marcos Teachers College will speak to the society on Texas Folk Lore. Mr. Thomas is considered an authority on this subject, which he has studied extensively.

New Corn-Hog Bills Allow More Freedom

More individual freedom and personal judgment are being allowed the signers of 1935 corn-hog contract agreement with the Agricultural Adjustment Administration, E. M. Regenbrecht, extension swine husbandman, announced.

The 1932-1933 base of production will be again used in carrying out both the programs. This will permit the farmers to produce hogs up to ninety per cent of the established base, and will allow fifteen dollars per head for the ten per cent not produced. The greater freedom lies in the fact that within the limits of seventy-ninety per cent, it is optional with the farmer as to the amount of hogs he produces.

POPULAR SPEAKER ADDRESSES GROUP SUNDAY MORNING

A. J. "Dad" Elliott, specialist in student religious problems and Associate National Secretary of the Student Division of the Y M C A, addressed the freshman class Sunday morning in the mess hall. He was introduced by M. L. Cashion, secretary of the College Y M C A.

"Dad" Elliott is affectionately known to thousands of students throughout the country. He graduated from Northwestern University thirty-two years ago where he was all-western end on the varsity football squad and was captain of the track team.

He stated Sunday: "As a man is in college, so he is in life. A student has the attitude toward life while he is in school that he will probably have always. What you say and what you do will not matter much nor for very long, but the attitude you take will matter much and matter always."

"Probably only seven out of the present freshman class here will ever amount to anything. This is too bad, for it should not, and really need not be true. What students are to be, they are now becoming and all should determine to be one of those seven."

The scientist is society's scout who invades Nature's unexplored territory and returns with a report of what lies there.—Dr. Arthur H. Compton.

Fed undergraduates deserve to be called students; most are only youthful specimens of the average citizen.—T. L. Harris.

Let our young men pass on from their destination of war to a personal crusade to strengthen every international agency designed to prevent it.—Robert C. Clother.

HOARDING DONE IN 400 B. C., MICHIGAN U. PARTY REVEALS

Ann Arbor, Mich.—Hoarding is nothing new. The University of Michigan expedition, recently returned from Palestine and the Nestlé East where it dug up some 30,000 coins, revealed that it had found several hoards of coins while digging. The hoards, they alleged, date back as far as the fourth century, B. C.

One of the most important details involved in the digging up of the coins was the cleaning and preparing of the treasures in such a manner as to maintain their value.

Of the 30,000 coins found, 10,000 have been cleaned, and the expedition is ready to publish an account of the some 2,800 of the finds.

Gold coins came out of the ground "as shiny as though they were new," the bulletin states, "but silver, bronze and copper coins needed cleaning work."

Work at the creamery is steadily progressing, with more machinery being moved in each day, C. N. Shephardson, head of the dairy husbandry department announced. He further stated that all the machinery should be put in place during the Thanksgiving holidays, and that bottled milk would be served in the mess hall as soon after the holidays as possible.

"Big earnings selling fellow students felt novelties if you like to sell. No investment. Earnings start immediately. Give sales experience. Aircraft, 513 Allen, Grand Rapids, Mich."

Klein Orchestra Engaged To Play for Clubs' Dance

Jimmy Klein and his dance band will play for the annual Heart O' Texas and Mountaineers Club dance to be held in the Crystal Ballroom of the Bevins hotel in Menard, December 29.

Mr. Klein, who has recently completed an engagement over

WOAI in San Antonio, will feature his original floor show, and, according to the director, the ever-popular girl accordionist, Marguerite, will be with his band when it plays December 29.

The Crystal Ballroom will be decorated in A and M motif, and each member of the club will be in uniform for the dance. The feature attraction will be the Grand March which will be staged at mid-

NO MORE ENERGY ? ...

TOBACCO EXPERTS ALL SAY:

"Camels are made from finer, More Expensive Tobaccos—Turkish and Domestic—than any other popular brand."

GET A LIFT WITH A CAMEL!

EDWARD KENT, '36—GEOLOGY STUDENT.
Edward Kent knows the value of a full reserve of natural, vibrant energy. And that's one of the reasons why he sticks to Camels. In his own words: "It takes a lot of hard work to acquire any thorough knowledge of geology—and a lot of energy. It's tiring at times, but like most of the fellows around here, I have found that smoking a Camel cheers me up... chases away all fatigue... gives me that 'lift' in mental alertness and physical well-being which I need to be able to go on working with renewed energy."
