

O'Daniel Inaugurated Texas' Governor Today

Ceremonies Shatter All Tradition; 60,000 Fill UT's Stadium

W. Lee O'Daniel today was inaugurated as the new Governor of Texas.

The inaugural ceremonies shattered all tradition, in that they were held in the Memorial Stadium of the University of Texas. A joint session of the House of Representatives and the Senate was held in the center of the Stadium playing field beginning at 9:00 this morning.

Seventy-two bands, including the Longhorn Band of the University as the official one, the 143rd Infantry Band of Waco as the military band, and the Texas Aggie Band, played for the occasion.

The greatest mass event of the morning was the singing of 10,000 school children of Texas accompanied by all the bands. O'Daniel did not "dress up" for the occasion; he wore only an ordinary business suit.

At 3:30 this afternoon took place a two-hour parade of all the bands up Congress Avenue. Tonight at 8:00 is the governor's reception in Gregory Gymnasium and the Austin and Driskill Hotels, followed by the inaugural ball in these three places at 9:00. Tonight there is also an open-air reception on Congress Avenue north of the Capitol, and street dancing for which Governor O'Daniel and his now-famous hillbilly band will play. To climax the celebration there will be a huge display of fireworks.

More than 60,000 people were present for the inauguration.

Authority on Soil Mechanics Associated With Texas A. & M.

Dr. Karl Von Terzaghi, one of the world's foremost authorities on soil mechanics, is now associated with A. & M. for a ten month period from Dec. 1, 1938 until Oct. 1, 1939. Dr. Terzaghi will be on the A. & M. campus from Feb. 8 to 15 at which time he will make a series of three lectures, the exact dates of which have not been announced.

Dr. Terzaghi is now advising the college on the purchase of equipment for a laboratory in soil mechanics in the Department of Civil Engineering.

Formerly associated with many European universities, the University of Austria in particular, Dr. Terzaghi is now associated with Harvard University and Texas A. & M. He is the author of many publications and is a member of many of the world's outstanding engineering societies. He is also the recipient of the Normal Medal of the American Society of Civil Engineers, the Fitzgerald Medal and Herschel Prize of the Boston Society of Civil Engineers.

Field Artillerymen Use B-B Pistols For Sharpshooter Training

BY BILL MURRAY

"Z-I-N-G!"
"OW! X&!(+@?!"

Such are the sounds growing familiar to Aggie ears these days. And what is the reason? Why, just some innocent-looking little black metal B-B pistol, in the hands of some would-be Aggie sharpshooters who non-combatants are beginning to regard as followers of the Al Capone and John Dillinger school.

Seriously speaking these pistols are being put to some very practical use. Captain Philip Enslow of the Field Artillery, eager to have his students of third-year military science become steady and accurate shooters before going to summer camp, interested many of them in the idea of practicing with these toy-like but accurate pistols, which he has been ordering for them by

Over 200 Aggies Attend Governor's Inauguration

144 Band Members And 30 R. V.'s Make Trip

Over 200 Aggies left College Station by train today to trek to Austin to see and take part in the inauguration of governor W. Lee O'Daniel. Included in this number were 144 members of the band and 30 members of the Ross Volunteers. Besides this number around 50 students left by car and a few used the proverbial thumb to see the inaugural ceremonies.

The A. & M. Band will be the largest unit taking an active part in the ceremonies, and will have no important part in the program of the day. Including the conclusion of the entire program with the playing of "The Star Spangled Banner."

The white clad members of the Ross Volunteers will serve as honor guard to Mr. O'Daniel throughout the inauguration.

The members of the Band and of the Ross Volunteers will also attend the Inaugural Reception being given in honor of Governor O'Daniel and Lieutenant Governor Coke Stevenson following the inauguration Tuesday night.

BOARD CONSIDERS "Y" BUILDING PROGRAM AT MEET

Plans of the Y.M.C.A. for an elaborate expansion program underwent consideration by the Board of Directors in their meeting at College Station last Saturday morning.

However, according to Col. Ike Ashburn, Executive Secretary to the President, no definite move was decided upon as there are further considerations along the line of social activities and the social welfare of the students of A. & M. that the Board of Directors has in mind.

Further than this, nothing could be learned other than that before the end of the forthcoming semester some definite announcement would probably be made concerning the Y.M.C.A. program.

AT THE LAST MEETING OF the A. & M. Poultry and Egg Club junior officers were elected to take over the club. Earl Roemer was elected president, Louis Jurcak, member of this year's judging team, was made vice-president, Fred W. Swallow is the new secretary and G. R. Davis is to be the club reporter.

