

APPEARS HERE TONIGHT

Virgil, famous magician and illusionist, brings his company of artists to A. & M. tonight at 7:15 in the Assembly Hall. Though Virgil's performance is filled with laughs, there are many hair-raising and death-defying scenes. A special feature of the program will be Jelle, psychic enigma, who will offer her startling mindreading specialty.

WASHINGTON—  
(Continued from page 1)

scientific breeding, so much so that he doubled the wool production of his flock of sheep and greatly increased the milk production of his cows. He also branded all of his cattle and mules.

WASHINGTON IN MECHANICS

Washington likewise turned his talents to the field of mechanics, designing an improved plow and making what he called a "barrel plow," a crude, but workable, grain drill for sowing peas and small grain.

As a means of supplying his farm with a variety of meats, Washing-

ton operated a fishery whose excess catches were often sold in ton lots.

DEVOUTLY RELIGIOUS

The Father of Our Country also read widely of the literature of the day. He was familiar with Shakespeare, Homer, and the other classics. He was devoutly religious and closed his last official act with these words, "I consider it an indispensable duty to close this last solemn act of my official life, by commending the interests of our dearest country to the protection of Almighty God, and those who have the superintendence of them to His holy keeping."

It is both fitting and proper that Texas A. & M. should join the rest of the nation in celebration of the anniversary of the birth of the man who was "first in war, first in peace, and first in the hearts of his countrymen."

POPEHOE—

(Continued from page 1)  
riage and family life. That he is highly qualified to speak on this subject is shown by the fact that he is general director of the Institute of Family Relations, and also lecturer in biology at the University of Southern California.

The Institute of Family Relations, with headquarters in Los Angeles, is an organization which carries on scientific research on sex, marriage, divorce, venereal disease, temperance, household management and family relationships, and other social questions. It is a sort of "marriage clinic" where present or prospective partners in marriage obtain free advice of the most reliable type about such questions as those named.

Before the World War, Dr. Paul Popenoe was editor of the Journal of Heredity, published for the American Genetic Association, Washington, D. C. Afterward he was for a number of years executive secretary of the American Social Hygiene Association, New York City. Returning to California, he was for many years secretary of the Human Betterment Foundation, at Pasadena. He has lectured widely in American colleges and universities and from 1927 to 1932 was visiting professor at summer sessions of Teachers College, Columbia University. He is the author of many researches and contributions in the field of social biology, and of a great number of books, including the following: "Date Growing in the New and Old and New Worlds," "Applied Eugenics," "Modern Marriage: A Handbook," "The Conservation of the Family," "Problems of Human Reproduction," "The Child's Heredity," "Collected Papers on Eugenic Sterilization in California," "Sterilization for Human Betterment," and "Practical Applications of Heredity."

A. & M. MEN MAY HAVE CHANCE AT REGULAR ARMY

Under a new bill now being put through the national House of Representatives, graduates of A. & M. may have a chance to secure appointment in the regular Army as second lieutenants rather than in the officers reserve.

In consideration of the fact that modern nations have ignored treaty obligations and disregarded every moral principle of international relations, bringing about many undeclared wars in recent years, the House of Representatives is cooperating with the Army in putting through the bill to provide for an increase in army equipment and personnel to such an extent that the United States will be in a position to resist any attack that might be made against her.

To carry out this program, the bill provides for an increase in army personnel of 40,753 men and officers. The officer increase will be drawn out over a period of several years to prevent building up a hump in the promotion list. The officers will be distributed among the various branches of the Army as follows: Finance Department 27, Quartermaster Corps 114, Ordnance Department 44, Signal Corps 40, Chemical Warfare Service 18, Adjutant General's Department 7, and Medical Corps 225.

The bill provides for the appointment of a portion of these officers from the honor graduates of senior reserve officers training units. Men are chosen from those whose records as to military adaptability, leadership, and scholarship indicate their ability as officers.

