WHY JIMMY FAILED

Dear Dean:

In early childhood he developed chromesthesia, which seriously confused his phonisms and photisms. The basic cause was an aggravated anastomosis which involved dangerous adhesions in the post-Rolandic area. Later, he very narrowly escaped anosmia and hypergeusia, which evidently would have caused his death from over-eating. And now, while studying in his room, he is handicapped by hemianopsia; while in class, he is tormented by dysancousia and akoasms; and when he tries to recite he is attacked by globus hystericus. Finally, while on examination, a cataclysmic descent of alexia and super-asymptolia blocked his pass over the 70-yard line, and that is why he flunked.

Your tired professor,
(Neurotic)

Translation will be furnished upon request by Professor P. C. Key of the English department.

"Play chess?"

"No, but I can handle a queen."

Host: Those are my Grandma's ashes over there.

Guest: O, so the poor soul has passed on?

Host: No, she's just too lazy to look for an ash tray.

LOG

She—Do you want to know something?

He—Sure.

She—Well, maybe someday you will!

SOUTHWESTERN MAGAZINE

Reformer: "Stop, friend! Do you believe that a glass of that vile stuff will quench your thirst?"

College Lad: "Nope. I'm gonna drink the whole jug."