These officers will have charge of the club until this time next year.

SCIENTIFIC REVIEW TO BE ISSUED

The second issue of The Scientific Review will be issued Wednesday afternoon in the basement of the Administration Building, according to editors Sam Harris and Buddy Mandell.

The magazine will contain the following articles: The Students Machine Shop, Foreign Poes—Our Defense Against Insects Along the Rio Grande, Prickly Pear Persecution, A Portable Automatic Traffic Counter, The M. K. S. System of Units, Porosity Determination, The Why of Mystery Tuning, and news on both agricultural and engineering campus clubs.

ALLEN ACADEMY HAS EXCHANGE STUDENTS ENROLLED

Nine cadets from Colegio de Ramirez of Bogota, Colombia, South America, escorted by Lieut. Alfredo Angel Tamayo of the Colombian Army arrived in Bryan last Tuesday to spend two months as students at Allen Military Academy.

Lieut. H. A. Hughes, commandant, Major E. H. Mitchell, head of the Military Science Department, and M. G. Nydegger, Spanish instructor at the academy who initiated the exchange arrangements, met them. A group of Allen Academy students will go to Bogota this summer to spend two months at the academy there.

The cadets from Colombia are Carlos Gello, Jaime Rueda, Alfredo Samper, Jorge Bernal, Jaime Calcedo, Juan Gaviria, Eduardo Calcedo, Luis Carlos Londono, and Santiago Salazar.

The exchange students wore dark blue uniforms with gold stripes on their trousers and gold trimmings on their coats, while Lieut. Tamayo wore a dark green uniform, black cavalry boots, and a full length gray military coat.

The group went immediately to the academy where, because of the soggy ground, only a partial review was held and afterwards they were introduced to the student body.

The Colombian students will continue their regular school courses at Allen and will visit several colleges, including A. & M. and the University of Texas.

This exchange arrangement is the first made by any preparatory school in the United States and Allen authorities believe it will help to develop friendship between the people of Colombia and the United States. They hope to see the day when similar arrangements can be made with other South American countries by the schools in the United States.

Not All Sophomore Representatives To Council Elected

President Jack Bailey of the Sophomore class has requested that all outfits who have not as yet elected their representatives to the sophomore council to do so at once. The number of representatives who turned up at the last meeting of the council was highly unsatisfactory, Bailey said.

The class has secured permission to stage a sophomore prom this year. In order that the council might correctly function and plans for the prom be made, all representatives must be elected by the next meeting time which will be sometime soon, Bailey said.

CAPTAIN T. D. ROBERTS, U. S. Army and instructor in the military science department, will be the speaker at the meeting of the Reserve Officers Association tonight at 7 p. m. in the Petroleum Lecture Room.

Captain Robert's subject will be "The 2nd Cavalry and Early Texas History". All seniors are urged to attend.

MAIER JOSEPH, GRADUATE of Southern Methodist University, has accepted a temporary appointment as assistant chemist in the department of Dr. G. S. Fraps, state chemist.

M. A. Mills Places 1st In Livestock Judging Contest

103 Freshmen Take Part In Saturday's Contest; Six Medals Presented

M. A. Mills, from Panhandle, carried off first honors in the Freshman Livestock Judging Contest, held last Saturday in the A. H. Pavillion. Six medals were given in this contest which brought out a field of 103 contestants.

Mills scored a total of 828 points out of a possible 906. J. L. Heartstill, of Weatherford, was in second place with 518 points, the third medal went to C. C. Hutchinson, from Itasca, who scored 513, he was closely followed by A. E. White, of Pearsall, with a total of 512, in fifth place was Al L. Murry, from Miami, who scored 510, and the sixth place medal was taken by T. S. Richardson, of Hebbronville, with a score of 506.

The students judged two classes each of sheep, swine, cattle, and horses. One class of sheep was judged for market qualities and the other for type and breed characteristics. There was a fat class of beef cattle and the other class was judged as breeding animals. Both classes of horses were judged as draft animals, while the swine were divided into market and breeding classes.

In the sheep division, first place went to J. F. Robinson, second to Mills and third to D. D. Turcotte. A. E. White won first honors in the swine class, with second going to J. Cleveland and L. C. Calloway taking third. First place in the cattle division was a tie between Heartstill and Murry, with Calloway taking third. T. E. Stuart won the horse classes, and J. R. Fuller was second with Mills in third place.