Marsteller Attends Veterinary Meet

Dr. R. F. Marsteller, dean of the school of veterinary medicine, has returned from Ft. Worth where he attended a meeting of the Executive Committee of the State Veterinary Medical Association of Texas held Sunday.

According to Dr. Marsteller, who is honorary President of the association, the committee discussed matters of public health and adequate protection of the livestock industries, including poultry, from terrors of disease.

THE UNIVERSITY OF DENVER has announced special fellowships to train experts in local government of finance.

McQUILLEN—

(Continued from page 1)  
ers were read by the members on the program. Miss Stela Higgins, in her talk on maintaining interest among the alumni, cited briefly how she had been working with the alumni and how, through her campaign, she had been able to bring the alumni of Mary Hardin-Baylor into closer contact with the school and each other.

On the list of the fourteen colleges and universities represented at the meeting are found names of both large and small institutions, among them are the following: St. Mary's University; John Tarleton College; S. M. U.; Baylor and the University of Texas.

BISHOP CLINTON S. QUIN

will preach at St. Thomas' Chapel, Wednesday evening at 7:30 p. m. He is the first of a series of speakers who will visit the Chapel during the Lenten Season. Visitors are always welcome at all the services of the Chapel, and are extended a special invitation to hear Bishop Quin and the other visiting preachers who will follow him during the next six weeks.

Wednesday, Feb. 22nd, is the last date students may make applications for re-examinations.

E. J. Howell  
Registrar

Applicants for baccalaureate as well as advanced degrees to be conferred in June are requested to fill out application forms in the Registrar's Office now.

E. J. Howell,  
Registrar

CIRCULAR NO. 28:

1. In compliance with the request of the committee in charge of the Field Artillery Ball, approved by the Regimental and 2nd Battalion Commanders of the Field Artillery Regiment, Milner Hall will be vacated by cadets Friday and Saturday night, February 24th and 25th, in order to provide accommodations for visiting girls attending the Field Artillery Ball and the Corps Dance on those nights.

2. Cadets having guests will be assessed a charge of 50¢ per guest to cover the cost of mastrons, maid service and other incidental expenses.

3. The Battalion Commander, 2nd Battalion Field Artillery, is made responsible that rooms and corridors are in a neat, orderly condition for the reception of guests.

4. Cadets will vacate Milner Hall by 1:30 p. m., Feb. 24th; guests may be admitted at 3 p. m. Cadets will be readmitted to the hall at 12 noon, Feb. 26th, by which time guests must be out of the dormitory.

5. Guests staying in the dormitory must be in not later than 3 a. m. Friday night, and not later than 2 a. m. Saturday night. Escorts will be held strictly accountable for compliance with these instructions.

6. Reservations may be made by cadets living in Milner Hall on Wednesday, Feb. 22nd, from 8 a. m. until 5 p. m., who wish to reserve their own rooms. After 5 p. m. on that date, reservations will be open to other cadets of the Field Artillery.

Geo. F. Moore  
Commandant

SCHOLARSHIP SOCIETY

There will be a meeting of the Scholarship Honor Society Tuesday night Feb. 21 at 7 p. m. in the Asbury Room of the Library.

The A. S. A. E. will meet Tuesday, Feb. 21, at 7 p. m. in the lecture room of the Ag Engineering Building. Dr. Gieb, Field Representative of the Soil Conservation Service, will be the speaker.

CLUBS

The A. & M. Dames Club will meet Wednesday Feb. 22 at 8 p. m. in the Y.M.C.A. parlor. All student wives are cordially invited to attend.

ENTOMOLOGY CLUB

Dr. Henry Menusan of the Division of Entomology, Texas Agricultural Experiment Station, will speak to the Entomology Club Wednesday night on "Entomology

in New York." Dr. Menusan, from Cornell University, is well acquainted with New York and with entomological work in that state, and his talk should prove of great interest. All members be present promptly at 7:00 p. m.
