Registrar

The official curricula for the second semester will be found on pp. 4 to 8 of the official Schedule of Classes. All students are urged to conform to the section that has been set up for their program of studies in making out their schedules for registration of the second semester. For example: If you are a sophomore Mechanical Engineering student, you should arrange your program of studies from sections 175 to 180, inclusive. Heads of Departments will not permit you to register for any other section unless there are unusual circumstances surrounding your case. It is necessary that we request students to conform to the regular sections set up for their programs in view of the large enrollment which is taxing our laboratory facilities to the maximum.

The cooperation of students is requested in this matter in order that registration will proceed without any difficulty. If I can advise with any student concerning his program of studies, please call at the office to see me.
E. J. Howell
Registrar

All students taking E.E. 305 must turn in their leads by Friday, January 27, or they will be charged with the leads. —M. C. Hughes, Head Dept of Electrical Eng.