Each class of live stock judged counted fifty points and reasons were given on one class in each division, these reasons counted a total of 200 points in the contest, while the placings counted 400 points.

STATE SCHOOL COSTS TO RISE

AUSTIN.—Advocates of drastic slashes in cost of state government were hurled a thunderbolt here Saturday with the Board of Control's support of a 22% increase in enrollment at state colleges the past two years.

In view of the leaping registration, the board recommended to the Legislature convening Tuesday a 20 per cent boost in educational appropriations, amounting to \$3,317,450 and bringing the total for the 1939-41 biennium to \$19,814,508.

The board cited increases ranging from 18 to 55 per cent in certain institutions and reported \$76,000 in deficiency appropriations already spent in efforts to relieve the heavy load.

Lifting of the 100 freshmen limit at the University of Texas Medical School at Galveston, a \$30,000 annual appropriation for negroes to continue their education at colleges outside of Texas after leaving Prairie View College, \$58,200 additional yearly for agricultural-industrial research at the university, 11 new buildings costing \$1,564,000 at various schools and establishment of a social welfare workers' training course at the university were included in the recommendations.

The proposed budget suggested no general salary increases, but a few salary adjustments upward. Methods of determining equalized summer school appropriations were outlined for the benefit of the lawmakers.

The board said restricted admission at the medical school has been in effect many years, and while not recommending amounts of money, it advised the Legislature to provide additional appropriations for that purpose.

Because of increasing specialization and preference for living in large cities, the board expressed the opinion there was an insufficient number of doctors available in rural sections.

There appears to be many people living on the brink of ill-

Demke New Director Of A. & M.; Two Present Members Are Reappointed

Chinese Graduate Of A. & M. Is One Of China's Agricultural Leaders

By DI FU YU

An internationally famous Aggie is H. Y. Moh, one of the leaders in agricultural and industrial circles in China. Following six years of college work at the Universities of Wisconsin and Illinois, he received his degree of Master of Science in agriculture at Texas A. & M. in 1914.

After Mr. Moh returned to China, he used his abilities and American education to improve the methods for the production of Chinese cotton, set up three cotton mills, organized the Chinese Cotton Mill-Owners Association, served six consecutive terms as a director of the Chinese Cotton Goods Exchange which he helped to organize, served as vice-minister in the Ministry of Industry, Commerce, and Labor of the Republic of China, and at present is chairman of the Committee for the Promotion of Agricultural Production in Chungking, China.

Mr. Moh was born in Shanghai in 1876. He received his college education very late, not beginning the study of English till he was twenty-one. He had experience as a cotton firm apprentice, customs clerk, head of a normal school, and chief of police of a railroad company, before coming to the United States. He entered first the University of Wisconsin, then in 1911 the University of Illinois where he received his Bachelor of Science degree in 1913.

Immediately after his return to China in 1914, Mr. Moh translated into his native language and published Dr. F. W. Taylor's book "The Principle of Scientific Management". He has done a great deal in the improvement and extension of cotton growing in China. Through his efforts many tons of American upland cotton seed and many thousands of copies of bulletins on scientific agriculture have

Book Designed By Aggie Prof Selected As One of Best Books

The textbook College Algebra by Edwin Smith, published by the Corden Company, was selected in Dec. 1938 as one of the Best Fifty Books of the Year. This is an annual selection made by the American Institute of Graphic Arts. This book was designed by S. B. Zisman of the A. & M. Architecture Department. The selection of this book is more significant than it appears as only two or three textbooks are selected each year.

The designing of a book consists of far more than is generally thought. This work consists of selecting what material that the author has written will be used, what type will be used, what kind of paper will be used and the nature of the cover and all other matters pertaining to the general construction of a book.

Mr. Zisman is the author of several publications in respect to architecture and has presented many papers and addresses on the subject over the nation, especially in Texas. He was appointed by the General Education Board of the Rockefeller Foundation to make a countrywide survey of the study of shelter (architecture, housing, planning) in general education. On February 1, 1938 he received a six month leave of absence from A. & M. to work on this project and finished the work seven months later. One of the reports of this work is now being prepared for publication.

DEAN E. J. KYLE, HEAD OF the School of Agriculture, is attending the annual meeting of the National Farm Credit Administration in Houston. He left Monday, and will be back Thursday. He was recently reappointed to serve for the third consecutive term as a director of the Farm Credit Administration.

H. Y. MOH

Longhorn Editor Corrects Earlier Announcement

Longhorn Editor W. D. Barton said today that an earlier announcement concerning entries in Vanity Fair and Senior Favorites sections of The Longhorn is in error.

"If a student enters a girl's photograph in Vanity Fair competition and pays that fee, she will automatically be placed in the Senior Favorites section if she is not chosen in the Vanity Fair group," Barton said.

Earl Carrol is to make the Vanity Fair selections this year.

SOCIALIZED MEDICINE IS SEMINAR TOPIC

Dr. E. W. Bertner, President of the State Medical Association and one of the most prominent physicians in the state of Texas, will lecture Monday night at 7:30 in the Chemistry Lecture Room on the subject of socialized medicine.

Dr. Bertner has appeared several times before congressional committees studying the advantages of socialized medicine and the feasibility of governmental support of it. Of late years he has been devoting much of his time to lecturing on the subject.

MEN FOR WHOM "Y" DEDICATIONS WERE MADE WERE TRUE AGGIES

In the spring and summer hundreds, even thousands, of A. & M. students stop at the fountain on the steps of the Y. M. C. A. every day to get a cooling drink of water, but few of them ever wonder about the inscription on the fountain.

In Memory of
J. M. Woodson Junior
Lovingly known as
"Peg"

Who is Peg? In the living memory of many who knew him while he attended school here, he was a boy who had overcome a physical handicap and made himself an athlete. He was slightly deformed in one leg but he developed the rest of his body until he had a magnificent physique.

Beside being well known for his swimming and diving ability the feats he performed on a motorcycle were the talk of the campus. Another display of strength and endurance on his part, as told by one who knew him, was to start at the steps of the Y and walk to the railroad station and back, there is nothing sensational in that except the walking was done on his hands. However, that was not his usual method of travel. Most of all he is remembered by the men who knew him for the remarkable number of friends he had.

Curiosity will lead those who desire to know more about their

Poultryman To Replace Davis On College Board

A. H. Demke of Stephenville, director of the Texas Baby Chick Association, has been appointed by Governor W. Lee O'Daniel to take the place of R. B. Davis of Plainview on the Board of Directors of Texas A. & M.

Mr. Demke served the Texas Baby Chick Association five terms as president. The present in his sixth year as director of the Association, and he is now in his third term as executive secretary-treasurer of the same organization.

Donald Demke, his son, has attended Texas A. & M. for the last three years and is now a senior in B Company, Infantry, majoring in veterinary medicine.

Other members of the Board who have been reappointed are E. J. Keist of Dallas, who has served two terms, and R. W. Briggs of Farr, who has served one term. The members who are still serving terms are F. M. Law of Houston, Walter G. Lacy of Waco, Joe Ulay of Dallas, H. C. Schuhmacker of Houston, Elliott Roosevelt of Fort Worth and G. R. White of Brady.

Mr. Demke was recently appointed as a committee of one to re-draft the baby chick association's constitution which was adopted in 1933. He has also served as president and executive director of the International Baby Chick Association.

C. I. A. Girls Prefer Doctors as Husbands

DENTON.—Any 26-year-old doctor about six feet tall and weighing 180 pounds who would like a wave of immediate popularity should go immediately to the campus at Texas State College for Women (C. I. A.), since the majority of girls there have judged such a person their ideal man for marriage.

Other specifications are that he must be a college graduate, that he should have saved \$1,000 before the fatal step, and that he should be making \$25 a week at the very least. Lawyers, business men and engineers are runners-up in the collective TSCW preference, and 24, 26 and 23 are also considered acceptable ages. The girls themselves prefer to marry at the ages of 21, 23 or 30.

About one-third of the students plan to continue their professional work after marriage. All the girls want children, and the greatest number want four, with many voting for three and two.

Field Artillerymen Use B-B Pistols For Sharpshooter Training

dozens. The pistols shoot small B-B's, by means of a strong rubber band. The idea is similar to that of the old big wooden guns many of us used when we were kids to have mock battles shooting bands made from cut-up strips of auto inner tubes.

Targets, target-prints, and B-B's in pound lots (3,500 to the pound) are also included in many of the orders being sent in from A. & M., and some of the boys are really becoming experts in their marksmanship.

Nearly everywhere you go you can see fellows shooting their new pistols. The idea is beginning to spread from the Field Artillery juniors to other campus groups. One of the latest pistol purchasers was Dick Todd.

Beware—your neighbor may be another Dillinger in disguise!
